Re: Site Application No. 2470 for Activated Sludge Plant  
Mesa County

Gentlemen :

We are pleased to inform you that the Colorado Water Quality Control Commission approved your application at its meeting held on April 4, 1978. The following conditions are applicable:

This site approval will expire on April 4, 1979. If the construction of the project has not commenced by that date, you must reapply for a new site approval.

This approval does not relieve the owner from compliance with all county regulations prior to construction nor from responsibility for proper engineering, construction, and operation of the facility.

Very truly yours,

Roger H. Smades, P.E., Chief  
Field Services Section  
Water Quality Control Division
