21. General architectural description: The house is a simple rectangular masonry building with a side gable roof and yellow brick siding. The ridge runs east/west and the principal façade faces north. The roof has a deep overhang on the main façade. A single car garage door is located on the western end of the façade; the main entry is adjacent to the east of the garage. Further east is a large picture window with double hungs on each side. The remainder of the façade has a single double hung centered between the picture windows and a pair of double hungs on the eastern corner. A concrete landing fronts the entry. The gable ends are infilled with siding and the house is set on a concrete base with occasional small basement windows.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: The lawn surrounds the building with a street tree, two evergreens at the house corners and a driveway. There are trimmed evergreens in front of the façade and a planter below the picture window.
24. Associated buildings, features, or objects: Small shed sits on the rear of the lot.

39. Area(s) of significance: Architecture, Community Development and Planning

40. Period of significance: 1951; 1943 to 1957 Uranium Boom

41. Level of significance: National State Local

42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass

(page 4 of 4)

produced on previously undeveloped tracts of land at the periphery of earlier development. These groups of houses were typically based on one or two plan types with a limited number of roof and exterior finish variations, further reinforcing the characteristics of mass production.

43. Assessment of historic physical integrity related to significance: The house is intact in its original form.
