21. General architectural description: This is a small stubby 'L' shaped masonry house with a low pitched hipped roof. The short ridge runs east/west and the principal façade faces north. The façade is divided into roughly two sections with the left section projecting forward. The projecting form has a slightly lower ridge, but shares the east roof plane with the main roof. The entry door is located to the right side of the projection and has three concrete steps leading to the door. To the left of the door, is a large picture window. On the main wall of the house, a single vertically proportioned double hung window is centered. A planting area infills the corner of the ell. A brick chimney is located toward the rear of the house. The roof has a small overhang and the eave runs around the house at one level.
22. Architectural style/building type: Ranch Type
23. Landscaping or special setting features: The house sits on a small lot with a number of trees and shrubs. Otherwise the area is predominantly lawn.
24. Associated buildings, features, or objects: A front gable wood frame garage is located at the rear of the site.

39. Area(s) of significance: Architecture, Community Development and Planning

40. Period of significance: 1948; 1943 to 1957 Uranium Boom

41. Level of significance: National State Local

42. Statement of significance: The development in this area is a direct result of the nation's involvement in WWII and the drive for the development of nuclear weapons. The discovery of significant sources of Uranium in the region initiated development in Grand Junction that supported both the mining of the materials and the administration of programs related to the development of weapons. The building types, materials and neighborhood layout are all indicative of the national trends which were driven by the proliferation of the automobile and the enormous demand for single family homes. House designs departed from the romantic and revival styles that were prevalent in the earlier part of the 20th century and took on a California inspired design that was characterized by simple horizontally proportioned forms. Houses were typically mass produced on previously undeveloped tracts of land at the periphery of earlier development. These groups of houses were typically based on one or two plan types with a limited number of roof and exterior finish variations, further reinforcing the characteristics of mass production.
