RE: City of Grand Junction/ Mesa County
Persigo Wastewater Treatment Plant

Dear Ms. Galligan,

Construction on the above referred project has been completed. Construction was completed according to approved construction plans and specifications and subsequent approved change orders. The plant has been operating satisfactorily for several months.

This letter is a request for you to schedule a final inspection so that the project and grant can be closed. My last day of employment with the City is April 5, 1985. If a final inspection can be scheduled by that date, it would be very helpful.

Thank you.

Sincerely,

A handwritten signature in cursive script that reads "James E. Patterson".
James E. Patterson
