

City of Grand Junction, Colorado 81501
250 North Fifth St.,

June 29, 1984

Mr. Jim Eisenhauer, Executive Director
Industrial Development, Inc.
P. O. Box 1330
Grand Junction, Colorado 81502

Dear Jim:

Enclosed are materials prepared by the City regarding available sanitary sewer services and facilities. This item was assigned to the City at our May 16th meeting in your office regarding the Bureau of Engraving & Printing (BEP).

The Summary page can be combined with materials being prepared by others to form an information brochure/packet for the BEP, as well as any other potential development candidates.

The bound materials provide more detailed information regarding the sanitary sewer system. Additional copies of this are available if you desire to keep them on hand for interested parties.

The materials on methylene chloride are what we could find quickly on the subject. Included are examples of how other jurisdictions handle treatment of this solvent. Treatment procedures would be based upon consultations between the City's public works department and BEP.

Let me know whether these materials satisfy our assignment. I shall be happy to assist further in this project if needed.

Sincerely,

Mark K. Achen
City Manager
