Subject: As Built of Sewers Received by Engineering Department

I am asking you to direct the Engineering Department to make copies of all as built plans for water or sewer lines which the Water/Sewer Crews have to maintain and forward these as soon as they are available to the Water/Sewer Crew.

We have had some problems with not having these drawings at the working level. Consequently, part of the crews maintenance work is by guess rather than by mapping record. Also, we have had severe problems with the records as well as as built for Central Grand Valley Sewer District. At this time, I do not have all of the as built for district lines that are now in service. We do lack 29 as built of sub-divisions and have asked Central Grand Valley for these plans. However, as they come into Engineering, we do need them forwarded to the Water/Sewer Crews without delay.
