Liquidated Damages for Failure to Meet Project Completion Schedule:** If the Contractor does not achieve Final Completion by the required date, whether by neglect, refusal or any other reason, the parties agree and stipulate that the Contractor shall pay liquidated damages to the City for each such day that final completion is late. As provided elsewhere, this provision does not apply for delays caused by the City. The date for Final Completion may be extended in writing by the Owner.

The Contractor agrees that as a part of the consideration for the City's awarding of this Contract liquidated damages in the daily amount of **\$1,200.00** is reasonable and necessary to pay for the actual damages resulting from such delay. The parties agree that the real costs and injury to the City for such delay include hard to quantify items such as: additional engineering, inspection and oversight by the City and its agents; additional Contract administration; inability to apply the efforts of those employees to the other Work of the City; perceived inefficiency of the City; citizens having to deal with the construction and the Work, rather than having the benefit of a completed Work, on time; inconvenience to the public; loss of reputation and community standing for the City during times when such things are very important and very difficult to maintain.

The Contractor must complete the Work and achieve final completion included under the Bid Schedule in the number of consecutive calendar days after the City gives its written Notice to Proceed. When the Contractor considers the entire Work ready for its intended use, Contractor shall certify in writing that the Work is fully complete. Final Completion date is the date by which the Contractor shall have fully completed all clean-up, and all items that were identified by the City in the inspection for final completion. Unless otherwise stated in the Special Conditions, for purposes of this liquidated damages clause, the Work shall not be finished and the Contract time shall continue to accrue until the City gives its written Final Acceptance.

If the Contractor fails to pay said liquidated damages promptly upon demand thereof after having failed to achieve Final Completion on time, the City shall first look to any retainage or other funds from which to pay said liquidated damages; if retainage or other liquid funds are not available to pay said liquidated damages amounts, the Surety on the Contractor's

Performance Bond and Payment Bond shall pay such liquidated damages. In addition, the City may withhold all, or any part of, such liquidated damages from any payment otherwise due the Contractor.

Liquidated damages as provided do not include any sums to reimburse the City for extra costs which the City may become obligated to pay on other Contracts which were delayed or extended because of the Contractor's failure to complete the Work within the Contract Time. Should the City incur additional costs because of delays or extensions to other Contracts resulting from the Contractor's failure of timely performance, the Contractor agrees to pay these costs that the City incurs because of the Contractor's delay, and these payments are separate from and in addition to any liquidated damages.

The Contractor agrees that the City may use its own forces or hire other parties to obtain Final Completion of the Work if the time of completion has elapsed and the Contractor is not diligently pursuing completion. In addition to the Liquidated Damages provided for, the Contractor agrees to reimburse the City for all expenses thus incurred.

3. Statement of Work

3.1. GENERAL:

The City's Purdy Mesa Flowline (PMFL) is outside of City limits and within Mesa County. The PMFL is one of two water transmission lines that carry water from the reservoirs at the base of the Grand Mesa to the city Water Treatment Plant on Orchard Mesa. The PMFL was originally built in the 1940's and has exceeded its design life. While there is no history of breaks in the vicinity of the project, the existing pressure control tank is undersized and is easily emptied or overfilled during flow changes in the pipeline. The proposed storage tank will allow more flexibility in operation of the PMFL by allowing more time during adjustment for pressure equalization and other flow parameters. This will improve resilience of the transmission pipeline and provide a more reliable delivery of drinking water to the City's customers. It will also prevent losses due to overflow of the existing tank and improve water quality at the water treatment plant.

To improve operation of the Purdy Mesa Flowline, the City is replacing the Pressure Control Tank. The location of the Pressure Control Tank is near the existing raw water pipeline and pressure control facilities. The project area is near an unnamed and unpaved road as shown on the Drawings and is accessed from Lands End Road. Note that access to this project site crosses private property from all directions. All visits to the site shall be coordinated through City of Grand Junction Water Services or the Project Engineer.

The performance of the Work for this Project shall conform to the General Contract conditions presented in the City of Grand Junction's Standard Contract Documents for Capital Improvements Construction, revised July 2010, except as specifically modified or supplemented herein or on the Construction Drawings.

3.2. PROJECT DESCRIPTION:

The City of Grand Junction is soliciting competitive bids from qualified and interested companies for all labor, equipment, and materials required (except for those listed in Section 3.3.12 and the Bid Schedule) for the Purdy Mesa Flowline Pressure Control Tank project. All dimensions, scope of Work should be verified by Contractors prior to submission of bids.

This project has three bid alternates. Descriptions are as follows. The offeror must bid on at least one and as many as all the Bid Alternates. The City will review the response to each Bid Alternate as a “stand alone” project and will select the preferred Bid Alternate.

The Base Bid Work will include all necessary labor, supervision, equipment, tools, and materials for a 33,000-gallon raw water storage tank with connection to the 20-inch Purdy Mesa Flowline raw water pipeline. The project generally consists of constructing a cast-in-place concrete tank with necessary site piping, site grading, electrical, instrumentation, and controls. The existing pressure control tank will be demolished and removed for disposal. Approximately 237 linear feet of existing PMFL will be replaced with approximately 300 linear feet C900 DR-18 PVC as shown in the construction plans. Approximately 228 linear feet of C900 DR-25 PVC drainpipe will be installed and connected to the existing drain that carries water to the bottom of Sullivan Draw. Coordination with the City for connection to the 20-inch Purdy Mesa Flowline is required.

The Bid Alternative 1 Work consists of constructing a steel 33,000-gallon raw water storage tank with connection to the 20-inch Purdy Mesa Flowline. Project generally consists of constructing a steel tank with necessary site piping, site grading, electrical, instrumentation, and controls. The existing pressure control tank will be demolished and removed for disposal. Approximately 110 linear feet of existing PMFL will be replaced with approximately 146 linear feet C900 DR-18 PVC as shown on the construction plans. Approximately 79 linear feet of C900 DR-25 PVC drainpipe will be installed and connected to the existing drain that carries water to the bottom of Sullivan Draw. Coordination with the City for connection to the 20-inch Purdy Mesa Flowline is required.

The Bid Alternative 2 Work consists of all Work in the Base Bid and will include a Xypex Admixture added to the cast-in-place concrete tank.
