21. General architectural description: This is a simple wood frame house with a moderately pitched hipped roof. The ridge runs east/west and the principal façade faces north. The main entry is located on the east side of the main façade with a large picture window, flanked by double hungs, to the right. A hipped roof extends off the main roof form, creating a porch area on the left side of the façade. The porch roof is supported by decorative wood screens on either side and a single post off center to the left. The screens are a symmetrical composition of ellis and squares. To the right of the porch on the main wall is a horizontally proportioned window of glass block. At the far right, a single double hung is located near the corner. The porch floor is concrete and a brick planter runs across the area to the right of the door. A single step leads to the porch and light metal rails run to the porch returning along either side. The double hungs have a single horizontal muntin in each sash.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: Several small shrubs front the house and a large evergreen sits on the southeast corner. A hedge runs along between the entry path and the driveway on the west. The yard is predominantly lawn with a large street tree at the edge.
24. Associated buildings, features, or objects: A light metal prefab carport is located on the west side.

**VI. Significance**

37. Local landmark designation: Yes  No  Date of designation: \_\_\_\_\_  
Designating authority: \_\_\_\_\_
38. Applicable National Register Criteria:  
 A. Associated with events that have made a significant contribution to the broad pattern of our history;  
 B. Associated with the lives of persons significant in our past;  
 C. Embodies the distinctive characteristics of a type, period, or method of construction, or represents the work of a master, or that possess high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction; or  
 D. Has yielded, or may be likely to yield, information important in history or prehistory.  
 Qualifies under Criteria Considerations A through G (see Manual)  
 Does not meet any of the above National Register criteria
39. Area(s) of significance: Architecture, Community Development and Planning
40. Period of significance: 1950; 1943 to 1957 Uranium Boom
41. Level of significance: National  State  Local
42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass

(page 4 of 4)

produced on previously undeveloped tracts of land at the periphery of earlier development. These groups of houses were typically based on one or two plan types with a limited number of roof and exterior finish variations, further reinforcing the characteristics of mass production. In this particular subdivision there are examples of both repetitive house types and more high style individualized houses. The curvilinear street layout is characteristic of national planning trends and is unusual in this community, where new development tended to extend the existing street grid.

43. Assessment of historic physical integrity related to significance: The house appears to be intact in original condition.

**VII. National Register Eligibility Assessment**

44. National Register eligibility field assessment:

Eligible  Not Eligible  Need Data

45. Is there National Register district potential? Yes  No

Discuss: The Bookcliff Park Subdivision lies on the periphery of the historic city center and was originally established by single group of investors. The sites were built out to accommodate the rapid growth associated with the Uranium Boom over a short period of time. The architectural styles present in the area represent a significant concentration and continuity of dwellings and a subtle transition of styles over the building period. Few intrusions have been made into the original neighborhood and it retains a high level of integrity.
