21. General architectural description: This is a simple brick house with a low pitched gable roof. The side wing is the longer of the cross gable wings and the ridge runs north/south. The side wing has the main entry and it faces east. The front gable extends off the side wing on the south end and has a pair of double hung windows centered on the end wall. The entry door sits on the main wall off center to the left. A fixed window with a double hung on the right sits at the inside corner of the ell, adjacent to the door. To the right of the door is a large picture window, flanked by narrow vertical double hungs. The same window is located on the north side of the side wing. The roof has moderate overhangs on all sides and the gable ends are infilled with horizontal siding. A series of concrete steps access the concrete landing in front and to the left of the door, a thin metal rail runs along the landing edge and steps. The house sits on a concrete foundation with several basement windows at the perimeter.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: A large street tree sits on the front of the lot and some trees and shrubs are located at the perimeter of the house. The driveway is on the north side and the remainder of the yard is lawn.
24. Associated buildings, features, or objects: A free standing carport is located on the north side, just behind the house.

37. Local landmark designation: Yes No Date of designation: _____
Designating authority: _____
38. Applicable National Register Criteria:
 A. Associated with events that have made a significant contribution to the broad pattern of our history;
 B. Associated with the lives of persons significant in our past;
 C. Embodies the distinctive characteristics of a type, period, or method of construction, or represents the work of a master, or that possess high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction; or
 D. Has yielded, or may be likely to yield, information important in history or prehistory.
 Qualifies under Criteria Considerations A through G (see Manual)
 Does not meet any of the above National Register criteria
39. Area(s) of significance: Architecture, Community Development and Planning
40. Period of significance: 1952; 1943 to 1957 Uranium Boom
41. Level of significance: National State Local
42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass produced on previously undeveloped tracts of land at the periphery of earlier

development. These groups of houses were typically based on one or two plan types with a limited number of roof and exterior finish variations, further reinforcing the characteristics of mass production. In this particular subdivision there are examples of both repetitive house types and more high style individualized houses. The curvilinear street layout is characteristic of national planning trends and is unusual in this community, where new development tended to extend the existing street grid.

43. Assessment of historic physical integrity related to significance: The house appears intact in original condition.

VII. National Register Eligibility Assessment

44. National Register eligibility field assessment:

Eligible Not Eligible Need Data

45. Is there National Register district potential? Yes No

Discuss: The Bookcliff Park Subdivision lies on the periphery of the historic city center and was originally established by single group of investors. The sites were built out to accommodate the rapid growth associated with the Uranium Boom over a short period of time. The architectural styles present in the area represent a significant concentration and continuity of dwellings and a subtle transition of styles over the building period. Few intrusions have been made into the original neighborhood and it retains a high level of integrity.

If there is National Register district potential, is this building: Contributing
Noncontributing

46. If the building is in existing National Register district, is it: Contributing
Noncontributing
