Frank A. Traylor, M.D.  
Executive Director

January 18, 1983

Mr. James E. Patterson, Jr.  
Director of Public Works and Utilities  
250 N. 5th Street  
Grand Junction, Colorado 81501

Re: City of Grand Junction, CDPS Permit No. CO-0026417, Mesa County,  
Federal Grant No. CO-80337-26-0

Dear Mr. Patterson:

In reviewing our records it has been noted that two items involved in your CDPS permit or grant have not been submitted.

A salinity report, containing information such as indicated in Section 3.10.4 IIB. of the "Regulations for Implementation of the Colorado River Salinity Standards through the NPDES Permits Program," was to be submitted by September 30, 1981, as stated on Page 2 of the above referenced permit. The Division has no record of this ever being received. It would appear that the city is not interested in being allowed to discharge above the 400 mg/l limit and would just as soon treat the effluent to below this limit. I would assume that this has been an oversight on your part and the data will be forthcoming. I suggest you contact us on this.

The second item deals with a grant condition which requires the city to submit service area data, with population projections, and executed service agreements between city and county. (These must be in effect.) This is to be done before the 50% payment milestone. Be advised that the data previously submitted does not satisfy this requirement. Its purpose is to assure the Division that the city has sufficiently planned for servicing the 201 area and that agreements between the city and county or any other entities exist and provide the ability to monitor and control the loading to the plant. We therefore advise you to be sure this item is taken care of by the time specified since it is a grant condition. This information will also be required when your new permit application is submitted.

Please contact me with any questions you may have.

Sincerely,

*Patricia A. Nelson*
