21. General architectural description: This is a modest wood frame rectangular house with the long side facing the street (south). The main façade has a veneer of brick on the wall below the main window sill which is applied to the front only. The entry door sits on the far eastern side of the main façade with an adjacent picture window flanked by a double hung on each side. Two horizontally proportioned slider windows are located on the remainder of the façade. Their sills are higher than the picture window and they are closer to the window and the far corner than to each other. The overhang on the sides is minimal with a simple ogee trim, and the overhang on the eaves is slightly larger to provide protection for the entry door. The house sits on a concrete foundation and has composition shingles on the surfaces without brick. There are no windows on the east side, and a long shed roof porch is attached to the rear.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: The house sits toward the front of the lot with a few shrubs but the yard is predominantly lawn.
24. Associated buildings, features, or objects: none

**VI. Significance**

37. Local landmark designation: Yes  No  Date of designation: \_\_\_\_\_  
Designating authority: \_\_\_\_\_

38. Applicable National Register Criteria:

- A. Associated with events that have made a significant contribution to the broad pattern of our history;
- B. Associated with the lives of persons significant in our past;
- C. Embodies the distinctive characteristics of a type, period, or method of construction, or represents the work of a master, or that possess high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction; or
- D. Has yielded, or may be likely to yield, information important in history or prehistory.
- Qualifies under Criteria Considerations A through G (see Manual)
- Does not meet any of the above National Register criteria

39. Area(s) of significance: Architecture, Community Development and Planning

40. Period of significance: 1954; 1943 to 1957 Uranium Boom

41. Level of significance: National  State  Local

42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass

(page 4 of 4)

produced on previously undeveloped tracts of land at the periphery of earlier development. These groups of houses were typically based on one or two plan types with a limited number of roof and exterior finish variations, further reinforcing the characteristics of mass production.

43. Assessment of historic physical integrity related to significance: The house is generally intact in its original form.
