Jim Patterson
City of Grand Junction
Engineering Department
Grand Junction, CO 81503

Dear Jim:

At the December 16, 1980 meeting, the Orchard Mesa Sanitation District discussed, in length, the service charges and the option of doing our own maintenance and flushing.

Effective January 1, 1981 the District would like to increase its service fee from \$7.25 to \$7.50 per month. The new rate per single family dwellings would be \$7.50 per E. Q. U. , the cities portion would be \$3.92, the District's portion would then be \$3.58. This is with the understanding that we would do our own maintenance and flushing, the city would still do our billing and computer time.

If Mac has any problems as to computing, other than single family dwellings or E. Q. U. one, I will be very happy to go over it with him. This would be effective January 1, 1981 and would be reflected in our February 1, 1981 billing.

If we find that doing our own maintenance presents a problem, do to improper man power etc., we would like to have the option of returning to the city for this service.

If I can be of any help in implementing the above, please call.

Sincerely,

Don Caraway
