# Architectural Inventory Form (page 2 of 4)

	21.	. General architectural descrip	ption: This is a simple rectangular wood frame house with		
		additions. The ridge runs north/south and the principal façade faces east. The roof has a			
		moderate overhang on all sides, and an extended overhang for a portion of the main			
		façade. The extension begins at the right of the entry door, which is off center to the right			
		on the main wall. The extension continues over the principal window to the south end of			
		the house. The wall under the extended overhang has a brick veneer surface. The			
		principal window has a large picture unit in the center and a vertically proportioned			
		casement unit on either side. A pair of double hungs are centered on the remaining wall			
		to the north. The south wall	has a pair of double hungs near the front and a low pitched		
		shed addition that extends be	eyond the rear wall of the house to the west. The house sits		
		on a concrete foundation with	h basement windows at the perimeter. A set of concrete		
		steps front the entry door.			
	22.	. Architectural style/building ty	ype: Ranch Type		
	23.	. Landscaping or special settir	ng features: A gravel parking area is located on the south		
		and a couple of street trees s	sit on the front, otherwise the yard is predominantly lawn.		
	24.	. Associated buildings, feature	es, or objects: <u>none</u>

## Architectural Inventory Form (page 3 of 4)

	35.	Historical background: Wesley K. Carhartt is shown as owner in the directories of 1955 through 1957. 1955 is the first instance of this address in the available directories.  This building is part of Bookcliff Park developed in 1946. The owners were Gertrude B.
		Smith, Claude D. Smith later the U. S. Bank of Grand Junction, and Thomas L. Brownson,
		Mabel L. Brownson, Bruce Brownson and Mary F. Brownson.
	36.	Sources of information: <u>Mesa County Assessors Office; Museum of Western Colorado</u>
		Archives; Polk Directories 1955, 1956, 1957
.//	C:	
VI.	•	gnificance
	37.	Local landmark designation: Yes No _X Date of designation:  Designating authority:
	38.	Applicable National Register Criteria:
		X A. Associated with events that have made a significant contribution to the broad pattern of our history;
		B. Associated with the lives of persons significant in our past;
		X C. Embodies the distinctive characteristics of a type, period, or method of
		construction, or represents the work of a master, or that possess high artistic
		values, or represents a significant and distinguishable entity whose components
		may lack individual distinction; or
		D. Has yielded, or may be likely to yield, information important in history or
		prehistory.
		Qualifies under Criteria Considerations A through G (see Manual)
	20	Does not meet any of the above National Register criteria
		Area(s) of significance: Architecture, Community Development and Planning Period of significance: 1952; 1943 to 1957 Uranium Boom
		Level of significance: National State Local_X_
		-
	42.	Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The
		discovery of significant sources of Uranium in the region initiated development in Grand
		Junction that supported both the mining of the materials and the administration of
		programs related to the development of weapons. The building types, materials and
		neighborhood layout are all indicative of the national trends which were driven by the
		proliferation of the automobile and the enormous demand for single family homes.
		House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was
		characterized by simple horizontally proportioned forms. Houses were typically mass
		produced on previously undeveloped tracts of land at the periphery of earlier

Temporary Resource Number:	2035.FOR

### Architectural Inventory Form (page 4 of 4)

development. These groups of houses were typically based on one or two plan types with a limited number of roof and exterior finish variations, further reinforcing the characteristics of mass production. In this particular subdivision there are examples of both repetitive house types and more high style individualized houses. The curvilinear street layout is characteristic of national planning trends and is unusual in this community, where new development tended to extend the existing street grid.

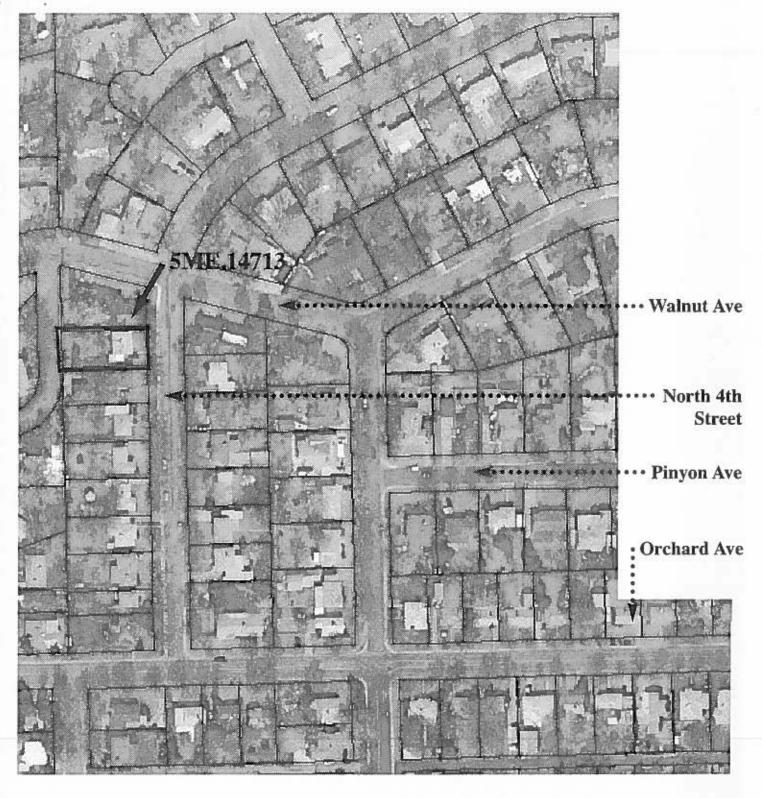

43. Assessment of historic physical integrity related to significance: Alterations have somewhat impacted the integrity of the house. The small addition to the side has a minor impact on the integrity and the siding alterations are consistent with the original character. The house continues to contribute to the character of the neighborhood.

VII.	National	Register	Eligibility	Assessment
------	----------	----------	-------------	------------

44. National Register eligibility field assessment:			
Eligible Not Eligible X Need Data			
45. Is there National Register district potential? Yes X No			
Discuss: The Bookcliff Park Subdivision lies on the periphery	of the historic city center		
and was originally established by single group of investors.	The sites were built out to		
accommodate the rapid growth associated with the Uranium	Boom over a short period of		
time. The architectural styles present in the area represent a	significant concentration		
and continuity of dwellings and a subtle transition of styles ov	ver the building period. Few		
intrusions have been made into the original neighborhood an	d it retains a high level of		
integrity.			
If there is National Register district potential, is this building:	Contributing X		
	Noncontributing		
46. If the building is in existing National Register district, is it:	Contributing		
	Noncontributing
