if inventoried, list ID nos.
architectural description: Main Street between 3rd and 6th was transformed in the early 1960s. Main Street was converted into a two lane "S" curve for vehicle traffic, brick planters, metal benches, and 2 feet tightly "S" curved walls were constructed along with seating areas with mushroom shaped umbrellas.
architect: unknown source:
original owner: City of Grand Junction source:
builder/contractor: unknown source:
theme(s): Plateau Country/commercial
construction history: (description, names, dates, etc. relating to major additions or alterations to original structure)
historic background (discuss important persons and events associated with this structure) Grand Junction, with the help of government grants, embarked on a major project in the early 1960s in an attempt to offset the depreciation in business. It developed the Main Street Shopping Mall project in the early 1960s, one of the first of its kind in the country. The mall project installed large planters, trees, and flower boxes and widened the sidewalks. Low brick dividers and covered benches were also added, along with seating areas with mushroom shaped umbrellas.
significance: (check appropriate categories and briefly justify below)
architectural significance: represents the work of a master associated with significant persons

possesses high artistic values	associated with
	significant events
	or patterns
represents a type, period or	contributes to an
method of construction	historic district

statement of significance:

Non-contributing with qualifications: This mall is clearly a major event in the history of downtown and is of a distinctive architectural design character. However, it is still to soon to objectively evaluate its historic significance. This feature should be re-evaluated when it is 50 years old.
