

COLORADO 7 MESA  
FIRST COLORADO R. E. A. PROJECT

## *Grand Valley Rural Power Lines, Inc.*

ELECTRIFYING RURAL HOMES  
Offices 2727 Grand Avenue  
Grand Junction, Colorado 81501

242-0040

December 21, 1982

Mr. James Patterson  
Director of Public Works & Utilities  
250 North 5th Street  
Grand Junction, CO 81501

Dear Mr. Patterson,

Grand Valley Rural Power Lines understands that your request for electric service to the Persigo Wash Waste Water Treatment Plant to include delivery voltage of 13.2 KV, three phase, four wires, from two sources, with automatic transfer of sources, via padmounted switchgear. We estimate the cost of meeting this request to be \$86,000.00.

Since this job will require special equipment that is not a normal stock item it will be necessary to negotiate a contract with you that addresses a payment schedule rather than our normal procedure of total dollars up front at time of "Release to Construction". This partial payment will facilitate the ordering of the above mentioned equipment so it will be available when construction begins, thus causing no delays to your project.

If you could contact Wayne Pinkerton in our office he can obtain from you the additional information necessary (such as, name, minimums, etc.) for the preparation of this contract.

We appreciate your assistance and await your reply.

Sincerely,  
GRAND VALLEY RURAL POWER LINES, INC.
