21. General architectural description: This is a simple rectangular wood frame house. The main ridge runs east/west and the principal façade faces south. The roof has a minimal overhang on the gable ends with a larger overhang on the principal façade. The overhang is made larger by a small area of extended roof that spans the entry and principal window. The entry door is generally centered on the façade with a picture window to the right. The picture window is flanked by a double hung on each side. A single car garage door is located on the remainder of the wall to the east. A single double hung is centered on the west side of the façade between the entry and a pair of double hungs on the west end. A brick chimney sits on the front roof slope to the west of the garage. The gable ends are infilled with horizontal siding and two double hung windows are located on the west side, near the center.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: The house sits on a corner lot. Shrubs are located to each side of the façade and a large street tree sits on the corner.
24. Associated buildings, features, or objects: A detached garage is located at the rear of the building.

39. Area(s) of significance: Architecture, Community Development and Planning

40. Period of significance: 1951; 1943 to 1957 Uranium Boom

41. Level of significance: National State Local

42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass produced on previously undeveloped tracts of land at the periphery of earlier
