- 4.3. Background:** As the geographical center of Grand Junction's original square mile, 7th Street is a significant corridor for north/south travel for pedestrian, bicycle, transit, and personal vehicle traffic and is classified as a Minor Arterial throughout most of the Study Area. As one of few corridors which allows crossing of railroad tracks adjacent to downtown, 7th Street is the most popular corridor for accessing recreation, entertainment, and east/west travel upon the Riverfront Trail at Las Colonias. North of I-70B, 7th Street borders the heart of the walkable Downtown District on Main Street and Colorado Avenue. North of Grand Avenue, some of Grand Junction's most grand homes and historical trees can be found on the 7th Street Historical District. Crossing US Highway 6 at North Avenue,

7th Street separates Colorado Mesa University, Hotel Maverick, and the Eureka Science Center from Grand Junction High School and the Art Center. With substantial dining and retail shopping within 3 blocks of 7th Street along North Avenue, this is a busy pedestrian area during school months. North of Orchard Avenue, 7th Street runs adjacent to Tope Elementary School, St. Mary’s Hospital and numerous other healthcare offices and clinics, as well as retail shopping. After crossing Patterson to the north, 7th Street changes name to be 26 ½ Road and takes on a more residential nature, providing access to senior living facilities and Horizon Drive. Grand Valley Transit serves 7th Street with Route 3 between South Avenue and Orchard Avenue and Route 7 between North Avenue and Patterson Road.

The cross-section and width of the 7th Street Right-of-Way (ROW) varies across this 2-¾-mile section:

Segment length	Southern extent	Northern extent	Pedestrian facility	Cycle facility	Median	Parking	Typ. ROW
0.4-mile 2/3-lane section, 10'-16' lanes typ.	South of Struthers Avenue	Glenwood Springs Subdivision (Union Pacific railway line at D Road alignment)	Attached walk, 8' typ. Crossing distance up to 97', no refuge.	Striped curb lane, 4'+ typical. No intersection treatments.	N/A	Intermittent private parking access. Street parking limited to 3 <sup>rd</sup> to 4 <sup>th</sup> Avenues.	60'-95'
0.6-mile 2/3-lane section, 9.5'-11' lanes typ.	Glenwood Springs Sub.	South of Grand Avenue	Detached walk, 8' typ. Crossing distance up to 65', full refuge.	Striped lane in door zone, 4'+ typical. No intersection treatments.	Intermittent landscaped median, esp. north of I-70B at Ute Avenue.	Intermittent curb-adjacent angled or parallel street parking.	100'
0.3-mile 4-lane section, 9.5'-10.5' lanes typ.	South of Grand Avenue	South of Teller Avenue	Detached walk, 5' typ. Crossing distance up to 68', partial refuge.	N/A	Landscaped median limits cross access to full intersections only.	N/A	100'
1.4-mile 5-lane section, 9.5'-12' lanes typ.	South of Teller Avenue	North of Horizon Drive	Alternating attached/detached walk, 5' typ. Crossing distance up to 122', full refuge.	N/A	N/A	Frequent private parking access.	100'-110'

- a) Struthers Avenue to Glenwood Springs Subdivision (Union Pacific railway line at D Road alignment) (0.4-mile): sparsely landscaped 2/3-lane section with striped bike lanes, attached sidewalks, and intermittent private parking access conflicts in a ROW width of 60'-94' typ.
- b) Glenwood Springs Subdivision to Grand Avenue (0.6-mile): tree-lined 2/3-lane section with striped bike lanes, detached sidewalks, and on-street parking in a ROW width of 100' typ. including intermittent landscaped median and refuge islands and one roundabout at Main Street

- c) Grand Avenue to Teller Avenue (0.3-mile): tree-lined 4-lane section with detached sidewalks, and no private access conflicts and crossing restricted to intersections in a ROW width of 100' typ. including landscaped median.
- d) Teller Avenue to Horizon Drive (1.4-mile): alternating attached/detached sidewalks and frequent private access conflicts in a ROW width of 100'-110' typ.

Due to the unique characteristics outlined above and proximity to many key destinations, 7<sup>th</sup> Street earns a "High Priority" designation for both Pedestrian retrofit/missing sidewalks and for bicycle treatments from the recently adopted Pedestrian and Bicycle Plan.

- 4.4. Study Participants:** Staff from the City of Grand Junction will lead the project. A project Steering Committee will provide additional guidance and input during the process. Anticipated members of the Steering Committee include representatives from Grand Junction Historic Preservation Board, Grand Junction Urban Trails Committee, Grand Junction Forestry Board, Colorado Mesa University, School District 51, Colorado Department of Transportation, Grand Valley Regional Transportation Planning Office (RTPO), Grand Valley Transit, St. Mary's Hospital, The Art Center of Western Colorado and residents or business/property owners impacted by proposed changes.
- 4.5. Study Tasks:** The below scope of services is required for the 7th Street Active Transportation Facility Feasibility Study. Any documents produced for public or Steering Committee consumption must be ADA-compliant to comply with Colorado State law.
  - 4.5.1. Study Coordination:** Conduct a minimum of three Steering Committee meetings, including the kickoff meeting, over the course of the project. Additional meetings/interviews with relevant individuals or organizations may be necessary.
  - 4.5.2. Existing Conditions & No-build Analysis:** The selected Consultant will need to prepare an analysis of existing conditions:
    - 4.5.2.1.** Inventory available data (e.g., Origins & Destinations, pedestrian/bicycle/automobile traffic volumes and forecasts, turn movements, crash rates, parking availability and utilization, transit boardings/alightings, passenger and commercial loading activity, etc.) and identify gaps in information, if any.
    - 4.5.2.2.** Collect data where desired but currently unavailable or outdated.
    - 4.5.2.3.** Analyze existing conditions to produce multi-modal Levels of Service/Levels of Stress for all street segments and intersections in the Study Area.
    - 4.5.2.4.** Using reasonably expected growth and planned projects, forecast future multi-modal traffic conditions in the Study Area based on the data collected in Task 4.5.2. The Grand Valley RTPO maintains a regional vehicular travel model with a current horizon year of 2045 and can provide regional-level vehicular travel model output to inform the forecasting process.
    - 4.5.2.5.** Provide Existing Conditions & No-build Analysis Report to the Steering Committee for review and comment.

After completing this task, the Consultant will conduct the first of two Public Meetings to solicit input on observations, issues, and needs related to multi-modal circulation, parking demand and needs, and traffic circulation in the Study Area. Feedback received from this meeting shall be incorporated into next steps.

**4.5.3. Feasibility Assessment:** The Consultant shall identify no more than 4 alternative street cross-sections for each of the corridor segments identified in section 4.3., comprising a connected corridor between the Riverfront Trail at Las Colonias and Shared Use Paths at Horizon Drive and 26 ½ Road. The alternatives may combine aspects of the following approaches:

- a) Reallocating existing portions of the roadway (i.e., Road diet).
- b) Repurposing non-roadway portions of the Right-of-Way (i.e., new or expanded facilities).
- c) Acquisition of additional Right-of-Way.
- d) Utilization of nearby/parallel corridors.

The Assessment shall include details on recommended cross-sections, transitions, and intersection treatments, with clear recommendations of which elements may fit into one, some, or all of the approaches (a)-(d) listed above. Taken together, these will comprise distinct recommendations for a connected corridor. Key metrics shall be reported for each recommended alternative. These include:

- 4.5.3.1.** Level of Stress. As defined in the 2023 Pedestrian and Bicycle Plan (see Appendix 1), the Pedestrian and Bicycle Levels of Stress may be reported by “peak” stress (highest level of stress reached along the corridor) and/or “average” stress (level of stress averaged across the length of the corridor).
- 4.5.3.2.** Impact to existing street trees and landscaping. The 2023 Forestry Management Plan (see Appendix 2) identifies opportunities to improve the sustainable tree cover in the City. Trees and landscaping add complexity but also safety and comfort for sidewalk or cycle-lane users.
- 4.5.3.3.** Impact to vehicular flow. Impact to vehicular flow may be reported as the difference between Level of Service under the proposed alternative and under the no-build condition.

Secondary metrics are also of important consideration and shall be reported:

- 4.5.3.4.** Directness. Directness (versus out-of-path) travel.
- 4.5.3.5.** Inter-modal conflict. The total length of conflicts including features such as driveways, alleys, turn-lanes and cross streets, which may be dimensionalized by frequency and relative risk of conflict.
- 4.5.3.6.** Impact to on-street parking. The net change in number of on-street parking stalls for each block and/or for the corridor overall.
- 4.5.3.7.** Impact to private and local access. From a safety, comfort, and flow perspective, alley, local, and private access onto arterials should be limited

to the greatest extent possible. However, maintaining established access is valued by landowners. Especially for portions of the corridor along an arterial (i.e., 7<sup>th</sup> Street from Pitkin Avenue to Patterson Road and 26 ½ Road from Patterson Road to Horizon Drive), it may be appropriate to consider limiting alley, local, and private access when alternate accesses exist or can be established. Modal filters, raised crosswalks, Right-in/Right-outs or other traffic calming measures (i.e., infrastructure) may be considered as well, when full closures are not feasible.

**4.5.3.8.** Cost. While exact implementation costs are not expected as a part of this assessment, representative cost estimates may be founded on the magnitude of changes to the streetscape.

**4.5.3.9.** Benefit. While benefits can be challenging to quantify, readily available tools from the US Department of Transportation may be used to monetize benefits such as prolonged life, modal choice, congestion reduction, etc. Economic impact may also be possible to estimate from review of similar projects implemented in peer cities. This metric should be discussed in the proposal and identified if it is within reasonable scope of the project to use relevant studies to estimate potential economic impacts.

**4.5.4. Produce Final Report:** Viable alternatives identified in the Feasibility Study shall be reviewed in the second public meeting. Input shall inform and be incorporated into a draft Feasibility Report to be reviewed by the Steering Committee. The input received from the Steering Committee shall inform, and be incorporated via appropriate revision into, a Final Report, which shall recommend a preferred alternative for each segment and specific recommendations for transitions. The Consultant shall prepare an Executive Summary of the Final Report.

**4.5.4.1.** Present viable alternatives during a public meeting; seek public input.

**4.5.4.2.** Based on comments received during the public meeting, prepare a Draft Feasibility Report for review and comment by the Steering Committee, seek input and incorporate revisions.

**4.5.4.3.** Based on comments received from the Steering Committee, produce a Final Report and Executive Summary.

**4.5.4.4.** Present the Final Report to the City of Grand Junction Urban Trails Committee for review and recommendation and then to City Council. Proposer may also be asked to present to the Grand Valley RTPO. Presentation to City Council is preferred to occur in person while other presentations may be conducted virtually.

**4.6. Products:** The following documents, data, and other information represent the primary deliverables expected to be produced over the course of the 7th Street Active Transportation Corridor feasibility study:

- 4.6.1. Final Report documenting project process, findings, alternatives, recommendations, and metrics listed in 4.5.4. (ADA-compliant \*pdf only);
  - 4.6.2. Executive Summary, in English and Spanish, suitable for policymakers (ADA-compliant \*pdf only);
  - 4.6.3. Electronic files created for the project including all data, documents, presentations, Synchro runs, SimTraffic files, etc. (USB drive); and
  - 4.6.4. Minutes and/or summaries of all Steering Committee and public meetings
- 4.7. **Oversight Activities:** The Consultant’s activities will be coordinated by a principal of the company, or its designee, who will be responsible for coordination with the Project Manager. When required by the City, the principal for Consultant shall attend project review meetings, provide oversight of project activities, provide status reports of activities, and schedule updates.
- 4.8. **Special Conditions & Provisions:**
