The Honorable James M. Robb
House of Representatives
State Capitol Building
Denver, Colorado 80203

Dear Jim:

Thank you for your letter of February 10th., regarding the Grand Junction waste water treatment plant. I have had several conversations with Mayor Jane Quimby and Mr. Wysocki, the City Manager. The people from Grand Junction have had several meetings with Department of Health personnel and Mr. Ron Schuyler, who is the chief of the grant section of the Water Quality Division, will soon be going to Grand Junction to meet with the City Council and city officials on this matter.

There was a six to eight week delay in review of the plans because of the vacation and subsequent transfer from the grant section by the engineer who was responsible for this project. The chief engineer, Mr. Schuyler, is giving the matter his personal attention. There are some difficulties which still must be resolved. The project, you can rest assured, is getting an intense amount of scrutiny and attention at the present.

Sincerely yours,

Frank Traylor, M.D.
Executive Director
