Re: A - 95 # 75 - 02 - 10 - 14 / Grand Valley Area Sewerage System,
Mesa County

Dear Mr. Brown:

At the present time a Basin Water Quality Management Plan is being completed which includes Mesa County and the Grand Valley area. Also under preparation is a facilities (201) plan for the urban area of Grand Junction.

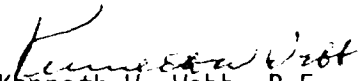

The application for H.U.D. funds as submitted is not specific enough for us to determine if the projects proposed are compatible with the above referenced plans. We need a more specific delineation of the projects proposed for H.U.D. funding.

If the funding is only for collection systems and a treatment facility for the communities of Mack and Loma we can endorse these projects as being compatible with the Basin Plan. However, the level of funding should be closely evaluated as the \$13,000,000 appears to be excessive for these two projects.

A conference is not necessary but we want more definitive information.

Very truly yours,

FOR DIRECTOR, WATER QUALITY CONTROL DIVISION

Kenneth W. Webb, P.E., Chief,
Water Quality Management Planning
Section
