The Western Colorado Botanic Gardens is quickly gaining attention as a result of activity around it. The garden has been managed by Strive for the last 26 years and has successfully served the needs and mission of their organization. As the City invests more resources into the River District, the condition of the gardens, opportunities to serve the community in a greater capacity, and growing interest in the gardens themselves present a renewed interest for the City to return to a more prominent role in the management and operation of the gardens.

The site identified for the master planning process is approximately 22.6 acres, adjacent to the Colorado River and near the location where the Gunnison River joins it. Amenities near the site include Las Colonias Business Park and amphitheater, the Dos Rios Development, Watson Island Disc Golf Course, the River Front Trail and a string of developed parks nearby.

It is imperative the master planning process includes past and present stakeholders, as well as future contributors to the gardens. The City would like to ensure the gardens can establish itself as a community resource, maximizing usage, engagement, and education.

Goals of the master planning process should capture:

- Park Operations greenhouse growing facilities
- Park Operations maintenance yard; meeting needs of this site and the maintenance of nearby amenities.
- Potential food and beverage venue
- Potential aquaponics facility for food production and education
- Maintain integrity of cactus and succulent garden
- Highlight regional features, flora and water-wise landscape techniques
- Meeting and event space.

The services require a contract with a Landscape Architectural firm.

The Parks, Recreation, and Open Space (PROS) Master Plan adopted by City Council on January 6, 2021, identified the Botanic Gardens as a short-term priority (1-4 years).

The central purpose of the project is to produce a Master Plan and construction documents for Western Colorado Botanic Gardens.

The gardens are situated in approximately 22.6 acres of City owned parcels. This master plan should attempt blend these parcels in an intentional way, creating flow, utilizing landscaping and hardscape to meet the goals of the gardens. Activities and parcels within this scope of design include Colorado Discoverability, Watson Island Disk Golf Course, Phase 1 of Las Colonias Park, the Riverfront Trail, a future extension of the River Park, and a spur of single-track trail. This location of the City is a highly attractive and vibrant area with a growing blend of amenities and attractions. A community process should be employed to finalize the program and design.

4.3.1 Scope of services: Provide a Master Plan on time and within budget. The Plan shall be efficient to operate and maintain; shall include sustainable features to the extent possible; shall be aesthetically pleasing and shall add value to the City.

4.3.1.1 Critical elements to consider in this project are as follows, although these points are not all-inclusive:

- Facilitate a public process to identify the preferred concept design for the development of Horizon Park in a way that is budget conscious and maximizes

- the parks contribution to the Quality of Life in Grand Junction.
- Providing engineer's opinion of probable costs for construction of the elements favored in the conceptual master planning process.
 - Ensure completion of this Master Plan by **TBD**.

4.3.1.2 Schedule of Project Services (Tasks): Public involvement will be an important element of this project:

- A minimum of three public meetings are envisioned for the Consultant.
- A minimum of three Stakeholder meetings are envisioned for the Consultant.
- It is assumed that additional meetings can be conducted by staff.

An effort extending no more than four months is envisioned. Individual / unique approaches are welcome. Provide the following as a basic outline:

Phase 1: Programming and Public Participation: A public participation process will be required because of the size and location of the park.

Phase 2: Conceptual Design Development: Some design elements for the park have already been identified because of need; however, the community will largely play a hand in adding additional amenities, determining size, and determining location. Ultimately a final agreed upon Preferred Plan with supporting graphics is expected.

Phase 3: Final Master Plan to Include Phasing and Cost Estimates: A final Master Plan will be refined from the above processes. This plan will be drawn to scale and will include at a minimum:

- Accurate dimensional amenities and facilities
 - Generalized grading to a one-foot contour level
 - Line diagrams for site utilities
 - Traffic study (if deemed necessary)
 - Geotechnical. No geotechnical data/reports are available for this project area at this time.
 - Irrigation strategy, supply integration, mainline distribution and sizing
- In addition, a realistic phasing plan is required along with corresponding cost estimates and quantities including:
- Site boundary, civil grading/drainage/utility plan (existing and proposed)
 - Landscape plan
 - Furnishing plan and cut sheet details
 - Lighting plan
 - Signage plan
 - Other necessary drawing details, design notes, and specifications required for construction.
