

ADDENDUM 4

Date: February 6, 2024
From: City of Grand Junction Purchasing Division
To: All Offerors
RE: Electric Vehicle Carshare Feasibility and Readiness Study, RFP-5367-24-KF

Offerors responding to the above-referenced solicitation are hereby instructed requirements have been clarified, modified, superseded, and supplemented as to this date as hereinafter described.

Please make note of the following clarifications:

1. **Q:** Section 4.2.2 clearly identifies the Phase II deliverables and I'm clear on what they entail; however, later on in Section 5.B.II, the following is mentioned as a qualification under Phase II: "Assessing potential EV-ready locations and creating siting proposals in conjunction with EV charging stakeholders."

Does this mean an assessment of EV-ready locations will also be part of the Phase II deliverables described in 4.2.2 (the Readiness Report and associated analysis), or is that just a qualification Grand Junction is seeking for firms to possess in general?

A: Vehicle siting will be a critical component influencing the Benefit, Utilization, and Cost of a potential EV Carshare program. Any missing infrastructure or access required to facilitate EV charging at recommended sites (and potential opportunities/plans to rectify/improve) will be expected to be named and taken into account in the Technical Readiness Report. While negotiation with property owners may not be in scope for this project, having experience with that concept may demonstrate a Firm's qualifications.

The original solicitation for the project noted above is amended as noted.

All other conditions of the subject remain the same.

Respectfully,

Kathleen Franklin, Senior Buyer
City of Grand Junction, Colorado
