SUBJECT Vacuum Filters - Persigo Wash Plant

DATE February 2 1978

I do not think that you or we are really interested, but I was contacted by Paul Barnell, 858-3661-31, Fruita, Colorado. He said Gary Rural Community Station has four-filtrate engineer filter, vacuum filter about 20 feet diameter, 25 feet long, located at Fruita, Colo., for sale, only slightly used.

Jim Patterson has some reservations about using vacuum filters in the new plant. We should discuss this with him before long.
