1.15 Definitions and Terms: See Article I, Section 3 of the General Contract Conditions in the *Standard Contract Documents for Capital Improvements Construction*.

1.16 Examination of Specifications: Bidders shall thoroughly examine and be familiar with the project Statement of Work. The failure or omission of any Bidder to receive or examine any form, addendum, or other document shall in no way relieve any Bidder from any obligation with respect to its bid. The submission of a bid shall be taken as evidence of compliance with and understanding. Prior to submitting a bid, each Bidder shall, at a minimum:

- a. Examine the *Contract Documents* thoroughly, and;

- b. Visit the site to familiarize itself with local conditions that may in any manner affect cost, progress, or performance of the Work, and;

Location of any excavation or boring made by Bidder shall be subject to prior approval of Owner and applicable agencies. Bidder shall fill all holes, restore all pavements to match the existing structural section and shall clean up and restore the site to its former condition upon completion of such exploration. The Owner reserves the right to require the Bidder to execute an access agreement with the Owner prior to accessing the site.

The lands upon which the Work is to be performed, rights of way, and access thereto, and other lands designated for use by Contractor in performing the Work, are identified on the Drawings.

Information and data reflected in the *Contract Documents* with respect to underground utilities at or contiguous to the site are based upon information and data furnished to the Owner and the Engineer by the owners of such underground utilities or others, and the Owner does not assume responsibility for the accuracy or completeness thereof, unless it is expressly provided otherwise in the *Contract Documents*.

By submission of a Bid, the Bidder shall be conclusively presumed to represent that the Bidder has complied with every requirement of these Instructions to Bidders, that the *Contract Documents* are not ambiguous and are sufficient in scope and detail to indicate and convey understanding of all terms and conditions for performance of the Work.

1.17 Questions Regarding Statement of Work: Any information relative to interpretation of Scope of Work or specifications shall be requested of the Purchasing Agent, in writing, in ample time, prior to the inquiry deadline.

1.18 Addenda & Interpretations: If it becomes necessary to revise any part of this solicitation, a written addendum will be posted electronically on the City's website at <https://co-grandjunction.civicplus.com/501/Purchasing-Bids>. The Owner reserves the right to accept or reject any or all substitutions or alternatives. When offering substitutions and/or alternatives, Bidder must state any exception(s) in the section to which the exception(s) pertain. Exception/substitution, if accepted, must meet, or exceed the stated intent and/or specifications. The absence of stated exception(s) indicates that the Bidder has not taken exception, and if awarded a Contract shall hold the Bidder responsible to perform in strict accordance with the specifications or scope of the bid and Contract Documents.
- 1.23 Collusion Clause:** Each Bidder by submitting a bid certifies that it is not party to any collusive action or any action that may be in violation of the Sherman Antitrust Act. not receive recognition as a Bidder for any future Work of the Owner until such participant has been reinstated as a qualified Bidder.

- 1.25 Public Disclosure Record:** If the Bidder has knowledge of its employee(s) or sub-contractors having an immediate family relationship with an Owner employee or elected official, the Bidder must provide the Purchasing Agent with the name(s) of the individuals. The individuals are required to file a "Public Disclosure Record", a statement of financial interest, before conducting business with the Owner.

Based on such observations and the Contractor's Application for Payment, the Owner will determine the amounts owing to the Contractor and will issue Certificates for Payment in such amounts, as provided in the Contract. The Owner will have authority to reject Work which does not conform to the Contract Documents. Whenever, in its reasonable opinion, it considers it necessary or advisable to ensure the proper implementation of the intent of the Contract Documents, it will have authority to require the Contractor to stop the Work or any portion, or to require special inspection or testing

Miscellaneous Conditions: Material Availability: The Contractor must accept responsibility for verification of material availability, production schedules, and other pertinent data prior to submission of bid. It is the responsibility of the Bidder to notify the Owner immediately if materials specified are discontinued, replaced, or not available for an extended period of time.

2.19. Time: Time is of the essence with respect to the Project and any other milestones or deadline which are part of the Contract. It will be necessary for each Bidder to satisfy the City of its ability to complete the Work within the Contract time set forth in the Contract Documents. The Contract time is the period of time allotted in the Contract Documents for completion of the Work. The date of commencement of the Work is the date established in a Notice to Proceed. If there is no Notice to Proceed, it shall be the date of the Contract, or such other date as may be established therein, or as established as entered on the Bid Form. The Date of Final Completion of the Work is the date certified by the Owner when all construction, and all other Work including, but not be limited to: testing, QA/QC, receipt of required reports and/or forms, grant requirements (if applicable), punch list items, clean-up, receipt of drawings and/or as-builts, etc., is fully complete, and in accordance with the Contract Documents.

- 2.20. Progress & Completion:** The Contractor shall begin the Work on the Commencement Date as noted on the Notice to Proceed and perform the Work expeditiously with adequate forces to complete the Work within the Contract time/by the Completion date.
- 2.21. Payment & Completion:** The Contract Sum is stated in the Contract and is the total amount payable by the Owner to the Contractor for the performance of the Work under the Contract Documents. Upon receipt of written notice that the Work is ready for final inspection and acceptance and upon receipt of application for payment, the Owner's Project Manager will promptly make such inspection and, when it finds the Work acceptable under the Contract Documents and the Contract fully performed, the Owner shall make payment in the manner provided in the Contract Documents.
- 2.22. Bid Bond:** Each bid shall as a guaranty of good faith on the part of the Offeror be accompanied by a Bid Guaranty consisting of a certified or cashier's check drawn on an approved national bank or trust company in the State of Colorado and made payable without condition to the City; or a **Bid Bond** written by an approved corporate surety in favor of the City. The amount of the Bid Guaranty shall not be less than 5% of the total Bid amount. Once a Bid is accepted and a Contract is awarded, the apparent successful Offeror has ten calendar days to enter into a Contract in the form prescribed and to furnish the bonds with a legally responsible and approved surety. Failure to do so will result in forfeiture of the Bid Guaranty to the City as Liquidated Damages.

Each Offeror shall guarantee its total bid price for a period of sixty (60) Calendar Days from the date of the bid opening.

- 2.23. Performance & Payment Bonds:** The Contractor shall furnish a Performance and a Payment Bond, each in an amount at least equal to that specified for the Contract amount as security for the faithful performance and payment of all Contractor's obligations under the Contract Documents. These bonds shall remain in effect for the duration of the Warranty Period (as specified in the Special Conditions). The Contractor shall also furnish any other bonds that may be required by the Special Conditions. All bonds shall be in the forms prescribed by the Contract Documents and be executed by such sureties as (1) are licensed to conduct business in the State of Colorado and (2) are named in the current list of "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Circular 570 (amended) by the Audit Staff, Bureau of Accounts, U.S. Treasury Department. All bonds signed by an agent must be accompanied by a certified copy of the Authority Act. If the surety on any bond furnished by the Contractor is declared bankrupt or becomes insolvent, or its rights to do business in Colorado are terminated, or it ceases to meet the requirements of clauses (1) and (2) of this section, the Contractor shall within five (5) days thereafter substitute another bond and surety, both of which shall be acceptable to the City.
- 2.24. Retention:** The Owner will deduct money from the partial payments in amounts considered necessary to protect the interest of the Owner and will retain this money until after completion of the entire Contract. The amount to be retained from partial payments will be five (5) percent of the value of the completed Work, and not greater than five (5) percent of the amount of the Contract. When the retainage has reached five (5) percent of the amount of

the Contract no further retainage will be made and this amount will be retained until such time as final payment is made.

- 2.25. Liquidated Damages for Failure to Enter Into Contract:** Should the Successful Bidder fail or refuse to enter into the Contract within ten Calendar Days from the issuance of the Notice of Award, the City shall be entitled to collect the amount of such Bidder's Bid Guaranty as Liquidated Damages, not as a penalty but in consideration of the mutual release by the City and the Successful Bidder of all claims arising from the City's issuance of the Notice of Award and the Successful Bidder's failure to enter into the Contract and the costs to award the Contract to any other Bidder, to readvertise, or otherwise dispose of the Work as the City may determine best serves its interest.
- 2.26. Delay Damages for Failure to Meet Project Completion Schedule:** If the Contractor does not achieve Final Completion by the required date, whether by neglect, refusal or any other reason, the Parties agree and stipulate that the Contractor shall pay liquidated damages to the City for each such day that final completion is late. As provided elsewhere, this provision does not apply for delays caused by the City. The date for Final Completion may be extended in writing by the Owner.

The Contractor agrees that as a part of the consideration for the City's awarding of this Contract liquidated damages in the daily amount of **\$500.00** is reasonable and necessary to pay for the actual damages resulting from such delay. The parties agree that the real costs and injury to the City for such delay include hard to quantify items such as: additional engineering, inspection and oversight by the City and its agents; additional Contract administration; inability to apply the efforts of those employees to the other Work of the City; perceived inefficiency of the City; citizens having to deal with the construction and the Work, rather than having the benefit of completed Work, on time; inconvenience to the public; loss of reputation and community standing for the City during times when such things are very important and very difficult to maintain.

In addition, the City may withhold all, or any part of, such liquidated damages from any payment otherwise due the Contractor.

Liquidated damages as provided do not include any sums to reimburse the City for extra costs which the City may become obligated to pay on other Contracts which were delayed or extended because of the Contractor's failure to complete the Work within the Contract Time. Should the City incur additional costs because of delays or extensions to other Contracts resulting from the Contractor's failure of timely performance, the Contractor agrees to pay these costs that the City incurs because of the Contractor's delay, and these payments are separate from and in addition to any liquidated damages.

The Contractor agrees that the City may use its own forces or hire other parties to obtain Final Completion of the Work if the time of completion has elapsed and the Contractor is not diligently pursuing completion. These sites were chosen based on fuel load, proximity to homes, businesses, critical infrastructure, habitat, and intersections with other City department priorities. (See individual location descriptions for more detailed information)

Environmental Considerations:

- Most project areas fall in the endangered, yellow-billed cuckoo habitat, and to protect the species, removal work may only be completed outside of the nesting season (May 15-September 15). Additionally, phased removal will be done over the course of the year to preserve the species.

- Large pieces of green waste shall not be left in a way that will allow them to enter or obstruct waterways with consideration given to high-water marks. Every effort will be made to prevent smaller pieces of green waste from entering the waterway during high-water.
- Preserving native species and habitat in ways that reduce wildfire risk are important to all project areas.

Green Waste Disposal Guidelines

- All treated material, slash, and chips will be kept at least 10 feet back from the edge of the river or canal.
- **When chipping or masticating:** thoroughly chip all treated material and slash on site. Distribute chip material across the unit. The desired average chip depth is 2 inches or less. Chip depth should not exceed 4 inches.

Vegetation Guidelines for all project areas:

- The terms project area and unit are used interchangeably.
- **Prioritize cutting tamarisk and Russian Olive, dead, and down.** Remove all stems of Russian olive, Siberian elm, and tamarisk under 12 inches in diameter.
 - **Leave all healthy cottonwood stems of any size.**
 - **For unhealthy cottonwood stems** that have significant branch dieback or serious trunk wounds, only remove them if they pose a risk to infrastructure or human safety. Contact the Project Manager for assistance if needed.
 - **For Russian olive and Tamarisk**
 - Leave trees should be the larger diameter trees on the landscape creating a mosaic thinning.
 - Remove any shrubs growing beneath leave trees within 3-5 feet.
 - **Remove all shrubs/ladder fuels (native and non-native) growing directly beneath tree crowns for leave-trees and cottonwood galleries.**
 - If being used, only herbicide treat non-native stumps.
 - See below for shrub-dominated portions of the unit.
 - **Non-native trees over 12 inches in diameter will need to be left, but cottonwood trees are the preferred species.**
 - Do not remove more than 80% of the total tree canopy in the unit (includes all tree species).
 - Select leave-trees based on health of the tree and spacing between other leave-trees.
- Other consideration when determining leave trees include: minimal wounds or basal damage, healthy canopy, good root system that has not been exposed by wind or water.
- Canopy separation does not need to be a consideration in determining leave trees however, the mature leave trees should not be clumped together in one area on the unit.
- If a large tree poses a threat to infrastructure or human safety, it should be removed.
- If the crew is unable to remove a hazard tree, inform the Project Manager.

Herbicide Application (may be completed by City of Grand Junction)

- Use cut-stump treatment with Imazapyr or Garlon with the aquatic label (Garlon 3A) or a comparable aquatic herbicide with the active chemical called Triclopyr.
- The contractor must get any herbicide other than Imazapyr or Garlon 3A approved by the Project Manager prior to commencing work.
- Must be applied to cut stump as soon as possible, within 10 minutes.
- Do not apply to native shrub stumps.

Erosion Guidelines and Considerations

- **Important that the project does not negatively impact erosion or slope degradation.** Trees and shrubs within 10' of banks or on slopes greater than 15% are to be left in place.
- Tree trunks larger than 8 inches in diameter (regardless of species) and longer than 5 feet may be left on site and used for erosion control in areas with slopes.
 - All side limbs should be removed off the trunk by the contractor before being placed on the landscape.
 - Should be placed in a way that is stable and doesn't inhibit wildlife or human access to the area.

Green Waste Disposal Guidelines

- All treated material, slash, and chips will be kept at least 10 feet back from the edge of the river or canal.
- **When chipping or masticating:** thoroughly chip all treated material and slash on site. Distribute chip material across the unit. The desired average chip depth is 2 inches or less.
- **When piling:** specific pile guidelines for each site will be given to the crews before beginning work in a project area.

Hazards and situational awareness

- Every effort will be made by local law enforcement to remove hazardous materials from unhoused persons prior to crew arrival.
- **A spotter should be available for the contractor to ensure safety when removing trees and scattering green waste.**
- **If unhoused persons are encountered during the project, the contractor shall call non-emergent dispatch at 970-242-6707.**
- There are multiple natural and human-caused hazards in the project units. They include power lines, ditches, miscellaneous debris like old fences, concrete, rebar, and materials from unhoused persons. Crews need to be aware at all times and report any safety concerns or hazard mitigation needs to the Project Manager.
- When and where appropriate, signs will be posted nearby to inform visitors of the project by Grand Junction or the Project Manager.
- Contractor must also post work-in-progress signs.
- Contractor staff will need to have situational awareness at all times.
- If the public approaches the project area at any time, all equipment needs to be shut down or put into idle mode until they are clear.
- Any public inquiries to the project should be directed to the Project Manager.
