

Purchasing Division

ADDENDUM NO. 1

DATE: January 20, 2026
FROM: City of Grand Junction Purchasing Division
TO: All Offerors
RE: Crosby Avenue Improvements Project IFB-5805-26-DD

Offerors responding to the above referenced solicitation are hereby instructed that the requirements have been clarified, modified, superseded, and supplemented as to this date as hereinafter described.

Please make note of the following questions/answers/clarifications:

1. Question: The plan set's cross section sheet state "For information only and to see the staking plan for grades". The contours on the staking plan are not labeled. Can we get more information or electronic files with this information?

Answer: The contour labels will be added to the plan sheets. Electronic files will be made available to the low bidder.

2. Question: There is a line item for muck excavation, and I just want to clarify that the item is for the sediment removal in the storm drainpipe only as suggested in section 3.1 of the RFP. As follow up to that question, what happens if we run into muck excavation during trench work or road installation, would that item be utilized for that as well?

Answer: The Muck Excavation pay item is only for saturated sediment removed from the storm drain pipe. Soils with a higher moisture content (not saturated) are expected to be encountered between Grand Ave. and the 340 Overpass. The excavation and removal of this soil will be paid for as Unclassified Excavation (Complete in Place).

The original solicitation for the project noted above is amended as noted. All other conditions of the subject remain the same.

Respectfully,

A handwritten signature in blue ink that appears to read "Dolly Daniels".
