Re: NPDES Discharge Permits CO-0026417
 and CO-0040053; Industrial
 Pretreatment Program

Dear Mr. Patterson:

We have received the City of Grand Junction's May 8, 1984 submittal for approval of the City's Industrial Pretreatment Program. Unfortunately, the submission package did not contain a signed and attested copy of the ordinance upon which the Pretreatment Program description is based. On May 14, 1984, Mr. Marshall Fischer of my staff telephoned Mr. Pete Heye of HDR Engineers, the City's consultant, to advise him of the submission deficiency. Mr. Heye indicated that a signed and attested copy would be forwarded to this office. Upon receipt of a signed ordinance, this office will issue a public notice inviting comments on the adequacy of the Grand Junction Pretreatment Program. Such a public notice is required by 40 CFR 403.9. Concurrent with this public review, we will be conducting a comprehensive EPA analysis of the Program and its conformance with the regulations at 40 CFR 403.8.

If, after this review and public comment period, it is determined that the Grand Junction Pretreatment Program meets all applicable Pretreatment Program requirements, EPA and the City shall enter into a Memorandum of Agreement (MOA) formally approving the Program and outlining the basic responsibilities of the City under that approval. A copy of the proposed MOA is enclosed for your review. Approval of the Program will ultimately be incorporated as a requirement of the City's NPDES permits.

If you have any questions relative to this letter or the language of the MOA, please contact Mr. Fischer at telephone: 844-4901.

Sincerely yours,

William H. Dodson for
 Max H. Dodson
 Director
 Water Management Division
