Mr. Duane Jensen, P.E.
Utilities Engineer
250 North Fifth Street
Grand Junction, Colorado 81501

Dear Mr. Jensen:

We have been talking with Mr. Sam Marquez of the Environmental Protection Agency concerning the City's request for reimbursement of Step II costs related to our contract. The outcome is that since no Step III application has been submitted, no formal review of our design work has been accomplished.

If the City wishes to construct the designed improvements, your Step III application should be sent and things will proceed. If the City does not wish to build the designed improvements at this time you will need to request that the State review our work for completeness under the terms of our contract and so certify to EPA so they can process your reimbursement.

The letter should be addressed to Mr. Ron Schuyler at State Health with a copy to Carl Heskett at EPA.

If you have any questions, please call.

Very truly yours,

NELSON, HALEY, PATTERSON and QUIRK, INC.

Gordon W. Bruchner
