21. General architectural description: This is a large wood frame house comprised of a small hipped roof section and a large flat roofed section on the south and west. The hipped roof section's ridge runs northeast/southwest and the principal façade faces northwest. The principal façade has a large picture window, flanked by double hungs, set off center to the right. The main entry sits on the southwest corner under the main hipped roof, in a small recess. A pair of double hungs are located on the far left corner and this window pattern is repeated on the northeast façade. A long flat roofed addition extends the hipped roof eave line to the southwest and has a large window grouping on the far right corner. This section is sided with horizontal aluminum and the volume extends to the southeast with the two car garage on its end.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: The house sits on a corner lot and is set at a 45° angle to the corner. Several large trees and shrubs are located on the lot in addition to the street trees. The south street curves to the east and the driveway is located near the rear of the lot on the curve. A wood fence fronts the house with a planting bed, otherwise the yard is predominantly lawn.
24. Associated buildings, features, or objects: none

VI. Significance

37. Local landmark designation: Yes No Date of designation: _____
Designating authority: _____
38. Applicable National Register Criteria:
 A. Associated with events that have made a significant contribution to the broad pattern of our history;
 B. Associated with the lives of persons significant in our past;
 C. Embodies the distinctive characteristics of a type, period, or method of construction, or represents the work of a master, or that possess high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction; or
 D. Has yielded, or may be likely to yield, information important in history or prehistory.
 Qualifies under Criteria Considerations A through G (see Manual)
 Does not meet any of the above National Register criteria
39. Area(s) of significance: Architecture, Community Development and Planning
40. Period of significance: 1951; 1943 to 1957 Uranium Boom
41. Level of significance: National State Local
42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass

(page 4 of 4)

produced on previously undeveloped tracts of land at the periphery of earlier development. These groups of houses were typically based on one or two plan types with a limited number of roof and exterior finish variations, further reinforcing the characteristics of mass production.

43. Assessment of historic physical integrity related to significance: Alterations have affected original character defining features and altered the original scale of the building. Integrity has been seriously compromised.
