Other Business

1. Cybersecurity Training

2. Discussion Regarding 2024 Revisions to the Zoning & Development Code

Adjournment

Grand Junction Planning Commission

Workshop Session

Item #1.

Meeting Date:	April 4, 2024
Presented By:	Paul Schultz, Information Technology Director
Department:	Community Development
Submitted By:	Niki Galehouse, Planning Supervisor

Information

SUBJECT:

Cybersecurity Training

RECOMMENDATION:

EXECUTIVE SUMMARY:

The City of Grand Junction has implemented two key cybersecurity measures for anyone accessing its network: **mandatory cybersecurity training** and the use of **Okta Multi-Factor Authentication (MFA).** This agenda item will provide an overview of these measures and set the Planning Commissioners up with access to the Okta system.

BACKGROUND OR DETAILED INFORMATION:

The City of Grand Junction has implemented two key cybersecurity measures for anyone accessing its network: **mandatory cybersecurity training** and the use of **Okta Multi-Factor Authentication (MFA).**

What?

•   **Cybersecurity Training:** This is required training for all users of the city's network. Its purpose is to educate on the basics of cyber safety, such as recognizing phishing

emails, creating strong passwords, and understanding the importance of regular software updates. It's very brief, designed to be approachable, and requires no prior technical knowledge.
•   **Okta MFA:** This is an additional security step required when logging into the city's systems and services. Okta MFA requires users to verify their identity in two ways – for example, by entering a password and then confirming a prompt on their phone. This makes it much harder for unauthorized users to gain access.

Why?

•   **Protect Sensitive Information:** The city's network contains sensitive information that, if compromised, could harm individuals and the city's operations. Training and MFA are effective at reducing the risk of cyber attacks.
•   **Compliance and Best Practices:** These measures also help the city comply with regulations and align with best practices for cybersecurity, ensuring a safer digital environment for everyone.
•   **Everyone's Responsibility:** Cybersecurity requires the vigilance of every user. These steps empower all users to contribute to the city's digital security.

By adopting these measures, the City of Grand Junction aims to create a culture of cybersecurity awareness and reduce the risk of cyber threats, ensuring the safety and integrity of its digital resources.

Information

SUBJECT:

Discussion Regarding 2024 Revisions to the Zoning & Development Code

RECOMMENDATION:

EXECUTIVE SUMMARY:

Discussion Regarding 2024 Revisions to the Zoning & Development Code

BACKGROUND OR DETAILED INFORMATION:

In preparing the Zoning & Development Code (ZDC) update for adoption, as well as in initial training with staff and meetings with applicants on implementation of the new code, staff identified some items that were amended which inadvertently conflict with standard practice or could use additional clarification. Staff is committed to ensuring that these items are handled diligently to minimize disruption to the development workflow as the new code is implemented.

This discussion item will present some of the challenges that have arisen with the combination of the Residential Office (R-O) and Neighborhood Business (B-1) zone districts into the Mixed-Use Neighborhood (MU-1) zone district and begin to explore potential solutions. These challenges are related to signage, square footage of retail

sales and service uses, and minimum density requirements for residential development.
