21. General architectural description: This is a simple horizontally proportioned wood frame house with a moderately pitched side gable roof. The ridge runs east/west and the principal façade faces south. The entry is located in a shallow recess off center to the left on the main façade. To the left of the recess, a set of three casement style windows is centered on the full height brick wall. To the right, a large picture window, divided into three over two panes by thin muntins, is centered on the remaining wall. The brick wall in this area extends only to the height of the large window's sill. The remaining wall is infilled with aluminum. The two top corner units of the main window are operable. A flat roofed carport is applied to the west side of the house. The carport roof is supported by wood posts on the west side. The spaces between the posts are infilled with a woven wood slat screen. A large gabled addition extends off the rear of the house.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: The house sits on a corner lot with a few trees and shrubs in addition to the street trees. The driveway runs along the west side, otherwise the yard is predominantly lawn.
24. Associated buildings, features, or objects: none

39. Area(s) of significance: Architecture, Community Development and Planning

40. Period of significance: 1955; 1943 to 1957 Uranium Boom

41. Level of significance: National State Local

42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass produced on previously undeveloped tracts of land at the periphery of earlier
