21. General architectural description: This is a horizontally proportioned wood frame house with a moderately pitched hipped roof. The ridge runs north/south and the principal façade faces east. The main entry is located in a shallow recess on the northeast corner of the main façade. A large picture window, flanked by double hungs, sits on the main wall plane adjacent to the recess, in a field of brick. The south end of the main façade has a double hung on the corner and another double hung centered on the wall between the corner unit and the picture window. The double hungs sits in a field of horizontal siding. The overhanging end of the hipped roof at the entry is supported by a decorative metal support, and the brick finish continues into the recess. A low brick wall separates the concrete porch area from the driveway on the north end. A low pitched shed roof extends off the north side creating a large carport. The roof is supported by four pipe columns along the north end. Several additions extend off the rear of the carport.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: Numerous shrubs and trees front the house and the driveway runs along the north side. Otherwise the yard is predominantly lawn.
24. Associated buildings, features, or objects: _____

39. Area(s) of significance: Architecture, Community Development and Planning

40. Period of significance: 1954; 1943 to 1957 Uranium Boom

41. Level of significance: National State Local

42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass produced on previously undeveloped tracts of land at the periphery of earlier
