Equipment Information:

- **Serial Number:** 2R6090
- **Manufactured:** 06/02/2010
- **Model:** 2R63LH

1. **Q:** Can the City provide pictures of the eject chamber floor behind the bale?

A: Yes. Please see the images attached to this addendum.

2. **Q:** How often are the pads changed?

A: Approximately once every 12 to 18 months.

3. **Q:** Do you feel the oil heater works properly?

A: Yes, the oil heater is functional. We typically operate it during the colder months—generally from October through March or April—when ambient temperatures require it.

4. **Q:** Is the City looking for a complete overhaul rather than just conveyor-related repairs?

A: Yes, the City intends this solicitation to support a **comprehensive overhaul** of the Excel 2R63 Two-Ram Baler, not limited to the conveyor or individual wear items. The goal is to restore the unit to full operational condition through the replacement of all listed components and necessary repairs to critical systems

5. **Q:** Is there anything not obvious or listed in the Scope that may also require attention?

A: Not to our knowledge. No additional needs have been identified at this time.

6. **Q:** Does the City have a wire tie technician perform annual service or inspections?

A: The City has purchased a wear kit and will replace wire tie system parts as they wear or become clogged. No scheduled annual inspection by a technician is currently in place.

7. **Q:** Can we schedule an additional site visit to inspect the baler?

A: Yes. Additional site visits may be scheduled by contacting the designated Purchasing Agent. All such visits must occur Monday through Friday at 2:00 p.m. and will be open to all interested proposers

8. **Q:** Have you experienced any conveyor problems?

A: No.

Reminders:

- This Addendum modifies the original solicitation. All other terms and conditions remain unchanged.
- **Acknowledgment of this addendum is required** on the Solicitation Response Form (Section 7.0).
