SUBJ: City/County Sewer System Issues

Presentations and discussions occurring September 23 and September 29 in the Public Works Group concerning the City/County sewer system elicited the identification of problems, issues and possible courses of action from members. As a result, you have been requested to assemble this information in a concise report that will be presented to the County Commissioners. Please remember the reason these discussions were undertaken. The Commissioners wish to understand the options that are available to:

- 1) avoid proliferation of special districts (sewer); and,
- 2) ensure the efficient and effective delivery of sewer service in the Persigo Wash facility's service entity.

In order to facilitate the production of this report, I am appointing Bennett Boeschstein as the chairperson of this sub-committee. The preliminary draft of the report is to be submitted to the Public Works Group at the October 20th meeting. The final report should be completed by November 4th and made available to the Public Works Group at the meeting on that date. Presentation to the Board of County Commissioners will be arranged for the following week.

I am confident that you will provide a professional insight into the critical situation.
