Summary (crime scenes activity, court appearances, complex cases, use of resources, problems or unusual events):

Testing of DigitalOnQ has begun this month. DigitalOnQ will be the network based video and image evidence management system that will move us away from the antiquated system of storing optical discs in filing cabinets and give officers instant access to digital evidence.

Jordan spent three weeks at the Federal Law Enforcement Training Center in Glynco, Georgia taking two forensic computer courses. Financing for the classes was made available through Forfeiture funds and Federal funds. This is a large step in cross-training the two Digital Forensic Analysts, the Audio/Video Technician and the PST assigned to the lab.
