

ADDENDUM NO. 1

DATE: May 6, 2016
FROM: City of Grand Junction Purchasing Division
TO: All Offerors
RE: Air Compressor IFB-4239-16-NJ

Offerors responding to the above referenced solicitation are hereby instructed that the requirements have been clarified, modified, superseded and supplemented as to this date as hereinafter described.

Please make note of the following clarifications:

1. **Question 1:** "The spec is calling for a 60 HP engine. On the new compressors with Tier 4 Final engines, the EPA requirements call for 49 HP or less for a 185 CFM machine. 60 HP was available for Tier 2 and Tier 3 but no longer for Tier 4. Also the spec is calling for 150 psi at 185 CFM. All of the manufacturers go up to 125 psi with a 185 machine. Usually 150 psi is for a machine with more than 200 CFM. Can you check with the end user if they want a 185 CFM compressor or a larger one and also regarding the Tier 4 horsepower?"

Response: A 49 Horse Power Tier 4 engine is acceptable. The compressor shall be 185 CFM minimum with a normal working pressure of 100 PSI minimum.

The original solicitation for the project noted above is amended as noted.

All other conditions of subject remain the same.

Respectfully,

A handwritten signature in blue ink that reads "Nicholas C. Jones".
