

LETTER OF INTENT

Date: July 26, 2018

Company: Mountain Peak Controls, Inc.

Project: Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition System (SCADA) RFP-4525-18-DH

Based upon review of the bid responses received, and your interview/software demo for Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition System (SCADA) RFP-4525-18-DH, your firm has been selected as the preferred proposer. It is the intent of the City of Grand Junction to award the aforementioned project to your firm as is listed in the RFP documents and your proposal response.

The award for the overall project must be approved by City Manager prior to an official award and contract issued.

Feel free to contact me with any questions at 970-244-1545.

Thank you and Best Regards

A handwritten signature in black ink, appearing to read "Duane Hoff Jr.", written over a horizontal line.

Duane Hoff Jr., Senior Buyer

CITY OF GRAND JUNCTION, COLORADO

CONTRACT

This CONTRACT made and entered into this 17th day of August, 2018 by and between the **City of Grand Junction, Colorado**, a government entity in the County of Mesa, State of Colorado, hereinafter in the Contract Documents referred to as the "Owner" and **Mountain Peak Controls, Inc.** hereinafter in the Contract Documents referred to as the "Contractor."

WITNESSETH:

WHEREAS, the Owner advertised that sealed Responses would be received for furnishing all labor, tools, supplies, equipment, materials, and everything necessary and required for the Project described by the Contract Documents and known as **Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition Automation System (SCADA) RFP-4525-18-DH**.

WHEREAS, the Contract has been awarded to the above named Contractor by the Owner, and said Contractor is now ready, willing and able to perform the Work specified in accordance with the Contract Documents;

NOW, THEREFORE, in consideration of the compensation to be paid the Contractor, the mutual covenants hereinafter set forth and subject to the terms hereinafter stated, it is mutually covenanted and agreed as follows:

ARTICLE 1

Contract Documents: It is agreed by the parties hereto that the following list of instruments, drawings, and documents which are attached hereto, bound herewith, or incorporated herein by reference constitute and shall be referred to either as the "Contract Documents" or the "Contract", and all of said instruments, drawings, and documents taken together as a whole constitute the Contract between the parties hereto, and they are fully a part of this agreement as if they were set out verbatim and in full herein:

The order of contract document governance shall be as follows:

- a. The body of this contract agreement
- b. Solicitation Documents for the Project; **Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition Automation System (SCADA)**;

- c. Contractors Response to the Solicitation
- d. Work Change Requests (directing that changed work be performed);
- e. Field Orders
- f. Change Orders.

ARTICLE 2

Definitions: The clauses provided in the Solicitation apply to the terms used in the Contract and all the Contract Documents.

ARTICLE 3

Contract Work: The Contractor agrees to furnish all labor, tools, supplies, equipment, materials, and all that is necessary and required to complete the tasks associated with the Work described, set forth, shown, and included in the Contract Documents as indicated in the Solicitation Document.

ARTICLE 4

Contract Time and Liquidated Damages: Time is of the essence with respect to this Contract. The Contractor hereby agrees to commence Work under the Contract on or before the date specified in the Solicitation from the Owner, and to achieve Substantial Completion and Final Completion of the Work within the time or times specified in the Solicitation.

ARTICLE 5

Contract Price and Payment Procedures: The Contractor shall accept as full and complete compensation for the performance and completion of all of the Work specified in the Contract Documents, the sum of **Ninety Six Thousand Two Hundred Twenty and 00/100 Dollars (\$96,200.00)**. If this Contract contains unit price pay items, the Contract Price shall be adjusted in accordance with the actual quantities of items completed and accepted by the Owner at the unit prices quoted in the Solicitation Response. The amount of the Contract Price is and has heretofore been appropriated by the Grand Junction City Council for the use and benefit of this Project. The Contract Price shall not be modified except by Change Order or other written directive of the Owner. The Owner shall not issue a Change Order or other written directive which requires additional work to be performed, which work causes the aggregate amount payable under this Contract to exceed the amount appropriated for this Project, unless and until the Owner provides Contractor written assurance that lawful appropriations to cover the costs of the additional work have been made.

Unless otherwise provided in the Solicitation, monthly partial payments shall be made as the Work progresses. Applications for partial and Final Payment shall be prepared by the Contractor and approved by the Owner in accordance with the Solicitation.

ARTICLE 6

Contract Binding: The Owner and the Contractor each binds itself, its partners, successors, assigns and legal representatives to the other party hereto in respect to all covenants, agreements and obligations contained in the Contract Documents. The Contract Documents constitute the entire agreement between the Owner and Contractor and may only be altered, amended or repealed by a duly executed written instrument. Neither the Owner nor the Contractor shall, without the prior written consent of the other, assign or sublet in whole or in part its interest under any of the Contract Documents and specifically, the Contractor shall not assign any moneys due or to become due without the prior written consent of the Owner.

ARTICLE 7

Severability: If any part, portion or provision of the Contract shall be found or declared null, void or unenforceable for any reason whatsoever by any court of competent jurisdiction or any governmental agency having the authority thereover, only such part, portion or provision shall be effected thereby and all other parts, portions and provisions of the Contract shall remain in full force and effect.

IN WITNESS WHEREOF, City of Grand Junction, Colorado, has caused this Contract to be subscribed and sealed and attested in its behalf; and the Contractor has signed this Contract the day and the year first mentioned herein.

The Contract is executed in two counterparts.

RE: Professional SCADA Services Proposal -City of Grand Junction RFP -4525-18-DH

Dear Mr. Hoff & Selection Committee Members:

Mountain Peak Controls (MPC) is pleased to submit our proposal to provide professional Supervisory Control and Data Acquisition (SCADA) system solutions to the City of Grand Junction for your water treatment plant, collection, and distribution controls systems. Our team's diversity, depth, and experience can directly benefit Grand Junction as we assist you in upgrading and implementing your SCADA systems. This will ultimately contribute to optimizing the delivery of your water services.

Advantages of selecting the MPC Team include:

- **Certified System Integrator.** An Ignition certified water system integrator in Colorado.
- **"A Team".** MPC has assembled a team of skilled individuals capable of addressing all of your project's most challenging needs. Innovative SCADA will provide added expertise and QA/QC. Senior members dedicated to this project include Russ Cook, Brian Mitchem, and Nick Toussaint who together have over 95 years of combined controls expertise.
- **Staff Availability.** We have adequate staff for this project and the available resources and drive to fill the requirements for a successful completion.
- **Cost-Competitive.** Our billing rates and individual corresponding years of experience is very competitive.

In conclusion, we appreciate your strongest consideration of the MPC Team to provide this SCADA project for the City. We are confident that we have all the experience, talent, and proper attitude to provide a successful project to Grand Junction and we look forward to sharing ideas on meeting your present and future needs.

If you have any questions or comments, please do not hesitate to contact Brian Mitchem at (303) 885-5967 or bmitchem@mountainpeakcontrols.com.

Mountain Peak Controls

Brian Mitchem
MPC Principal-in-Charge

B. Qualifications/Experience/Credentials

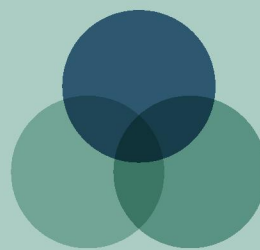

Mountain Peak Controls, Inc. (MPC)

Mountain Peak Controls, Inc. (MPC) has been in the process controls business in Colorado since 1999 and is based in Golden with a western slope office in Paonia as well as a satellite office in Silverthorne. Our extensive customer base has been built primarily by word-of-mouth with many of our customers having been with us since the beginning. Versatility, flexibility, and honesty in dealing with our customers are the keys to our company's success.

Mountain Peak has a vast amount of expertise and experience in various industries including; Water, Waste Water, irrigation, emergency warning systems, machine control, and robotics. For these industries, our accomplished personnel can do everything from instrument calibrations to troubleshooting to PLC/HMI programming and custom reporting to wireless communications to complete control system design and integration. Other areas of expertise include radio path testing, high speed private wireless networks, remote solar installations, VFD installation and troubleshooting. No matter your project size or what your needs may be, our highly dedicated team members can bring the vast experience and world class resources of Mountain Peak Controls to bear on your specific needs and requirements.

The Right Mix

Success means we've struck the right balance between SCADA system design, ease of operations staff use, and client satisfaction. Through our collaborative approach we will work with you to devise a system of value.

B. Qualifications/Experience/Credentials

Our key employees and project management will have 100% involvement in this project. Our existing knowledge of the City and its needs are an invaluable resource for our ability to complete this project on time and on budget. Our Paonia office will be responsible for this project with assistance from our Golden office.

Innovative SCADA

Innovative SCADA (InSCADA) will serve as a subconsultant to MPC providing overall QA/QC. InSCADA and MPC have successfully worked together on many past and current projects including similar SCADA projects for the City of Cripple Creek Water Treatment Plant, the Glacier Club Water Treatment Plant, and the City of Laramie Wastewater Treatment Plant.

InSCADA is an Ignition certified water and wastewater system integrator based out of Denver, Colorado. Their team's diversity, depth, and experience will directly benefit the City in not just designing a superior SCADA system but in configuring and installing it with operations staff in mind. InSCADA is experienced providing operations staff with the training needed to optimize system performance. From SCADA and PLC design to operator training, InSCADA's skilled professionals will tailor their level of service to the City's specific needs. InSCADA saves their clients energy, time, and money by putting the right solutions in place.

Why the MPC Team

Our systems specialists have addressed thousands of control systems worldwide and across multiple industries. We will work with City staff to address your project needs quickly and efficiently; and with an office in nearby Paonia, we can be on-site when needed to work through any issues in person.

There will be high involvement on this project by senior staff members **Russ Cook, Brian Mitchem, and Nick Toussaint who together have over 95 years of controls experience.** They will apply their expertise on recent SCADA Master Plans, integrations, and upgrades to identify accurate costs; incorporate existing controls equipment where applicable; and design and implement SCADA improvements for the water treatment plant, distribution, and supply systems.

We understand that having an efficient system in place is useless without proper training and support. Our professionals provide experienced operator training, system implementation, and support.

B. Qualifications/Experience/Credentials

Proposed Team Organizational Chart

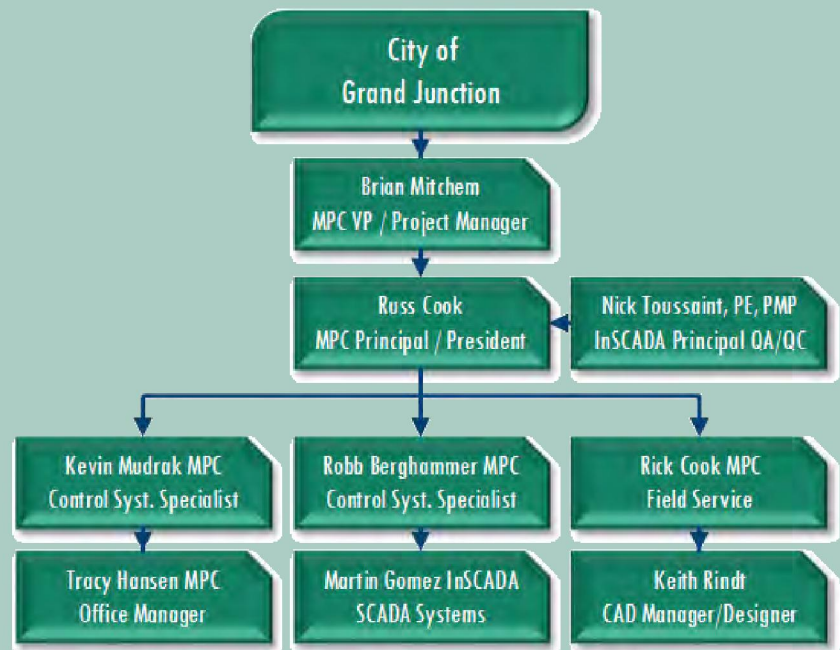

They are an exciting group to work with, innovative, and (did I mention), accessible.

**- Ray Keen, Village of Taos Ski Valley
SCADA Project**

I find the staff both knowledgeable and helpful. They built our SCADA program from start to finish. We will continue to use InSCADA as our go-to programmers.

**- Chris Claymore, City of Laramie
SCADA Project**

Brief Biographies

Russ Cook, MPC President (Golden Office)

Russ Cook possesses 30+ years of experience in process controls management. Having earned AAS degrees in Industrial Process Instrumentation and Computer Electronics from the University of Anchorage Alaska, Russ provides expertise in several industry fields such as complete systems retro fitting, instrumentation calibrations, control systems design/build/integration, start-up and project management. He has employed his skill set in various control environments which include Industrial Automation Control, Water/Wastewater Management, Food/Beverage and the Oil & Gas industry.

Brian Mitchem, MPC Vice President / Project Manager (Paonia Office)

Brian Mitchem earned his degree in AAS Instrumentation Technology from Colorado Northwestern CC and now heads MPC's western slope operations. Brian has the experience of 30+ years in the automation controls industry providing solutions for all phases of controls design, integration and project management in various environments such as water/wastewater treatment, irrigation and manufacturing. Brian's clients include: Clifton Water District, Clifton Sanitation District, Town of Palisade, City of Fruita, City of Montrose, Snowmass Water & Sanitation District, Ute Water and numerous small districts around western Colorado as well as being responsible for the design and implementation of several major irrigation control systems including dam and lateral gate controls.

B. Qualifications/Experience/Credentials

Nick Toussaint, PE, PMP, InSCADA Principal QA/QC (Denver Office)

Nick Toussaint has 34 years of experience in instrumentation, controls, and electrical engineering for WTFs and WWTFs; including expertise with SCADA and HMI systems addressing thousands of systems worldwide. He provides QA/QC for most of our projects. He has similar experience with clients such as Arapahoe County WW, Laramie, Village of Taos Ski Valley, Aurora, Broomfield, Eagle River, Cripple Creek, St. Vrain Sanitation District, Boulder, and Raton.

Robb Berghammer, MPC Control Systems Specialist (Silverthorne)

Robb Berghammer works out of our satellite location in Silverthorne. He came to MPC after working several years at Ball Metal in Golden as an Electronics technician / Industrial electrician. While at Ball he was responsible for troubleshooting and maintaining plant equipment, PLC programming, and starting up new production lines. He has an extensive background in Allen Bradley PLCs / HMI's and VFD's. Robb's clients include the Town of Silverthorne, Widefield Water & Sanitation District (Ignition HMI), Town of Frisco, Copper Mountain & Snake River WWTP.

Kevin Mudrak, MPC Control Systems Specialist (Golden Office)

Kevin Mudrak has an extensive background in PLC / HMI programming and radio communications with multiple manufacturers. Kevin comes to MPC from Progressive Machine and Design in Victor, NY where he served as a Control Systems Engineer. While there Kevin was personally responsible for commissioning of two production lines that were placed in China. Kevin has worked with our clients at Consolidated Mutual Water (17 SCADA sites), Carter Lake WTP, Aspen Park Metro District, Falcon Highlands, and several other systems.

Rick Cook, MPC Field Service (Golden Office)

Rick Cook has a combined 25 years of experience in operations engineering, supervision and process controls implementation. Rick earned an associate degree in Applied Science Welding Technology from Mesa College in Grand Junction and earned certification from Infraspection Institute in Thermographic Applications. Rick's diverse applications background continues to be a valuable asset to Mountain Peak Controls and its customers.

Martin Gomez, InSCADA Controls Systems / HMI Configurator (Denver Office)

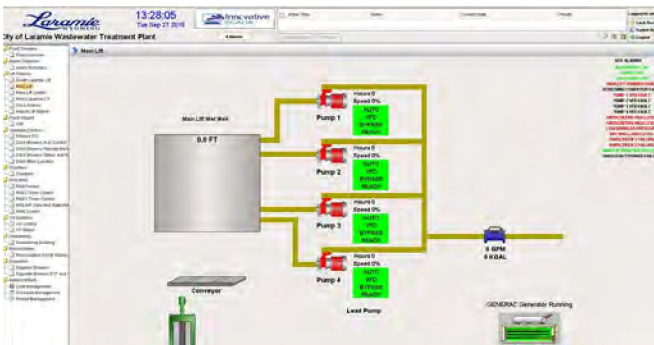

Martin Gomez has over 15 years of experience as a network administrator having provided systems expertise, SCADA systems development, network configuration and setup, data backups and restorations, and cyber security. He has experience with Inductive Automation Ignition server 7.7x and has his A+, Network+, and MCSA certifications. Projects have included Arapahoe County Wastewater Authority, Lyons, Laramie, Village of Taos Ski Valley, and Keenesburg.

B. Qualifications/Experience/Credentials

Glacier Club WTP Expansion Controls Upgrade

MPC and InSCADA worked together on this CMAR project that involves increasing plant capacity and upgrading the finished water conveyance system. The telemetry system is being upgraded to integrate communication between the finished water storage tank, booster pump station, finished water pump station, WTP, and raw water pump stations. The new controls system will provide remote monitoring and control. **Bill Greco, The Glacier Club, 600 Glacier Club Drive, Durango, Colorado 81301 (970) 382-6756 or bgreco@theglacierclub.com.**

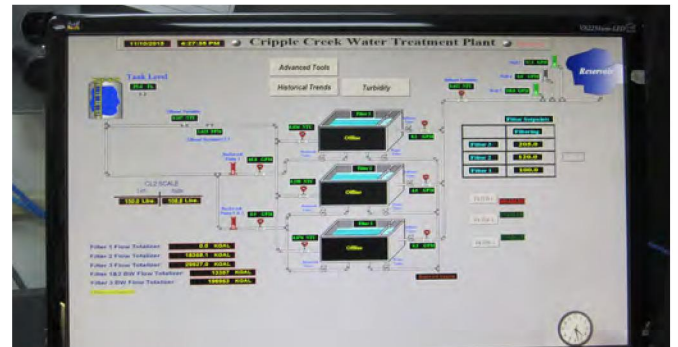

City of Laramie SCADA Upgrade WWTF SCADA Upgrade

Led by Nick Toussaint, MPC and InSCADA assisted the City with the WWTF SCADA upgrades project which included modernizing and unifying their SCADA

systems. The City desired to replace all of its end-of-life SCADA components with a more reliable system. New HMI, SQL and Historian were wanted at the plant along with replacement of the existing TSR-Advantage SCADA software with a more intuitive, open platform software like Inductive Automation's Ignition System.

MPC and InSCADA reviewed the existing hardware, software, and architecture, collected data, provided system configuration and checkout, completed system testing, and provided operations staff training.

Chris Claymore, City of Laramie WWTF Supervisor, Laramie Wyoming 82073 (307) 721-5204 or cclaymore@cityoflaramie.org.

City of Cripple Creek SCADA & Controls Systems Upgrade

MPC and InSCADA provided SCADA and controls solutions to Aqua Works DBO for the City's WTP upgrade. Services provided included system planning which included WTP Control System and Telemetry System Architecture, HMI screens, Control System Data Logging and Reporting, a Radio Site Study, Evaluation of Alarming, and Review of Remote Access Technologies; and design which included integration of existing systems, replacement of old systems, and improvements to some existing controls. **Adam Sommers, President Aqua Works DBO, 3252 Williams Street, Denver, Colorado 80205 or adam@aquaworksdb.com.**

B. Qualifications/Experience/Credentials

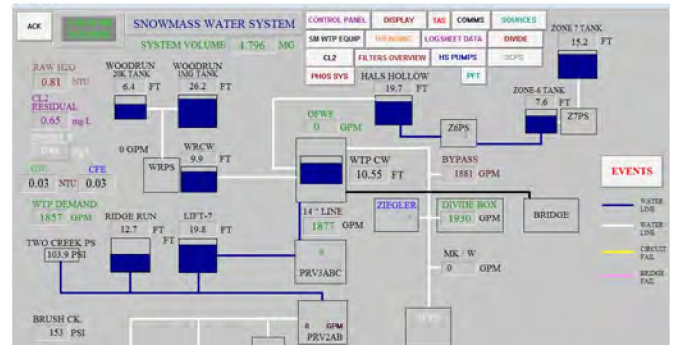

Ute Water Conservancy District WTP SCADA Design & Implementation

While this project was completed several years ago, it is a great example of taking a plant very similar to where the GJ WTP was a short time ago to where it can be in a few short months. MPC provided control system design and implementation for the WTP upgrade project and its subsequent expansion.

The original plant had relay logic control panels and hardwired filter consoles for each filter and a main operator room panel board showing WTP status and alarms. The project involved replacing each filter control panel and console. Allen Bradley Controllogix PLC's were used along with Rockwell (AB) Panelview touchscreens. Functionality of the system included automatic backwash and filter flow control for each filter along with Filter to waste capability. A central PLC was also installed to handle all functions common to each filter (i.e. backwash / surface wash pumps) as well as all additional WTP operations.

2 AB VFD's were installed for backwash pump flow control. The HMI for the project was Rockwell FTVIEW SE running as a redundant system on 2 Dell servers. In addition to the expansion filter work, MPC also designed and installed a plant wide security access system with cameras and keycards. Phase I: \$250K. Phase II: \$350K. Ben Hoffman, Treatment Superintendent, Ute Water Conservancy District, Palisade CO 81526 (970) 464-5563 or Bhoffman@utewater.org.

Snowmass Water & San. District WTP SCADA Upgrades

As Snowmass' integrator of choice for the past 18 years, MPC has done and continues to do extensive SCADA system expansion and upgrades for the Water treatment plant as well as its 5 pump stations, 4 controlled PRV vaults, 12 tanks, 1 reservoir and 1 flow control station (13 valves, 5 flow meters) and 7 pressure zones. The original system consisted of obsolete Bristol Babcock RTU's communicating over dedicated phone lines. MPC designed and implemented the current system involving Allen Bradley Micrologix PLC's and a combination of Ethernet, 450Mhz & 900 Mhz radios. In 2015, MPC designed and implemented an upgrade of the control system at the Water treatment plant. The Bristol Babcock RTU was replaced with an Allen Bradley Compactlogix PLC system utilizing remote I/O in each of the 6 filter consoles. This was done without plant disruption. Dean Wieser, WTP Supervisor, Snowmass WSD Snowmass Village, CO 81615 (970) 923-2056 or dwieser@swsd.org.

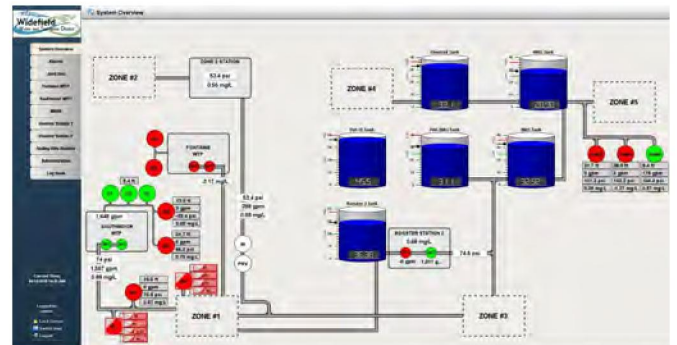

B. Qualifications/Experience/Credentials

Town of Silverthorne Water Water System Improvements & SCADA

MPC has worked with the Town of Silverthorne for 17+ years providing support for over 20 remote radio sites communicating with a Rockwell FactoryTalk View SCADA system. The radio system was recently upgraded to Ubiquiti 5Ghz radios to allow high speed communication from SCADA to tanks, well houses, booster stations, and lift stations. Over the past few years, MPC has been upgrading PLC hardware from Allen Bradley MicroLogix & SLC to modern CompactLogix platform PLCs. Robb Berghammer has been supporting the Town of Silverthorne from our Summit County office since 2010 and continues to work with the town's water department to improve the efficiency and reliability of the system.

Zach Margolis, Utility Manager, Town of Silverthorne,
PO Box 1309, Silverthorne, Colorado 80498 (970) 262-7344 or zachm@silverthorne.org.

Widefield Water & Sanitation District Controls & SCADA Upgrades

MPC provided SCADA and controls solutions for multiple projects to upgrade controls, SCADA, and radio systems for the Widefield Water & Sanitation District. Motorola radios were replaced with GE iNET-II 900MHz radios to provide communication from SCADA to 20+ remote sites. Multiple pump stations have been upgraded with Allen Bradley CompactLogix, Red Lion G3 HMIs, and AB PowerFlex VFDs.

Both Water and Wastewater systems have recently been upgraded to Ignition SCADA software to provide better visualization, historical trends, and Voice/SMS alarm notifications. MPC is currently working with Widefield Water & Sanitation's IT department to upgrade networking equipment and improve overall network security. Fortinet managed switches and firewalls will be used to create VLANs and prevent intrusion into the SCADA system.

Brandon Bernard, Water Department Manager,
Widefield Water & Sanitation

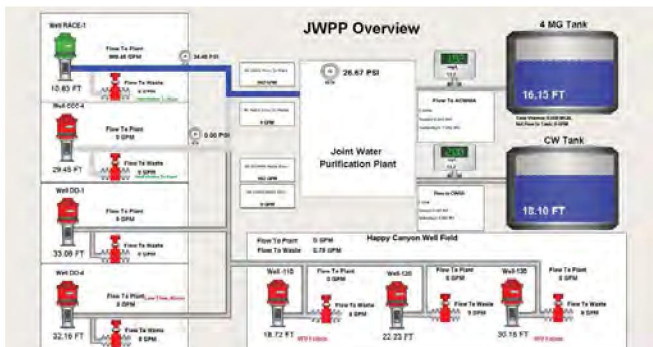

B. Qualifications/Experience/Credentials

Arapahoe County WW Authority SCADA Improvements

InSCADA providee a SCADA and Control System Upgrade project along with integration services. The project included SCADA, HMI, and PLC systems, system standardization.

The collection and distribution system consisted of approximately 30 sites including lift stations, wells, storage tanks, and pump stations. The system uses over 30 Rockwell programmable controllers at each site communicating to 3 MTUs. The project was completed in 2017.

For the collection and distribution system PLC replacement and SCADA software and configuration the project cost was \$70,000.

The Lone Tree SCADA software and configuration was \$50,000 and the Elkhorn Water Treatment Plant PLC replacement and SCADA software and configuration was \$40,000.

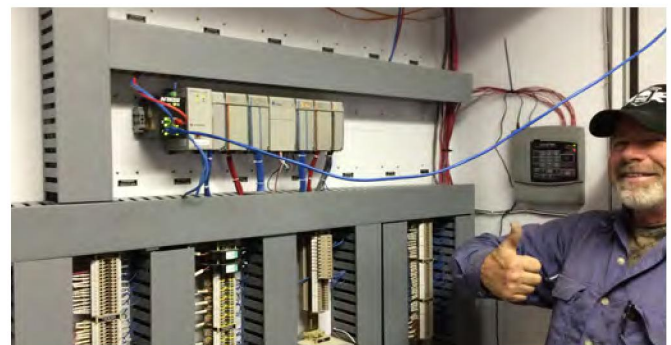

Toby Arrowsmith, Arapahoe County Wastewater Authority Project Manager, Arapahoe County, Centennial, Colorado (720) 898-7823 or tarrowsmith@arapahoeewater.org.

Village of Taos Ski Valley WWTF SCADA Upgrade

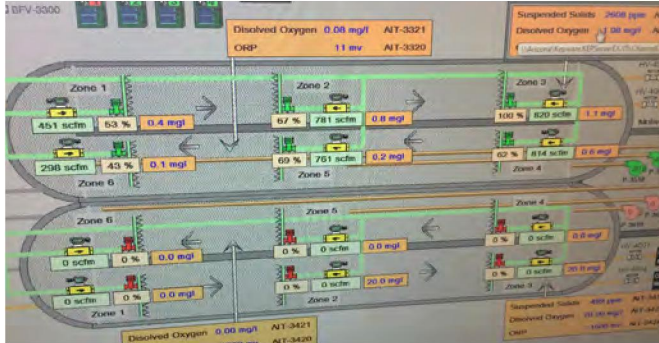

InSCADA provided timely and full support to upgrade the SCADA system. The project included replacing the existing Sensaphone SCADA system with a new Rockwell Programmable Logic Controller (PLC) based system and computer package. The new Allen Bradley Compact Logix Processor and Ignition HMI provides operators with updated process graphics, historical process data, alarm notifications, integrated control loops, and remote control.

Innovative SCADA provided SCADA software, hardware, and PLC programming. The VTSV was extremely impressed with the level of service Nick Toussaint provided them with and their level of comfort knowing that if any problems arose, they would get full support to quickly address any issues. The project was efficiently completed for \$36,000. Ray Keen, Public Works Director, Village of Taos Ski Valley, New Mexico 57525 (575) 776-8220 or rkeen@vtsv.org.

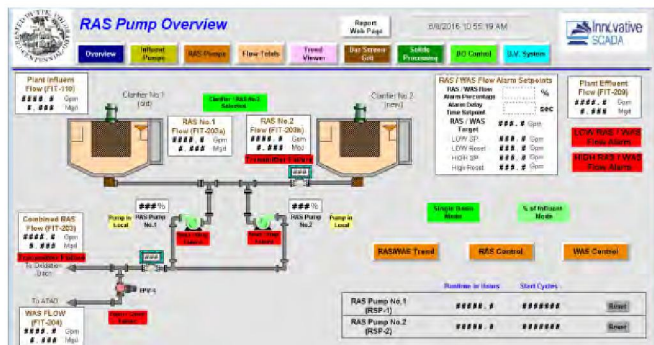

B. Qualifications/Experience/Credentials

St. Vrain Sanitation District WWTF SCADA System Design

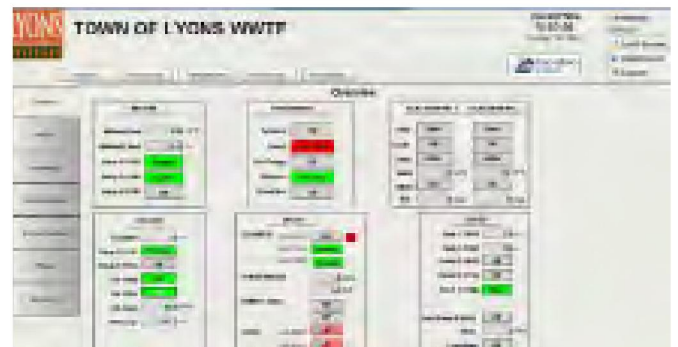

InSCADA team member Nick Toussaint supported new 6 MGD WWTF with biological nutrient removal. Advanced instrumentation and process control with SCADA was incorporated. Electrical power system design included a 2400A electrical switchboard and 1250 kW diesel generator, and several motor control centers, lighting, and power panels. Total construction cost was approximately \$32 Million. **Rob Fleck, District Engineer, St. Vrain Sanitation District, Colorado 80504 (303) 776-9570.** **Rob Fleck, District Engineer, SVSD, Firestone, Colorado 80504 (303) 776-9570 or rob@stsan.com.**

Town of Crested Butte WWTF Electrical Engineering & SCADA Upgrade

0.75 MGD WWTF with replacement of the electrical, instrumentation, and controls systems. The existing 200

kW generator is being reconfigured to provide power supply to the existing Headworks MCC and ATAD MCC to provide emergency power. **Rodney Due, Town Public Works Director, 507 Maroon Avenue, Crested Butte, Colorado 81224 (970) 349-5338 or rdue@crestedbutte-co.gov or Shea Earley, Town Wastewater Supervisor, Crested Butte, Colorado 81224 (970) 596-7912 or searley@crestedbutte-co.gov.**

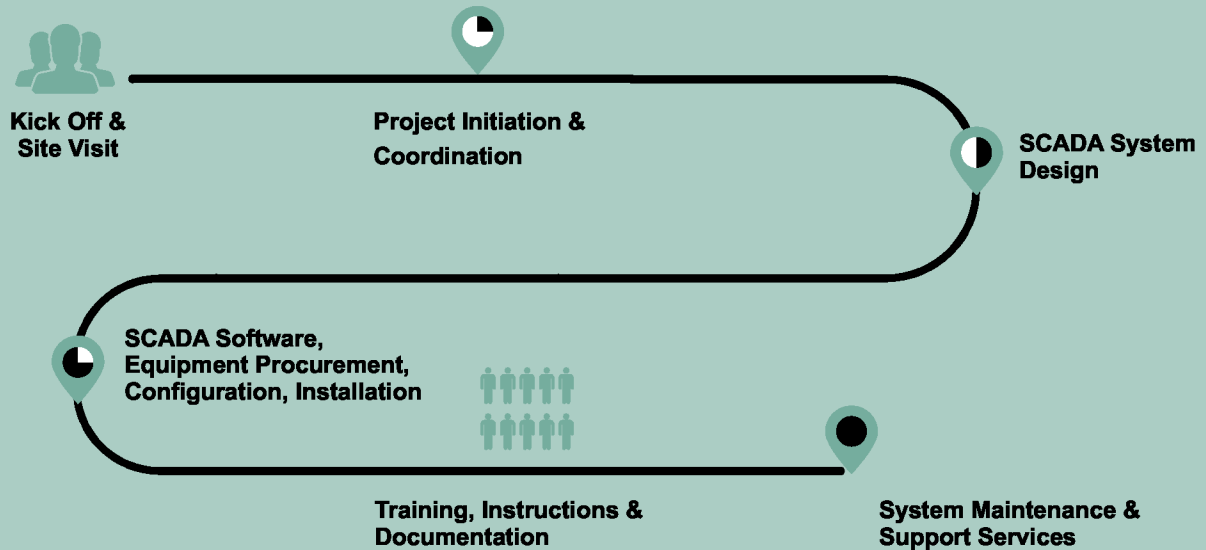

Town of Lyons WWTF SCADA Project

InSCADA provided a complete SCADA computer system for the upgraded WWTF, including two control panels with touchscreen HMIs and Allen Bradley PLCs and Ignition SCADA software. Services included screen and database development, integration of 5 different PLC-based vendor control packages, and the creation of SCADA, instrumentation, and PLC training documents. The SCADA HMI scope was \$35,000. **Wayne Ramey, Operator, Ramey Environmental Compliance 5959 Iris Parkway, Frederick, Colorado 80504 (303) 833-5505 or wayner@recinc.net.**

C. Strategy & Implementation Plan

Project Progression

Project Understanding

The City has undertaken a process to upgrade its SCADA system by requesting proposals to implement improvements to the existing control system at the Water Treatment Plant (WTP). Rather than simply dive into a system upgrade and replacement program, the City has thoughtfully elected to perform comprehensive master planning of the entire control system with the intent of creating a well-defined roadmap for a reliable and robust control system that can address current issues at the main WTP today, while providing a scalable system architecture that will support the City's future needs. It is in the City's best interest to perform system planning, architecture, and equipment evaluation, as well as cost estimation to ensure a successful outcome.

The current project engagement includes two major deliverables:

- Development of a Design Technical Memorandum
- Procurement, installation, training and maintenance services for Phase I SCADA Improvements at the WTP

Design Technical Memorandum

The City is requesting a Design Technical Memo that provides direction and documentation on what the overall direction should be to accomplish the technical objectives of implementing a modern City-Wide Supervisory Control and Data Acquisition (SCADA) System while also providing a phased approach to meet a multi-year plan for budgetary planning cycles. The Technical Memo is intended to capture information

C. Strategy & Implementation Plan

from the project team's collaboration, analysis and design activities and transform them into a standards and design guide that will allow implementation of Phase I upgrades at the WTP in 2018. This roadmap will also need to address not only technical issues but operational needs, including:

- Operations Security
- Operator Training
- Operations Reporting
- Remote Access
- Network Security
- Backup & Recovery
- Software Maintenance
- System Support

Procurement and Installation - Phase I WTP SCADA

The City's initial focus is centered on SCADA improvements at the WTP. While the Design Technical Memo will be a collaborative process with City staff input and involvement, the implementation will be largely executed by the MPC Team. During the implementation phase of the project, the MPC Team will:

- Develop the Bill of Material for SCADA system hardware and software
- Provide vendor data on equipment to be furnished
- Provide Shop drawings for new PLC and interconnections between field equipment and computer networks
- Develop a written Controls Narrative and review PLC controls with the City
- Develop preliminary HMI navigation and SCADA screens and conduct a HMI screen development workshop with the City

- Program PLCs and build HMI process database (PDB) and test
- Install new PLCs and HMI stations
- Commission new controls and provide Operator Training
- Provide on-going maintenance and support

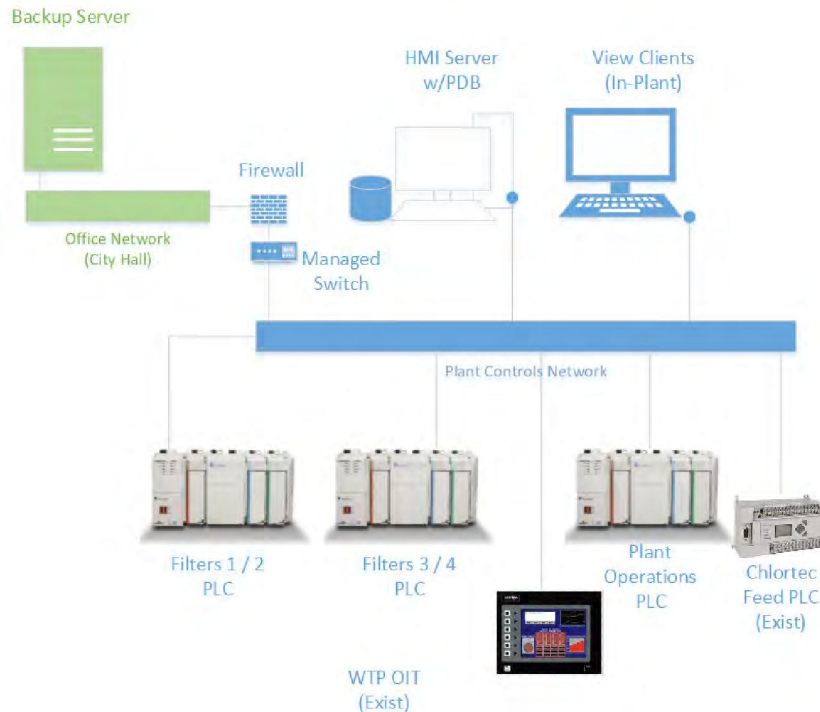

The initial work will consist of developing the submittals to support the approval process as well as the equipment procurement process. We will begin preliminary development and have virtualized development servers in our offices to allow multiple team members to work on different aspects of the system at the same time (Tag database, screens, alarming, trending & reporting). Regular development meetings will include screen reviews and on-line review meetings where all team members can participate in the development and review processes.

Project Approach

The project team will utilize project management principles and processes to drive the execution of the project. Upgrading and delivering a SCADA system is not simply a technical endeavor – it also involves human factors and operational challenges that are as equally important to the project's success.

During the development of the Design Technical Memo, it will be important to start with discussions relating to overall system architecture. Architecture is of paramount importance to the long term operability, reliability, maintainability and stability of the control system. The MPC Team will review, discuss and document the control system architecture on a system wide basis as well as review each facility and process area to allow operations staff to provide input on operations challenges, regulatory concerns as well as redundancy and reliability desires for the system. The figure that follows shows a potential system architecture for the WTP SCADA system:

C. Strategy & Implementation Plan

SCADA System Design

There are several important design factors to be discussed and reviewed during the Design process. One important item to be discussed is network architecture and security. The above figure depicts the HMI server on a controls network with the PLCs and then a separate City Hall network with the backup servers.

It is recommended that at a minimum, there be separation between the WTP process control network and the IT/Backup functions. This is one factor which we refer to as “OT vs. IT” - Operations Technology vs Information Technology. It is important that there is network separation between City Hall and the WTP from a security standpoint. The network separation can be implemented via a managed network switch which can provide multiple sub-networks that will isolate systems. In some instances, we have provided a multilayer plant network that separates the instrument networks from the PLC network and the PLC network from the HMI/OIT network.

Another factor in the security of the system concerns the data flow between equipment. In the case of system backup, the central backup server at City Hall can monitor and control the backup process, but the data flow and backup files between the backup server and the plant HMI server can be encrypted to maintain security. SCADA server redundancy is also an important topic that can have significant cost ramifications. We implemented full HMI redundancy on the Laramie SCADA project, including alarm redundancy, and there are several other factors that need to be considered during design, including alarm management and remote access. An area of technical design to be discussed is the location of the HMI servers. The MPC team has provided a number of different solution approaches in the past, including localized HMI servers, distributed servers, virtualized servers and other hybrid solution architectures. For the Phase I WTP project, we recommend a single HMI server, located at the WTP, with a warm redundant Gateway server and two local HMI client machines.

C. Strategy & Implementation Plan

Even more important are the actual control functions implemented to control the individual process areas. The above system architecture shows WTP filter and backwash control in one PLC, but in our experience, for a plant of this size, the filter processes should have a certain level of redundancy. On past projects we provided individual filter PLC controls for plant effluent control, valve sequencing and backwash control. If a filter PLC had to be taken out of Run, or if there was a CPU or Power Supply failure, this would not shut down the entire filtration process.

Implementing individual filter redundancy and has cost ramifications. The existing filter control system has individual filter effluent rate of flow controllers that are the single loop controller type. There is also an I/O bus between the controllers and an I/O rack in the back of the panel with several inputs/outputs, in order to allow information to be routed to the Filter controller.

The current state architecture for filter control is shown below:

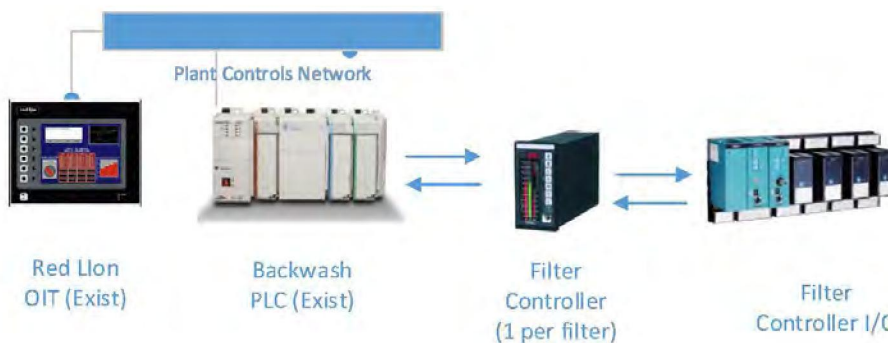

Figure 2 -Filter Controls Current State

In the current state, the Backwash PLC controls the various filter control valves and the Filter controller and I/O control the effluent valve. In the event of PLC failure, the filter controller can still control filter effluent flow rate, however automatic backwash control would be unavailable.

An alternative control architecture has been implemented in many facilities and would allow for the retirement of the individual filter controllers:

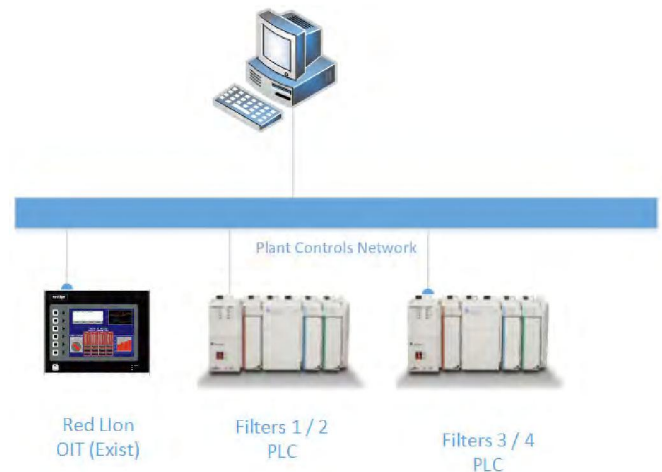

Figure 3 -Filter Controls Future State

In this alternate architecture, filter controls would be implemented for 2 filters in each PLC along with fully redundant backwash controls. This approach would mitigate any impact to a single equipment item failure or being taken offline. The Computer interface would provide operator interface and the Red Lion OIT would provide for additional redundancy in filter control interface.

The above design considerations will be discussed and evaluated, and documented in the Technical report. The report will look at each facility and process area and an overall architecture and process area design will be taken to the 30% design level. This will allow the project team to provide cost estimates that will be used by the City in performing the annual budgetary planning processes a multiyear phased approach.

C. Strategy & Implementation Plan

Telemetry

The MPC Team has a lot of experience providing telemetry solutions across many different platforms. The team has experts in satellite, microwave, radio and cellular technologies that can evaluate and propose a wide range of technical solutions, tailored to the City's needs.

SCADA System Software and Equipment

We have provided a detailed list of SCADA system hardware and software in the attached Fee proposal. We believe the proposed solution will address the City's desire for 2018 improvements at the WTP as well as providing a base system that can be expanded over time.

The MPC Team will provide all required PLC equipment, hardware and software as described below. We intend to furnish a complete and operable set of upgrades that meet the objectives of the RFP, but we are also open to discussing alternatives or enhancements that the City may desire.

We have included costs for replacing the obsolete Siemens and Toshiba PLC's with a new Rockwell/Allen Bradley Compact Logix PLC. We have also estimated the Input/Output requirements for Chemical feed and Filter systems and will provide these as part of the Phase I improvements.

We have included an off the shelf packaged SCADA software package, "Ignition" by Inductive Automation. We are a certified Ignition Integrator and the Ignition package is a competitively priced, modular SCADA software that can support the types of architecture and redundancy options that the City desires to implement. The Ignition package will be priced with five (5) client licenses, more than adequate for 10 users. This will allow for two or three dedicated clients at the WTP, one for remote access for off hour operations as well as a

license for City Hall monitoring and reporting access. We will be providing the Ignition system with the View, Alarm Notification, and Tag Historian modules for Phase I WTP improvements as well as the Sytech XLReporter software.

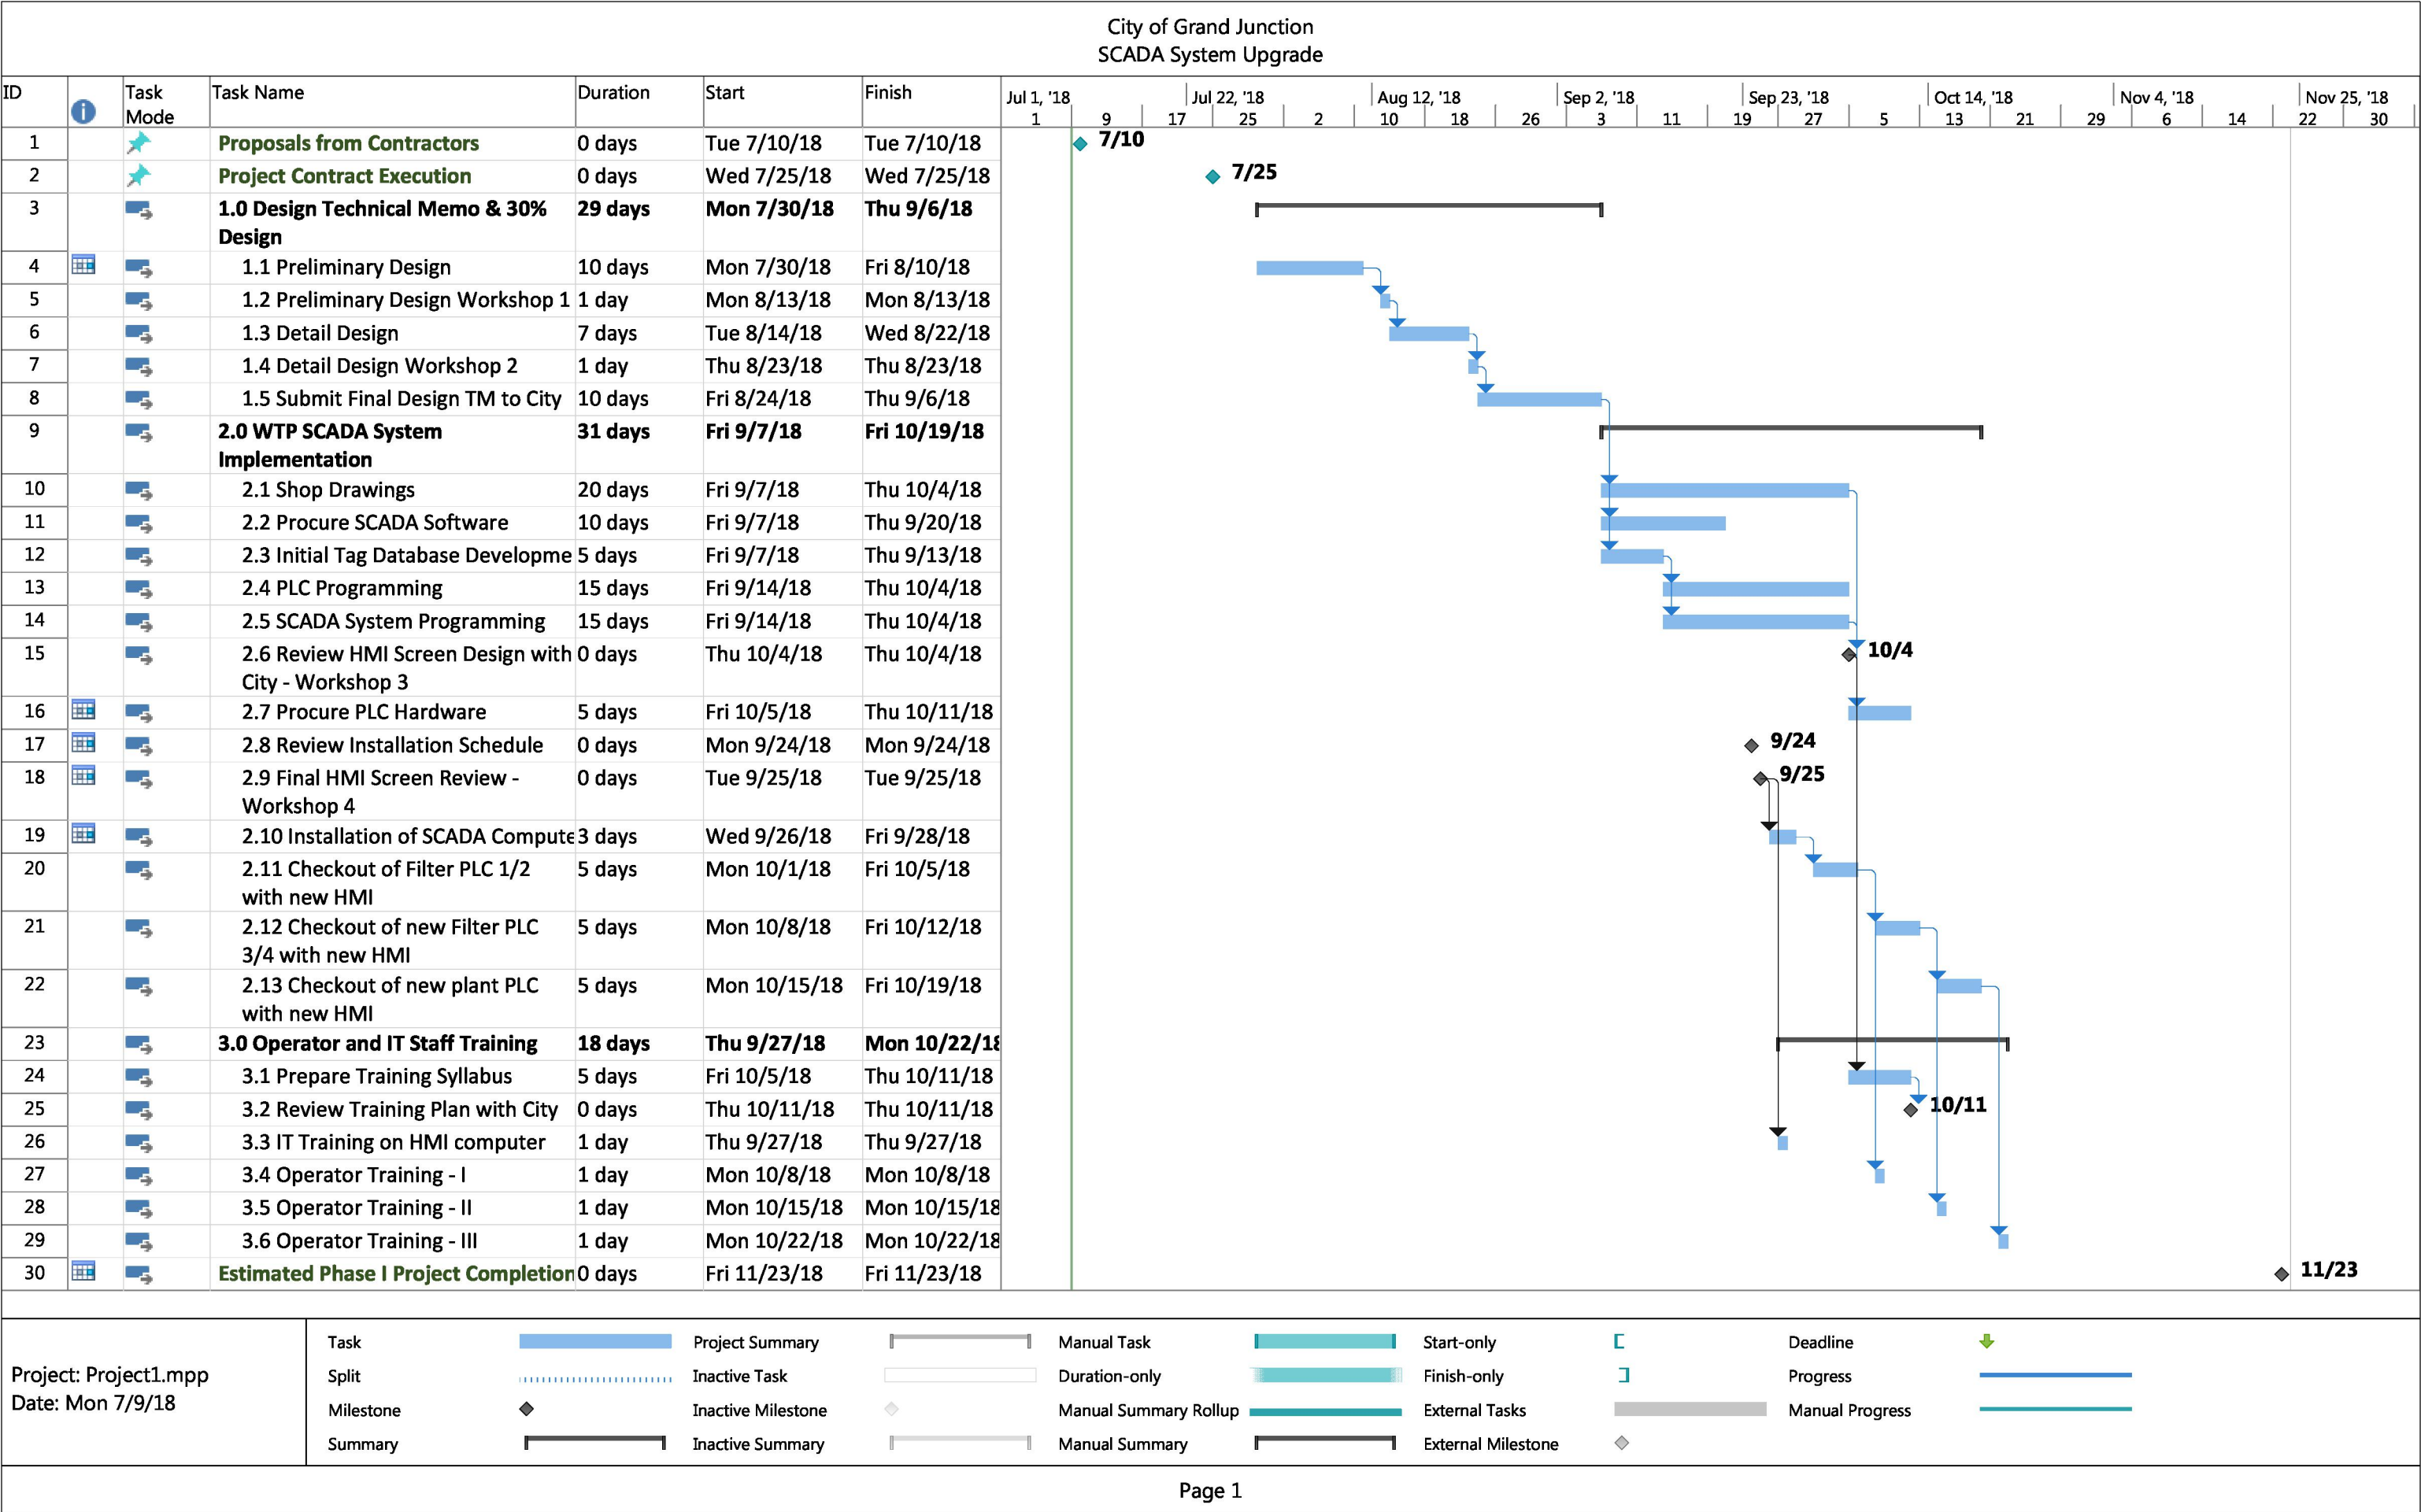

Computer Hardware and network equipment will require the following City-furnished items:

- VPN Firewall (City standard)
- 12 port managed switch with CAT 5e network cables
- QTY (3) Dell Precision Tower 3000 with I5-7500 Quad Core, 3.4 GHz, 8Gig RAM, 1TB HD, Windows 10 OS, MS Office 2016, Dell 24" E2417H and 750VA UPS
- QTY (1) Color Laser Printer

PLC Hardware: MPC-furnished

- Lot (2) Compact Logic L33-ER PLC
- Input/Output Modules

While the Backwash PLC is of the AB 1769 platform, AB is moving their CompactLogix controls to the newer 5069 series. During the Technical workshops the exact PLC models will be finalized.

June 21st, 2018

To whom it may concern,

As the Manager of the Town of Silverthorne, Colorado Water and Sewer utilities and the Silverthorne Dillon Joint Sewer Authority (JSA), I have worked with Mountain Peak Controls (MPC) since the company was founded. Various people at MPC have provided SCADA, electrical control, communications, and programming services to the Town and the JSA for about 20 years. When we first contacted the individuals that went on to found MPC, we had zero programmable controllers. We now have cutting edge technology for all our SCADA and communication functions.

The JSA operates the Blue River Treatment Plant, a 4.0 MGD advanced waste water plant with biological nutrient removal, a chemical physical tertiary process for phosphorous removal, and solids dewatering via centrifuges. Thanks to the work of MPC, all these systems are fully automated with complex data tracking and alarm systems.

The Town of Silverthorne Utility Department has eight wells, four pump stations, five booster stations, and six storage tanks, serving seven pressure zones. The Town also has one sewage lift station and two pumped sewage siphon vaults. Also fully automated and monitored. This high level of automation and alarming has allowed us to maintain a smaller staff than one might expect, while earning the highest rating, a "1" for our water distribution system from the Insurance Services Office.

The Town and the JSA have consistently received excellent service at a fair price while benefiting from the creativity and expertise of the MPC personnel. I highly recommend Mountain Peak Controls and would be happy to answer any questions. I can be contacted at the address or phone number below.

Sincerely,

Zach Margolis

Utility Manager

To Whom It May Concern,

I have had the pleasure of working with Innovative SCADA on and off for over 3 years. I find the staff to be both knowledgeable and helpful. They worked with us on building a new SCADA program from start to finish. They worked well with all my staff to get just what was needed to keep the plant up and running smoothly.

We continue to use Innovative SCADA as are go to programmers and will continue to into the future. I highly recommend Nick and his staff.

Arapahoe County Water and Wastewater Authority
 Michael Morianti
 Project Engineer

RE: Reference Letter for Innovative SCADA

To whom it may concern:

I am writing this letter in support of Innovative SCADA's quality and professionalism as it pertains to work they have completed for Arapahoe County Water and Wastewater Authority (ACWWA). ACWWA provides drinking water and wastewater services to approximately 3,500 residences and businesses located primarily in Arapahoe County and northern Douglas County. ACWWA has worked with Innovative SCADA for over 3 years starting in 2015 to the present. We use Innovative SCADA's expertise to perform SCADA design, system architecture, instrumentation & control engineering, and equipment integration & start-up.

Two recent projects completed by Innovative SCADA:

- 1) An upgrade of the SCADA system for our Elkhorn Water Treatment Plant and Pump Station
- 2) A redesign and integration for the control and telemetry of our Western Line Control Vault

In these projects, Innovative SCADA demonstrated proficiency in design, testing, installation, programming, and commissioning for various control elements. They were able to work with our Field Staff to meet operational requirements, yet make facility improvements in a timely manner. Throughout the projects, they communicated technical details articulately and made sure we got exactly what we wanted from the project.

Overall, Innovative SCADA offers competitive prices and are transparent about the deliverables and services to be provided. Working closely with our various departments (Engineering, IT, Operations), they have proven the ability to meet project objectives in varied environments. ACWWA's operational success is highly dependent on process controls, hence we need absolute confidence that our system is in good hands. That is why we continue to work with Innovative SCADA.

If you require any additional information, please feel free to contact me (720-229-4515).

Sincerely,

Michael Morianti

Defending Water Quality & the Environment

E. Detailed Fee Sheet

<i>City of Grand Junction 2018 SCADA System</i>		<i>MATERIALS</i>
ITEM	COST	SALE
System Hardware	\$29,983	\$35,274
System Software	\$7,000	\$8,750
License Maintenance	\$3,027	\$3,363
Labor	\$46,000	\$46,000
Travel Costs	\$2,550	\$2,833
TOTAL	\$88,560	\$96,220

Our Rate Sheet is included on the following page. The City's Bid Sheet has been completed, signed, and submitted as requested in the RFP.

SECTION 7.0: SOLICITATION RESPONSE FORM
RFP-4525-8-DH WATER TREATMENT PLANT, COLLECTION AND DISTRIBUTION SUPERVISORY CONTROL AND DATA ACQUISITION AUTOMATION SYSTEM (SCADA)

Offeror must submit entire Form completed, dated and signed.

- 1) Total all inclusive pricing to provide all labor, parts, supplies, equipment, installation, etc. necessary for the Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition Automation System (SCADA) per specifications:

TOTAL COST \$ 96,220

WRITTEN: Ninety-Six Thousand, Two-Hundred and Twenty dollars.

The Owner reserves the right to accept any portion of the work to be performed at its discretion

The undersigned has thoroughly examined the entire Request for Proposals and therefore submits the proposal and schedule of fees and services attached hereto.

This offer is firm and irrevocable for sixty (60) days after the time and date set for receipt of proposals.

The undersigned Offeror agrees to provide services and products in accordance with the terms and conditions contained in this Request for Proposal and as described in the Offeror's proposal attached hereto; as accepted by the Owner.

Prices in the proposal have not knowingly been disclosed with another provider and will not be prior to award.

- Prices in this proposal have been arrived at independently, without consultation, communication or agreement for the purpose of restricting competition.
- No attempt has been made nor will be to induce any other person or firm to submit a proposal for the purpose of restricting competition.
- The individual signing this proposal certifies they are a legal agent of the offeror, authorized to represent the offeror and is legally responsible for the offer with regard to supporting documentation and prices provided.
- Direct purchases by the City of Grand Junction are tax exempt from Colorado Sales or Use Tax. Tax exempt No. 98-903544. The undersigned certifies that no Federal, State, County or Municipal tax will be added to the above quoted prices.
- City of Grand Junction payment terms shall be Net 30 days.
- Prompt payment discount of 2 percent of the net dollar will be offered to the Owner if the invoice is paid within 15 days after the receipt of the invoice.

RECEIPT OF ADDENDA: the undersigned Contractor acknowledges receipt of Addenda to the Solicitation, Specifications, and other Contract Documents. State number of Addenda received: 3.

It is the responsibility of the Proposer to ensure all Addenda have been received and acknowledged.

Direct expenses will be charged at actual cost plus 10% for handling and insurance. Incidental expenses such as miscellaneous copying, telephone service and computer equipment are included in the fee. Reimbursable (direct) expenses may include but are not limited to: Additional outside professional services provided beyond those stipulated in the scope of work; Additional copies of reports, drawings, etc. beyond those stipulated in the scope of work; Postage, courier fees, and shipping; Project vehicle mileage (which will be charged at the current IRS rate); Owner-approved, project-related purchases; Project business meals and lodging; Resident project engineer equipment and rental; and Printed photos.

Purchasing Division

ADDENDUM NO. 1

DATE: June 22, 2018
FROM: City of Grand Junction Purchasing Division
TO: All Offerors
RE: Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition Automation System (SCADA) RFP-4525-18-DH

Offerors responding to the above referenced solicitation are hereby instructed that the requirements have been clarified, modified, superseded and supplemented as to this date as hereinafter described.

Please make note of the following clarifications:

1. Q. Is there already a pre-approved system integrator list?
A. No
2. Q. Has the SCADA software been pre-selected?
A. No
3. Q. Page 20 – 4.2.9 Pricing – It looks like the City wants a base (lump sum) price for:
 - a. Hardware (PLCs, I/O, computer(s), network equipment
 - b. Software (OS, Application Software, backup SW, etc.)
 - c. License (& software support agreement)
 - d. Labor for config of proposed system, startup, training, travel
 - e. Travel costs for system install and start-up

Is this also how the city wants the “complete breakdown list of pricing” as described In Section 5.0 Section E? Or does the pricing need to breakdown further into individual parts?

- A. These 5 categories for breakdown is sufficient.
4. Q. What quality of network connectivity exists between City Hall and the WTP?
A. The current connection is a 200Mbps Microwave Link.
5. Q. Will the city provide required network equipment (i.e. Routers, switches) or are those contractor-supplied? It was suggested at the walkthrough that the city would provide those in order to keep hardware the same as currently used.

A. The city will provide the required networking equipment.

6. Q. Password management system? Sounds like this applies at the Operating System level. Or does it apply also at the application layer?

A. The city already has an Operating System Password policy that enforces passwords at the application level. The application must also enforce the same password policies

7. Q. Attachment A lists both WTP process equipment and remote equipment – Does the Phase I scope of work include all items in the Attachment or only those that are required for “in-plant” process control?

A. Phase 1 involves all items listed in Attachment A except those under the heading of “Include for Future Addition of”. There are two new projects planned for late 2018-early 2019 that will require 1. Intake Structure Telemetry & 2. PRV Station Monitoring on Flowline to also be integrated into Phase 1 even though they do not exist at the present time. These two items are the only remote telemetry items to add for Phase 1 as the Purdy Mesa Remote Valve and the Kannah Creek Remote Control Valve are already functioning as part of the Kannah Creek WTP's SCADA system.

8. Q. On page 28 of the RFP (Include for Future Addition of), is the city wanting the contractor to include in this proposal all costs for implementing the data points described including hardware / software / installation, etc. or is the city's intent to ensure that any provided SCADA equipment has the ability to expand in the future to be able to handle this equipment?

A. The intent is to ensure that any provided SCADA equipment has the ability to expand to be able to handle this equipment. Other items to add to the “Future Additions List” include 1. Control and Monitoring of the Gunnison River Pump Station (2 pumps, 2 VFDs, flowmeter, pressure) 2. Reservoir #4 Level Sensor.

9. Q. For maintenance and support can we provide daily or hourly support costs for on-site and remote site support, since we cannot estimate total support needs?

A. Yes, please provide daily/hourly support costs and/or proposed Maintenance Contract costs.

- 10.Q. Is upgrade of the Motor Control Center part of this project?

A. It is not a part of Phase 1, but proposed cost of upgrading for budgetary purposes would be appreciated

- 11.Q. Will the City provide copies of the Input/Output database for all existing plant PLC's and the Red Lion OIT prior to the bid as they are necessary to provide an accurate estimate of Phase I work?

A. Yes

- 12.Q. Will the City make accessible or provide copies of all WTP control wiring drawings prior to the bid?

A. Yes

13.Q. What data points are currently recorded by the electronic chart recorders?

A. 4 individual filters for flow, turbidity, and particle counts. Effluent flow, turbidity, chlorine, pH, Fluoride. Water tank level, free chlorine, city water main flows (x 2). Influent flow, turbidity, pH, chlorine, flowline pressure. Raw water flowlines flow, turbidity, pH (two of them all). Raw water pump flow. Clearwell level.

14.Q. Is the City looking for SCADA communications to remote sites to be on an ethernet / internet platform or is fixed band radio acceptable? Or a combination of technologies as required to make the system work as desired?

A. This can be a combination of communications technologies if it is secured with the appropriate security controls.

15.Q. What are the new and total Input/Output counts for the budgeted Phase I portion of the project?

A. Total I/O counts for Phase 1 will be determined through the design process with the selected integrator.

16.Q. Will the City provide a list of all remote sites to be included in Phase I?

- A. PRV Stations on Purdy Mesa Flowline 38.962 / -108.362
- B. Intake Structure Telemetry (phone/wifi-umbrella nearby) 38.963 / -108.227
- C. Purdy Mesa Control Valve & flowmeter (already wired to Kannah Creek SCADA system) 38.9688 / -108.2944
- D. Kannah Creek Control Valve & flowmeter (has radio system to Kannah Creek SCADA) 38.9616 / -108.2723

17.Q. Are there existing communications between the WTP and any Phase I remote sites? If so, what form of communication is being used and to which sites (i.e Hardwire, radio, Fiber, ethernet)?

- A. Purdy Mesa Control Valve and flowmeter are hard-wired to the Kannah Creek SCADA system
- B. Kannah Creek Control Valve and flowmeter signals are transmitted to the Kannah Creek SCADA system via a repeater and Phoenix Radio (900 MHz) located at the Kannah Creek Water Tanks on a highpoint above and to the southwest of Juniata Reservoir.

The Kannah Creek SCADA system can currently be accessed by WTP staff via LogMeIn, where monitoring and control of the valves can be done.

18.Q. What if any PLC & operator interface equipment is being utilized at any Phase I remote sites?

A See # 17

19.Q. I'd like information about the number and types of PLCs the SCADA is to connect to in phase 1. There are two ways to do this.

1. Send copies of the PLC files, this will contain the most information for me.
2. Send a list of the PLCs make and model, this will contain less information but is an option if it is not possible to give out the PLC code.

A. Some PLC files are attached to this Addendum. Due to software access issues, the attached does not represent the total PLCs in its entirety. The selected firm will be given access to the PLCs at the Water Plant after contract award.

20.Q. Can you send me IO lists per PLC if they are available? If they are not available this information can be found in the PLC files if they are sent as option 1a above.

A. Some PLC files are attached to this Addendum. Due to software access issues, the attached does not represent the total PLCs in its entirety. The selected firm will be given access to the PLCs at the Water Plant after contract award.

21.Q. There are different ways to handle remote access to the servers. Which method would be preferred?

1. VPN access to the control network, this will allow remote computers to connect into the network. This gives good freedom to work because people can use their own computers with their own programs to work on and monitor the system. However, this is less secure because it is more difficult for the City of Grand Junction to monitor 3rd party computers for malicious software intentional or not.
2. Dedicated engineering computer on the control network with Remote Desktop access, so users can login remotely and use the programs installed on that computer to work on the system. More secure because the engineering machine can be administered by the City of Grand Junction and users can only use the programs installed on it, hence reducing the risk of malicious software entering the system.
3. No remote access, all work and monitoring must be done from site. Most secure, least flexible.

A. All remote access to the City's internal resources must be done via a VPN connection requiring multi-factor authentication using the city's existing RSA SecurID services. The actual access level will stop at a dedicated computer and not access the secure controls network.

22.Q. If option 3.b is chosen would you like Rockwell Logix500 and Logix5000 software included in the bid? This will be used to view and edit PLCs, not a requirement for this SCADA job but would be useful in the future to help with remote troubleshooting. So it could be setup from the start if you like.

A. Remote troubleshooting is desirable, please include

23.Q. No contact information is provided in section 1.1 of the RFP, please provide information.

A. The contact for this RFP is the City Purchasing Representative Duane Hoff.
Duane Hoff Jr., Senior Buyer
duaneh@gjcity.org
(970) 244-1545

24.Q. Provide a complete I/O list as mentioned in the pre-bid meeting.

A. Please refer to Attachment A & the PLC files provided

25.Q. What SCADA software is used at the KCWTP currently?

A. Opto 22

26.Q. In the RFP it mentions budget cycles and 2018 plant improvement budget. Are these budgets provided or will they be discussed with the selected integrator to build the phases as discussed in the RFP?

A. Budget will be discussed with the selected integrator.

27.Q. The RFP requires a long list of security features of the software provided (items in 4.2.7), yet requires a "Packaged software product" (4.2.4). We will be constrained by the selected "packaged software product" and the offerings as part of the vendor supplied package. Most current SCADA software packages offer most but not all of the required features. Is this a point of discussion during the design of the system with the city?

A. List any exceptions to the security functions requirements in the RFP. The security features will be scrutinized by the City's IT Department for acceptability their its entirety.

28.Q. Often times we go thru a software and hardware selection process prior to costing out the hardware and software with the owner. Is this a desired step in the design process as it is currently not indicated in the RFP documents.

A. Yes. Selection of desired hardware and software will be a step in the design process with the selected integrator. The cost of these components will be considered during their selection.

29.Q. Does the owner have a software preference for the SCADA software?

A. No

30.Q. Does the owner have a PLC hardware preference for the SCADA Hardware?

A. Different PLC brands exist throughout the water system. The City desires to make our infrastructure more consistent if possible. The PLC installed as part of the filter upgrade in 2016 was Allens/Bradley.

31.Q. A question was raised during the walk through regarding the programs for the current PLCs. Has that been verified that the programs with tag/register information would be available?

A. Yes. Some PLC files are attached to this Addendum. Due to software access issues, the attached does not represent the total PLCs in its entirety. The selected firm will be given access to the PLCs at the Water Plant after contract award.

32.Q. I was wondering if I could arrange a site visit either next Monday or Tuesday to the remote locations that are called out in the SCADA system RFP.

Those sites are critical to the bid process and very limited or no information was given in the RFP or the walkthrough about them.

If a site visit cannot be arranged, are there pictures, hardware listing and GPS coordinates available for these locations?

Sites of particular interest:

Gunnison River Pump Station
 *Purdy Mesa Influent Control Valve
 Purdy Mesa Remote Valve
 *Kannah Creek Influent Control Valve
 *Kannah Creek Bypass Valve
 Kannah Creek Remote Control Valve
 *Reservoir Pump 40 hp On/Off
 *Reservoir Pump Valve%
 *Reservoir 75 hp Pump On/Off
 *Reservoir #3 & 4 Bypass Valve Control
 Raw Water Intake Structure telemetry
 Watershed Reservoir Telemetry & Valve control – not Phase 1
 Monitoring of PRV stations on Flowline
 Ridges Irrigation Pump Station – not Phase 1
 Mantey Heights flow meter – not Phase 1

A. Information for Phase 1 sites in question has been listed above; sites with an asterisk (*) are located within the City WTP compound. If information has not been listed (ie. Mantey Heights), it is anticipated to be in a later phase.

33.Q. We would like to request an additional site visit to the Grand Junction Water Treatment Plant as well as the Kannah Creek Plant. We believe that it is our duty as an integrations company to do a thorough investigation of all control processes currently implemented to give the most comprehensive and sustainable course of action for current and future controls needs. It is our goal to be able to put forth the most competitive, accurate and accommodating bid as possible. However, to do such we would like some additional information that would be best gathered through another on site visit. The additional information that we believe is pertinent to the design and future allocation of controls is below.

- Current make and model of RTU's/FIU Phoenix Radio 900 MHz
- Information regarding telemetry system, network map, repeaters, frequency range, etc.
Listed above
- Future sites to be added and their function Listed Above in Attachment A
- Current make and model of PLC's at Kannah Creek Opto10
- Current communications protocols being used by SCADA at Kannah Creek ethernet
- Available communications out of Kannah Creek, IP/TCP, Serial, Radio, etc.
Currently using IP/TCP, no Serial, Radio would definitely need a repeater
- Current means of instrumentation measurements and control at Grand Junction WTP, 4-20mA, HART, Modbus etc. 4-20
- Existing wiring to all control valves at the Grand Junction WTP that are to be replaced
Not as part of this project. It is the City's desire as part of a later phase to move the telemetry/control of 1) Finished water tank level, 2) City 24" Flowmeter, 3) OM 24" Flowmeter, 4) Reservoir 40 HP Pump On/Off, 5) Reservoir 75 HP Pump On/Off, 6) Reservoir Pump Valve Control, & 7) Reservoir Pump Valve % to a wireless system (radio, microwave, etc.) these components are all located within the compound and are currently hard-wired. Please take this into consideration as needed capabilities with future expansion.

The original solicitation for the project noted above is amended as noted.

All other conditions of subject remain the same.

Respectfully,

A handwritten signature in black ink, appearing to read 'Duane Hoff Jr.', written in a cursive, stylized script.

DRAWING NOTES:

1. LOOP #12 TRIGGERED FROM PRESSURE/TEMPERATURE CONTROLLER TO ALL INSTRUMENTS. GROUND BLOKS. CONTRASTIVE TO THE MAIN GROUND LOOP TO EQUIPMENT CONNECTIONS.
2. THE ALLIANCE WIRE NUMBERING SYSTEM.
3. WIRE NUMBERING TO BE PROVIDED FROM TB-1 CABLES + 1000 TO 10000 SECTION FOR EQUIPMENT.
4. RECEIPTABLE CIRCUIT PROVIDED TO EQUIPMENT. CONTAINING ALL INFORMATION TO THE INDUSTRY AND WIRING IN PANEL TO PANEL EQUIPMENT.

This POU was created by the PID formula of the S7-200 Instruction Wizard.

To enable this configuration within the program, use SM0.0 to call this Subroutine from the MAIN program block every scan cycle.

This code configures PID 0. See DB1 for the PID loop variable table starting at VB0. This subroutine initializes the variables used by the PID control logic and starts the PID Interrupt "CVPID_EXE" routine. The PID interrupt routine is called cyclically based on the PID sample time. For a complete description of the PID instruction see the S7-200 System Manual. Note: When the PID is in manual mode the output should be controlled by writing a normalized value(0.00 to 1.00) to the Manual Output parameter instead of changing the output directly. This will automatically provide a bumpless transfer when the PID is returned to automatic mode.

This POU was created by the PID formula of the S7-200 Instruction Wizard.

This interrupt routine implements Timed Interrupt for PID execution. This interrupt routine was attached in subroutine "CVPID".

WIRE SIZE CODE

WIRE TYPE	WIRE SIZE
PLC INPUT/OUTPUT	#16 AWG
AC & DC CONTROL WIRING	#14 AWG
120 VAC GENERAL PURPOSE	#14 AWG
DC ANALOG SIGNALS	#18 TSP

GENERAL NOTES

ALL TERMINALS WITH THE SAME LABEL ARE JUMPERED TOGETHER.

WIRES WITHOUT A LABEL SHALL BE LABELED WITH THE SAME LEGEND AS THE TERMINAL BLOCK.

ALL FIELD WIRE SHALL BE COPPER WIRE, AND TORQUED PER MANUFACTURER RECOMMENDATIONS.

CONDUIT FITTINGS, HUBS OR ANY OTHER PENETRATIONS SHALL BE UL LISTED TO MAINTAIN THE ENVIROMENTAL RATING OF THE ENCLOSURE PROVIDED.

DANGER,MULTIPLE POWER SUPPLIES RISK OF ELECTRIC SHOCK, BURN OR EXPLOSION. MORE THAN ONE DISCONNECT SWITCH MAY BE REQUIRED TO DE-ENERGIZE THE EQUIPMENT BEFORE SERVICING.

* EQUIPMENT MOUNTED ON THE DOOR.

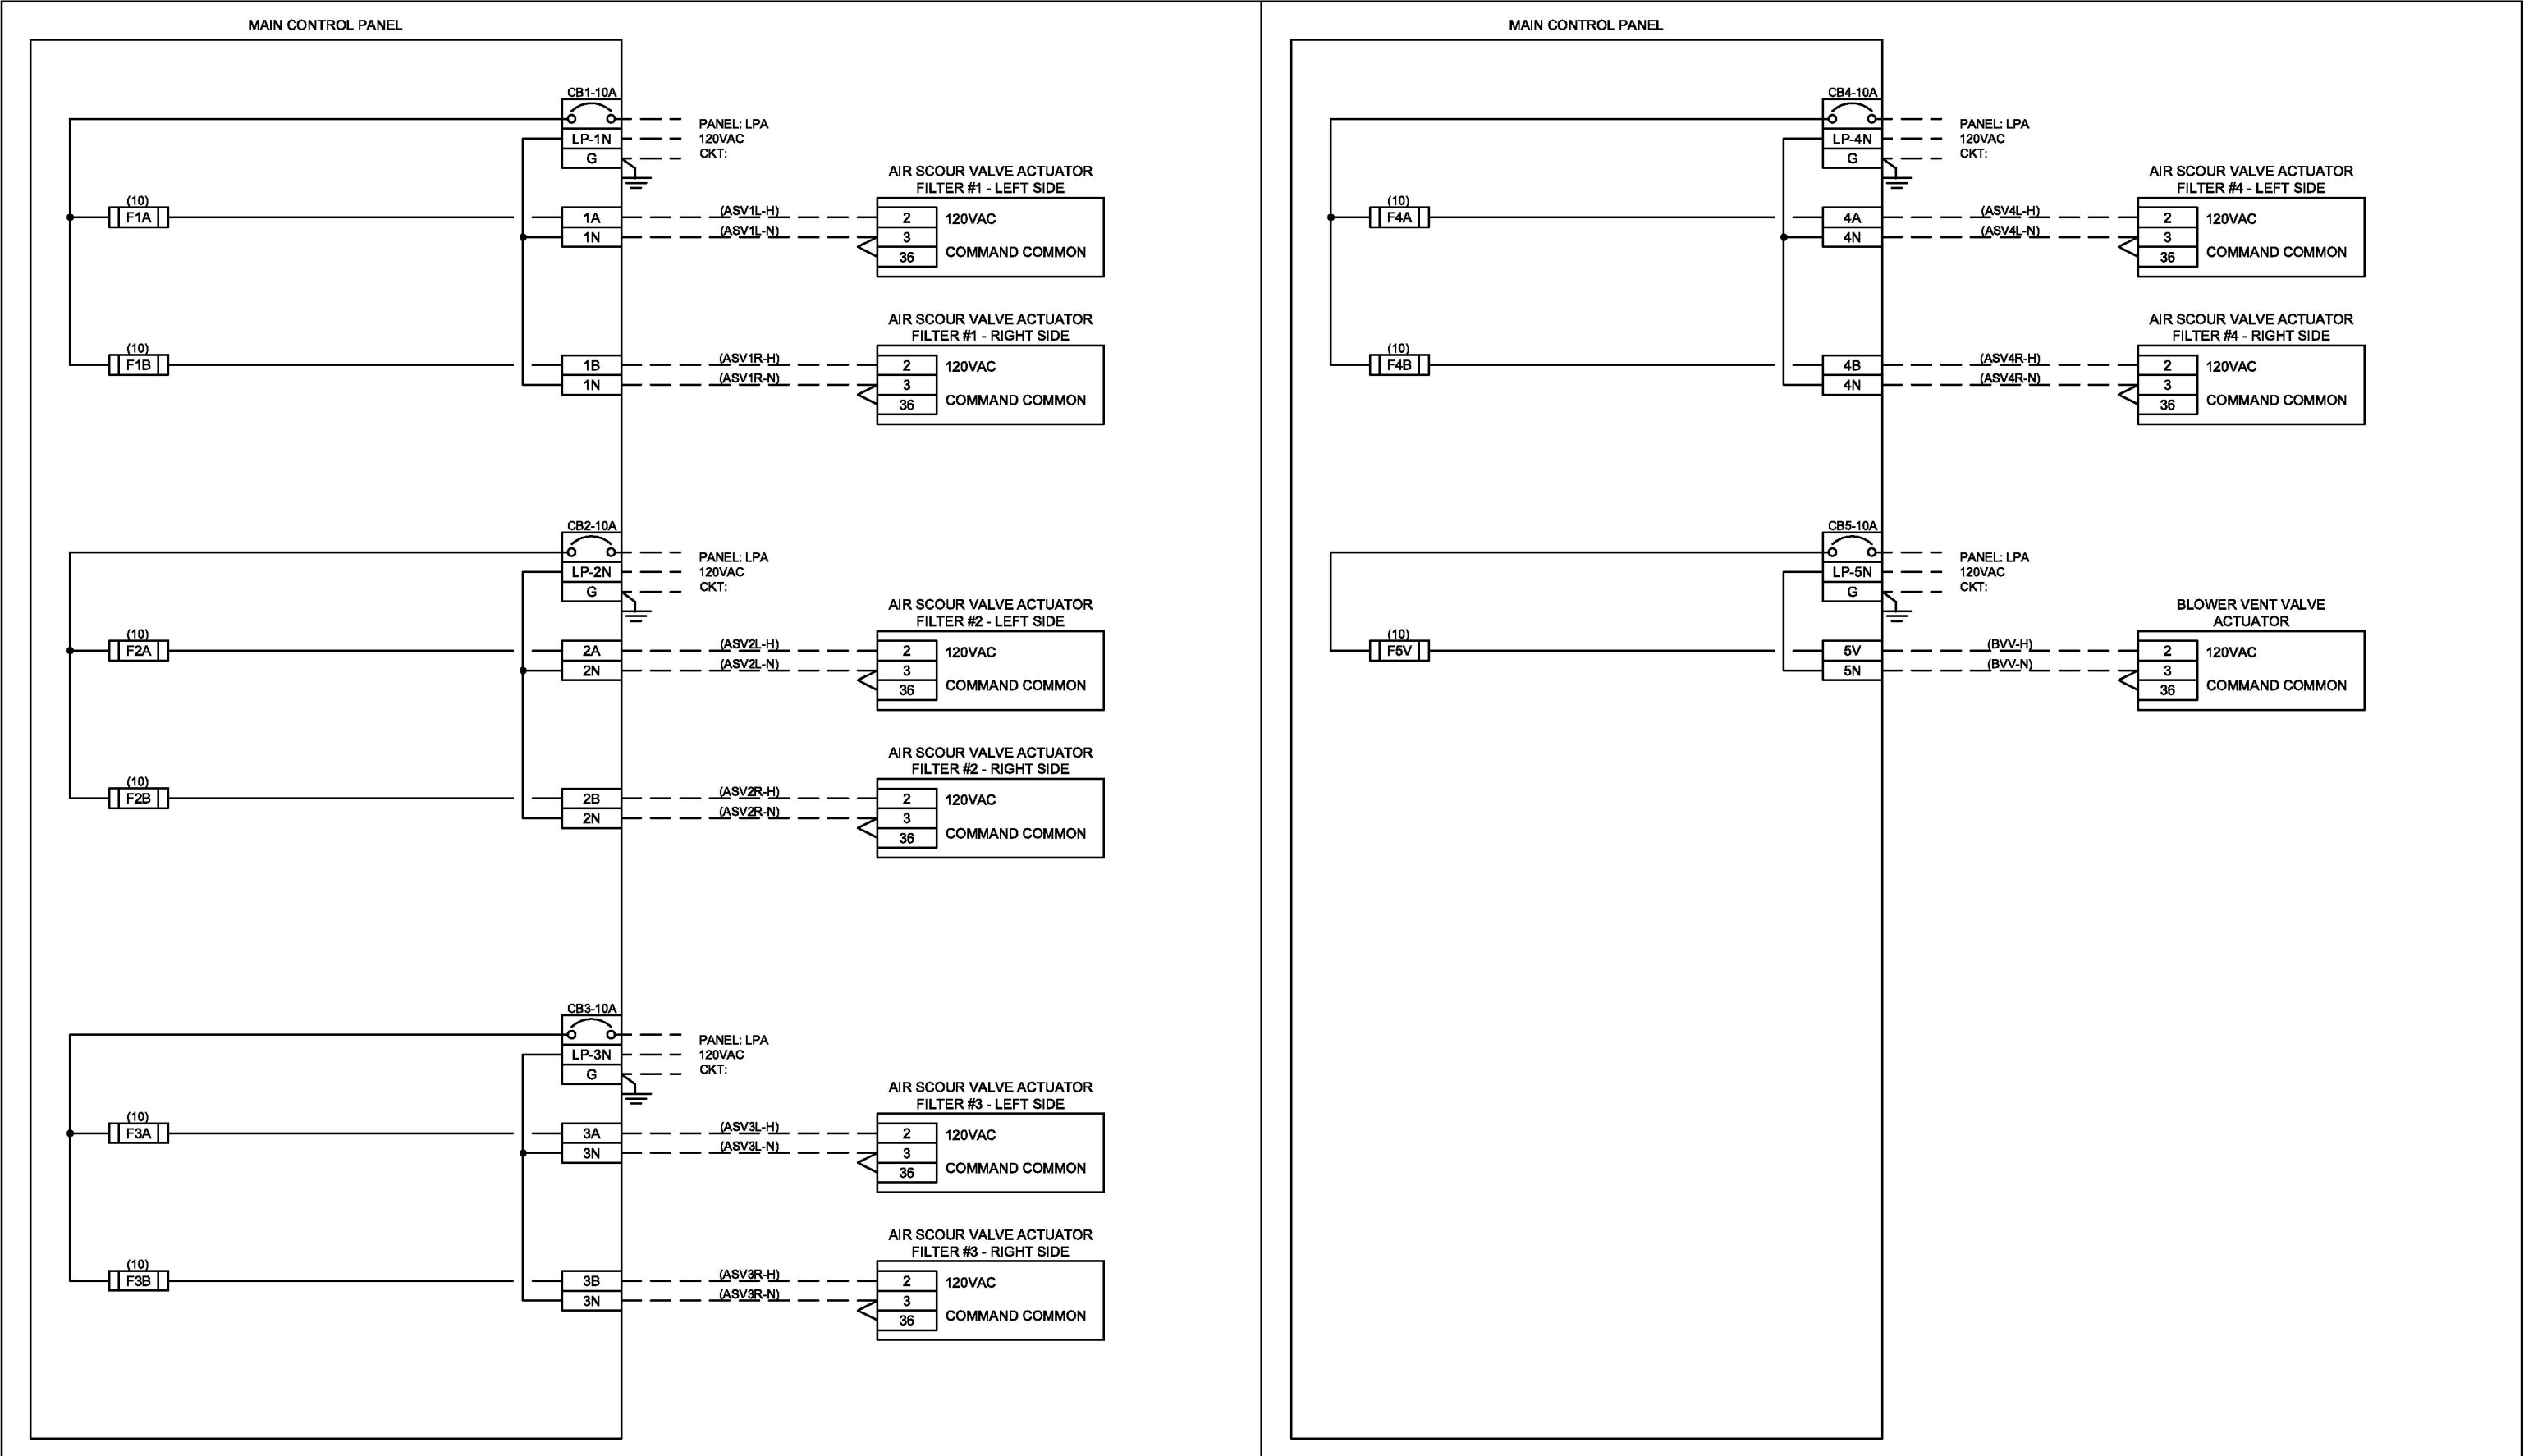

FIELD TERMINATIONS TORQUE TABLE

Purchasing Division

ADDENDUM NO. 2

DATE: June 26, 2018
FROM: City of Grand Junction Purchasing Division
TO: All Offerors
RE: Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition Automation System (SCADA) RFP-4525-18-DH

Offerors responding to the above referenced solicitation are hereby instructed that the requirements have been clarified, modified, superseded and supplemented as to this date as hereinafter described.

Please make note of the following clarifications:

1. The Responses Due Date and Time has been changed to **July 10, 2018 prior to 3:30pm.** During the inquiry period, the City missed answering a set of questions received from a prospective Bidder/Contractor during the inquiry period. Due to the nature and required responses of the questions, the bid opening is being rescheduled to the above-mentioned date and time.

Replace Section 3.7, IFB Tentative Timeline Schedule, within the bid documents with the updated timeline below:

3.7 IFB TENTATIVE TIME SCHEDULE

Invitation for Bids available:	May 29, 2018
Mandatory Pre-Bid Meeting:	June 6, 2018
Inquiry deadline, no questions after this date:	June 19, 2018
Final Addendum Posted:	June 27, 2018
Submittal deadline for proposals (Bid Opening):	July 10, 2018
Owner evaluation of proposals	July 11 - July 18, 2018
Final selection (unless City Council approval is required)	July 20, 2018
Contract execution	July 25, 2018
Work begins no later than	July 30, 2018

The original solicitation for the project noted above is amended as noted.

All other conditions of subject remain the same.

Respectfully,

A handwritten signature in black ink, appearing to read "Duane Hoff Jr.", written over a light blue horizontal line.

Duane Hoff Jr., Senior Buyer
City of Grand Junction, Colorado

Purchasing Division

ADDENDUM NO. 3

DATE: June 27, 2018
FROM: City of Grand Junction Purchasing Division
TO: All Offerors
RE: Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition Automation System (SCADA) RFP-4525-18-DH

Offerors responding to the above referenced solicitation are hereby instructed that the requirements have been clarified, modified, superseded and supplemented as to this date as hereinafter described.

Please make note of the following clarifications:

1. Q. If the City can provide physical VM Host servers at City Hall for SCADA VMs, please confirm approximately how many server resources (cores/memory) will be available for use.

A. The city will provide the required core and memory requirement for based on the software recommend requirements in it's VM environment.
2. Q. Please confirm if disk storage for SCADA servers at City Hall will be SAN, NAS, or DAS type.

A. Storage will be on one of the SAN devices.
3. Q. Please confirm if the City will also provide the required VM licenses.

A. The city's VM environment is correctly licensed.
4. Q. Please confirm if the City will be responsible for procurement/installation of all network equipment at City Hall and the WTP.

A. The City's I.T. Department will purchase and deploy the networking equipment to integrate into the city's infrastructure.
5. Q. If it is decided to install new SCADA servers (primary and/or backup servers) at the WTP, will the City or the SCADA provider be required to procure server/workstation hardware, software and necessary licenses?

A. The City will procure the servers hardware and all OS licenses to comply with the city's license agreements with Microsoft or other vendors warranty agreements.

6. Q. Please confirm the City Hall to WTP comms link will provide a minimum of 1Gbps dedicated BW for SCADA network needs.

A. See addendum 1

7. Q. Please provide network speed of the City Hall to WTP wireless remote link.

A. See addendum 1

8. Q. Please confirm if the City will provide a mail server and/or SMS modem for sending process alarm notifications to WTP support personnel.

A. The has a mail server that can be used to send emails from systems as needed. The city does not operate an SMS gateway at this time if this is required please provide recommendations for this service for evaluation.

9. Q. Will the City have its own Reporting SW /method for producing the required process/environmental reports, or will the SCADA provider need to provide a reporting solution?

A. Reporting will need to be part of the SCADA system. The can develop reports from the SCADA system reporting system.

10.Q. What format does the City require history data to be transferred/saved on the City Hall DWH repository?

A. History data need to be stored in a SQL type Database. The city is most familiar with Microsoft SQL as a database service.

11.Q. Are there any system performance KPI requirements (e.g. max allowed time from field device state change to SCADA GUI displaying the change)?

A. We're not sure what KPI is, but if it deals with a communication protocol, standard industry specs are fine.

12.Q. Please provide the approximate SCADA monitoring & control i/o count, and if available please send through the WTP SCADA i/o listing.

A. Please refer to Addendum 1

13.Q. If available, please provide a copy of existing WTP process control descriptions with SCADA functions identified.

A. Please refer to Addendum 1

14.Q. If available, please provide screen-shots of Redlion HMI GUIs.

A. See Attached.

15.Q. Please list all PLC comm protocols currently in use for communication between plant PLCs (and stand-alone smart devices) and the Redlion HMI, as well as any other monitoring/control HMIs.

A. All PLCs are stand-alone; no interface with other systems.

16.Q. What is the earliest date that intrusive site testing can occur? Are there limited (off-peak) hours we must work within?

A. If intrusive testing means that the plant must be shut down, we would prefer not until August as July is our high-demand month. The plant is staffed from 6AM to 5 PM.

The original solicitation for the project noted above is amended as noted.

All other conditions of subject remain the same.

Respectfully,

A handwritten signature in black ink, appearing to read "Duane Hoff Jr.", is enclosed in a yellow rectangular box.

Duane Hoff Jr., Senior Buyer

REQUEST FOR PROPOSAL

SECTION 1.0: ADMINISTRATIVE INFORMATION & CONDITIONS FOR SUBMITTAL

- 1.1 Issuing Office:** This Request for Proposal (RFP) is issued by the City of Grand Junction. All contact regarding this RFP is directed to:

RFP QUESTIONS:

Name, Title

Email

- 1.2 Purpose:** The purpose of this RFP is to obtain proposals from qualified professional firms to provide a SUPERVISORY CONTROL AND DATA ACQUISITION SYSTEM (SCADA).
- 1.3 The Owner:** The Owner is the City of Grand Junction, Colorado and is referred to throughout this Solicitation. The term Owner means the Owner or his authorized representative.
- 1.4 Site Visit/Briefing:** A **mandatory** site visit is required by all contractors intending to submit a response to this RFP. Any contractor that does not attend the **mandatory** site visit shall not be eligible to submit a response to this RFP. **The site visit shall be held at the City of Grand Junction Water Treatment Plant located at 244 26 ¼ Road, Grand Junction, CO on June 6, 2018 at 10:30am.**
- 1.5 Compliance:** All participating Offerors, by their signature hereunder, shall agree to comply with all conditions, requirements, and instructions of this RFP as stated or implied herein. Should the Owner omit anything from this packet which is necessary to the clear understanding of the requirements, or should it appear that various instructions are in conflict, the Offeror(s) shall secure instructions from the Purchasing Division prior to the date and time of the submittal deadline shown in this RFP.
- 1.6 Submission:** Please refer to section 5.0 for what is to be included. ***Each proposal shall be submitted in electronic format only, and only through the Rocky Mountain E-Purchasing website (<https://www.rockymountainbidssystem.com/default.asp>).*** ***This site offers both “free” and “paying” registration options that allow for full access of the Owner’s documents and for electronic submission of proposals. (Note: “free” registration may take up to 24 hours to process. Please Plan accordingly.)*** Please view our “**Electronic Vendor Registration Guide**” at <http://www.gjcity.org/business-and-economic-development/bids/> for details. For proper comparison and evaluation, the City requests that proposals be formatted as directed in Section 5.0 “Preparation and Submittal of Proposals.” Submittals received that fail to follow this format may be ruled non-responsive. (Purchasing Representative does not have access or control of the vendor side of RMEPS. If website or other problems arise during response submission, vendor **MUST** contact RMEPS to resolve issue prior to the response deadline. 800-835-4603).
- 1.7 Altering Proposals:** Any alterations made prior to opening date and time must be initialed by the signer of the proposal, guaranteeing authenticity. Proposals cannot be altered or amended after submission deadline.

- 1.8 Withdrawal of Proposal:** A proposal must be firm and valid for award and may not be withdrawn or canceled by the Offeror for sixty (60) days following the submittal deadline date, and only prior to award. The Offeror so agrees upon submittal of their proposal. After award this statement is not applicable.
- 1.9 Acceptance of Proposal Content:** The contents of the proposal of the successful Offeror shall become contractual obligations if acquisition action ensues. Failure of the successful Offeror to accept these obligations in a contract shall result in cancellation of the award and such vendor shall be removed from future solicitations.
- 1.10 Addenda:** All questions shall be submitted in writing to the appropriate person as shown in Section 1.1. Any interpretations, corrections and changes to this RFP or extensions to the opening/receipt date shall be made by a written Addendum to the RFP by the City Purchasing Division. Sole authority to authorize addenda shall be vested in the City of Grand Junction Purchasing Representative. Addenda will be issued electronically through the Rocky Mountain E-Purchasing website at www.rockymountainbidsystem.com. Offerors shall acknowledge receipt of all addenda in their proposal.
- 1.11 Exceptions and Substitutions:** All proposals meeting the intent of this RFP shall be considered for award. Offerors taking exception to the specifications shall do so at their own risk. The Owner reserves the right to accept or reject any or all substitutions or alternatives. When offering substitutions and/or alternatives, Offeror must state these exceptions in the section pertaining to that area. Exception/substitution, if accepted, must meet or exceed the stated intent and/or specifications. The absence of such a list shall indicate that the Offeror has not taken exceptions, and if awarded a contract, shall hold the Offeror responsible to perform in strict accordance with the specifications or scope of work contained herein.
- 1.12 Confidential Material:** All materials submitted in response to this RFP shall ultimately become public record and shall be subject to inspection after contract award. **“Proprietary or Confidential Information”** is defined as any information that is not generally known to competitors and which provides a competitive advantage. Unrestricted disclosure of proprietary information places it in the public domain. Only submittal information clearly identified with the words **“Confidential Disclosure”** and uploaded as a separate document shall establish a confidential, proprietary relationship. Any material to be treated as confidential or proprietary in nature must include a justification for the request. The request shall be reviewed and either approved or denied by the Owner. If denied, the proposer shall have the opportunity to withdraw its entire proposal, or to remove the confidential or proprietary restrictions. Neither cost nor pricing information nor the total proposal shall be considered confidential or proprietary.
- 1.13 Response Material Ownership:** All proposals become the property of the Owner upon receipt and shall only be returned to the proposer at the Owner’s option. Selection or rejection of the proposal shall not affect this right. The Owner shall have the right to use all ideas or adaptations of the ideas contained in any proposal received in response to this RFP, subject to limitations outlined in the entitled “Confidential Material”. Disqualification of a proposal does not eliminate this right.

- 1.14 Minimal Standards for Responsible Prospective Offerors:** A prospective Offeror must affirmably demonstrate their responsibility. A prospective Offeror must meet the following requirements.
- Have adequate financial resources, or the ability to obtain such resources as required.
 - Be able to comply with the required or proposed completion schedule.
 - Have a satisfactory record of performance.
 - Have a satisfactory record of integrity and ethics.
 - Be otherwise qualified and eligible to receive an award and enter into a contract with the Owner.
- 1.15 Open Records:** Proposals shall be received and publicly acknowledged at the location, date, and time stated herein. Offerors, their representatives and interested persons may be present. Proposals shall be received and acknowledged only so as to avoid disclosure of process. However, all proposals shall be open for public inspection after the contract is awarded. Trade secrets and confidential information contained in the proposal so identified by offer as such shall be treated as confidential by the Owner to the extent allowable in the Open Records Act.
- 1.16 Sales Tax:** The Owner is, by statute, exempt from the State Sales Tax and Federal Excise Tax; therefore, all fees shall not include taxes.
- 1.17 Public Opening:** Proposals shall be opened in the City Hall Auditorium, 250 North 5th Street, Grand Junction, CO, 81501, immediately following the proposal deadline. Offerors, their representatives and interested persons may be present. Only the names and locations on the proposing firms will be disclosed.

SECTION 2.0: GENERAL CONTRACT TERMS AND CONDITIONS

- 2.1. Acceptance of RFP Terms:** A proposal submitted in response to this RFP shall constitute a binding offer. Acknowledgment of this condition shall be indicated on the Letter of Interest or Cover Letter by the autographic signature of the Offeror or an officer of the Offeror legally authorized to execute contractual obligations. A submission in response to the RFP acknowledges acceptance by the Offeror of all terms and conditions including compensation, as set forth herein. An Offeror shall identify clearly and thoroughly any variations between its proposal and the Owner's RFP requirements. Failure to do so shall be deemed a waiver of any rights to subsequently modify the terms of performance, except as outlined or specified in the RFP.
- 2.2. Execution, Correlation, Intent, and Interpretations:** The Contract Documents shall be signed by the Owner and Contractor. By executing the contract, the Contractor represents that they have familiarized themselves with the local conditions under which the Work is to be performed, and correlated their observations with the requirements of the Contract Documents. The Contract Documents are complementary, and what is required by any one, shall be as binding as if required by all. The intention of the documents is to include all labor, materials, equipment, services and other items necessary for the proper execution and completion of the scope of work as defined in the technical specifications and drawings contained herein. All drawings, specifications and copies furnished by the Owner are, and shall remain, Owner property. They are not to be used on any other project.

- 2.3. Permits, Fees, & Notices:** The Contractor shall secure and pay for all permits, governmental fees and licenses necessary for the proper execution and completion of the work. The Contractor shall give all notices and comply with all laws, ordinances, rules, regulations and orders of any public authority bearing on the performance of the work. If the Contractor observes that any of the Contract Documents are at variance in any respect, he shall promptly notify the Owner in writing, and any necessary changes shall be adjusted by approximate modification. If the Contractor performs any work knowing it to be contrary to such laws, ordinances, rules and regulations, and without such notice to the Owner, he shall assume full responsibility and shall bear all costs attributable.
- 2.4. Responsibility for those Performing the Work:** The Contractor shall be responsible to the Owner for the acts and omissions of all his employees and all other persons performing any of the work under a contract with the Contractor.
- 2.5. Payment & Completion:** The Contract Sum is stated in the Contract and is the total amount payable by the Owner to the Contractor for the performance of the work under the Contract Documents. Upon receipt of written notice that the work is ready for final inspection and acceptance and upon receipt of application for payment, the Owner's Project Manager will promptly make such inspection and, when they find the work acceptable under the Contract Documents and the Contract fully performed, the Owner shall make payment in the manner provided in the Contract Documents. Partial payments will be based upon estimates, prepared by the Contractor, of the value of Work performed and materials placed in accordance with the Contract Documents. The work performed by Contractor shall be in accordance with generally accepted professional practices and the level of competency presently maintained by other practicing professional firms in the same or similar type of work in the applicable community. The work and services to be performed by Contractor hereunder shall be done in compliance with applicable laws, ordinances, rules and regulations.
- 2.6. Protection of Persons & Property:** The Contractor shall comply with all applicable laws, ordinances, rules, regulations and orders of any public authority having jurisdiction for the safety of persons or property or to protect them from damage, injury or loss. Contractor shall erect and maintain, as required by existing safeguards for safety and protection, and all reasonable precautions, including posting danger signs or other warnings against hazards promulgating safety regulations and notifying owners and users of adjacent utilities. When or where any direct or indirect damage or injury is done to public or private property by or on account of any act, omission, neglect, or misconduct by the Contractor in the execution of the work, or in consequence of the non-execution thereof by the Contractor, they shall restore, at their own expense, such property to a condition similar or equal to that existing before such damage or injury was done, by repairing, rebuilding, or otherwise restoring as may be directed, or it shall make good such damage or injury in an acceptable manner.
- 2.7. Changes in the Work:** The Owner, without invalidating the contract, may order changes in the work within the general scope of the contract consisting of additions, deletions or other revisions. All such changes in the work shall be authorized by Change Order/Amendment and shall be executed under the applicable conditions of the contract documents. A Change Order/Amendment is a written order to the Contractor signed by

the Owner issued after the execution of the contract, authorizing a change in the work or an adjustment in the contract sum or the contract time.

- 2.8. Minor Changes in the Work:** The Owner shall have authority to order minor changes in the work not involving an adjustment in the contract sum or an extension of the contract time and not inconsistent with the intent of the contract documents.
- 2.9. Uncovering & Correction of Work:** The Contractor shall promptly correct all work found by the Owner as defective or as failing to conform to the contract documents. The Contractor shall bear all costs of correcting such rejected work, including the cost of the Owner's additional services thereby made necessary. The Owner shall give such notice promptly after discover of condition. All such defective or non-conforming work under the above paragraphs shall be removed from the site where necessary and the work shall be corrected to comply with the contract documents without cost to the Owner.
- 2.10. Acceptance Not Waiver:** The Owner's acceptance or approval of any work furnished hereunder shall not in any way relieve the proposer of their present responsibility to maintain the high quality, integrity and timeliness of his work. The Owner's approval or acceptance of, or payment for, any services shall not be construed as a future waiver of any rights under this Contract, or of any cause of action arising out of performance under this Contract.
- 2.11. Change Order/Amendment:** No oral statement of any person shall modify or otherwise change, or affect the terms, conditions or specifications stated in the resulting contract. All amendments to the contract shall be made in writing by the Owner.
- 2.12. Assignment:** The Offeror shall not sell, assign, transfer or convey any contract resulting from this RFP, in whole or in part, without the prior written approval from the Owner.
- 2.13. Compliance with Laws:** Proposals must comply with all Federal, State, County and local laws governing or covering this type of service and the fulfillment of all ADA (Americans with Disabilities Act) requirements. Contractor hereby warrants that it is qualified to assume the responsibilities and render the services described herein and has all requisite corporate authority and professional licenses in good standing, required by law.
- 2.14. Debarment/Suspension:** The Contractor hereby certifies that the Contractor is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Governmental department or agency.
- 2.15. Confidentiality:** All information disclosed by the Owner to the Offeror for the purpose of the work to be done or information that comes to the attention of the Offeror during the course of performing such work is to be kept strictly confidential.
- 2.16. Conflict of Interest:** No public official and/or Owner employee shall have interest in any contract resulting from this RFP.
- 2.17. Contract:** This Request for Proposal, submitted documents, and any negotiations, when properly accepted by the Owner, shall constitute a contract equally binding between the Owner and Offeror. The contract represents the entire and integrated agreement between

the parties hereto and supersedes all prior negotiations, representations, or agreements, either written or oral, including the Proposal documents. The contract may be amended or modified with Change Orders, Field Orders, or Amendment.

- 2.18. Project Manager/Administrator:** The Project Manager, on behalf of the Owner, shall render decisions in a timely manner pertaining to the work proposed or performed by the Offeror. The Project Manager shall be responsible for approval and/or acceptance of any related performance of the Scope of Services.
- 2.19. Contract Termination:** This contract shall remain in effect until any of the following occurs: (1) contract expires; (2) completion of services; (3) acceptance of services or, (4) for convenience terminated by either party with a written *Notice of Cancellation* stating therein the reasons for such cancellation and the effective date of cancellation at least thirty days past notification.
- 2.20. Employment Discrimination:** During the performance of any services per agreement with the Owner, the Offeror, by submitting a Proposal, agrees to the following conditions:
- 2.20.1. The Offeror shall not discriminate against any employee or applicant for employment because of race, religion, color, sex, age, disability, citizenship status, marital status, veteran status, sexual orientation, national origin, or any legally protected status except when such condition is a legitimate occupational qualification reasonably necessary for the normal operations of the Offeror. The Offeror agrees to post in conspicuous places, visible to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.
 - 2.20.2. The Offeror, in all solicitations or advertisements for employees placed by or on behalf of the Offeror, shall state that such Offeror is an Equal Opportunity Employer.
 - 2.20.3. Notices, advertisements, and solicitations placed in accordance with federal law, rule, or regulation shall be deemed sufficient for the purpose of meeting the requirements of this section.
- 2.21. Immigration Reform and Control Act of 1986 and Immigration Compliance:** The Offeror certifies that it does not and will not during the performance of the contract employ illegal alien workers or otherwise violate the provisions of the Federal Immigration Reform and Control Act of 1986 and/or the immigration compliance requirements of State of Colorado C.R.S. § 8-17.5-101, *et.seq.* (House Bill 06-1343).
- 2.22. Ethics:** The Offeror shall not accept or offer gifts or anything of value nor enter into any business arrangement with any employee, official, or agent of the Owner.
- 2.23. Failure to Deliver:** In the event of failure of the Offeror to deliver services in accordance with the contract terms and conditions, the Owner, after due oral or written notice, may procure the services from other sources and hold the Offeror responsible for any costs resulting in additional purchase and administrative services. This remedy shall be in addition to any other remedies that the Owner may have.

- 2.24. Failure to Enforce:** Failure by the Owner at any time to enforce the provisions of the contract shall not be construed as a waiver of any such provisions. Such failure to enforce shall not affect the validity of the contract or any part thereof or the right of the Owner to enforce any provision at any time in accordance with its terms.
- 2.25. Force Majeure:** The Offeror shall not be held responsible for failure to perform the duties and responsibilities imposed by the contract due to legal strikes, fires, riots, rebellions, and acts of God beyond the control of the Offeror, unless otherwise specified in the contract.
- 2.26. Indemnification:** Offeror shall defend, indemnify and save harmless the Owner and all its officers, employees, insurers, and self-insurance pool, from and against all liability, suits, actions, or other claims of any character, name and description brought for or on account of any injuries or damages received or sustained by any person, persons, or property on account of any negligent act or fault of the Offeror, or of any Offeror's agent, employee, subcontractor or supplier in the execution of, or performance under, any contract which may result from proposal award. Offeror shall pay any judgment with cost which may be obtained against the Owner growing out of such injury or damages.
- 2.27. Independent Firm:** The Offeror shall be legally considered an Independent Firm and neither the Firm nor its employees shall, under any circumstances, be considered servants or agents of the Owner. The Owner shall be at no time legally responsible for any negligence or other wrongdoing by the Firm, its servants, or agents. The Owner shall not withhold from the contract payments to the Firm any federal or state unemployment taxes, federal or state income taxes, Social Security Tax or any other amounts for benefits to the Firm. Further, the Owner shall not provide to the Firm any insurance coverage or other benefits, including Workers' Compensation, normally provided by the Owner for its employees.
- 2.28. Nonconforming Terms and Conditions:** A proposal that includes terms and conditions that do not conform to the terms and conditions of this Request for Proposal is subject to rejection as non-responsive. The Owner reserves the right to permit the Offeror to withdraw nonconforming terms and conditions from its proposal prior to a determination by the Owner of non-responsiveness based on the submission of nonconforming terms and conditions.
- 2.29. Ownership:** All plans, prints, designs, concepts, etc., shall become the property of the Owner.
- 2.30. Oral Statements:** No oral statement of any person shall modify or otherwise affect the terms, conditions, or specifications stated in this document and/or resulting agreement. All modifications to this request and any agreement must be made in writing by the Owner.
- 2.31. Patents/Copyrights:** The Offeror agrees to protect the Owner from any claims involving infringements of patents and/or copyrights. In no event shall the Owner be liable to the Offeror for any/all suits arising on the grounds of patent(s)/copyright(s) infringement. Patent/copyright infringement shall null and void any agreement resulting from response to this RFP.

- 2.32. Venue:** Any agreement as a result of responding to this RFP shall be deemed to have been made in, and shall be construed and interpreted in accordance with, the laws of the City of Grand Junction, Mesa County, Colorado.
- 2.33. Expenses:** Expenses incurred in preparation, submission and presentation of this RFP are the responsibility of the company and cannot be charged to the Owner.
- 2.34. Sovereign Immunity:** The Owner specifically reserves its right to sovereign immunity pursuant to Colorado State Law as a defense to any action arising in conjunction to this agreement.
- 2.35. Public Funds/Non-Appropriation of Funds:** Funds for payment have been provided through the Owner's budget approved by the City Council/Board of County Commissioners for the stated fiscal year only. State of Colorado statutes prohibit the obligation and expenditure of public funds beyond the fiscal year for which a budget has been approved. Therefore, anticipated orders or other obligations that may arise past the end of the stated Owner's fiscal year shall be subject to budget approval. Any contract will be subject to and must contain a governmental non-appropriation of funds clause.
- 2.36. Collusion Clause:** Each Offeror by submitting a proposal certifies that it is not party to any collusive action or any action that may be in violation of the Sherman Antitrust Act. Any and all proposals shall be rejected if there is evidence or reason for believing that collusion exists among the proposers. The Owner may or may not, at the discretion of the Owner Purchasing Representative, accept future proposals for the same service or commodities for participants in such collusion.
- 2.37. Gratuities:** The Contractor certifies and agrees that no gratuities or kickbacks were paid in connection with this contract, nor were any fees, commissions, gifts or other considerations made contingent upon the award of this contract. If the Contractor breaches or violates this warranty, the Owner may, at their discretion, terminate this contract without liability to the Owner.
- 2.38. Performance of the Contract:** The Owner reserves the right to enforce the performance of the contract in any manner prescribed by law or deemed to be in the best interest of the Owner in the event of breach or default of resulting contract award.
- 2.39. Benefit Claims:** The Owner shall not provide to the Offeror any insurance coverage or other benefits, including Worker's Compensation, normally provided by the Owner for its employees.
- 2.40. Default:** The Owner reserves the right to terminate the contract in the event the Contractor fails to meet delivery or completion schedules, or otherwise perform in accordance with the accepted proposal. Breach of contract or default authorizes the Owner to purchase like services elsewhere and charge the full increase in cost to the defaulting Offeror.
- 2.41. Multiple Offers:** If said proposer chooses to submit more than one offer, THE ALTERNATE OFFER must be clearly marked "Alternate Proposal". The Owner reserves the right to make award in the best interest of the Owner.

2.42. Cooperative Purchasing: Purchases as a result of this solicitation are primarily for the Owner. Other governmental entities may be extended the opportunity to utilize the resultant contract award with the agreement of the successful provider and the participating agencies. All participating entities will be required to abide by the specifications, terms, conditions and pricings established in this Proposal. The quantities furnished in this proposal document are for only the Owner. It does not include quantities for any other jurisdiction. The Owner will be responsible only for the award for our jurisdiction. Other participating entities will place their own awards on their respective Purchase Orders through their purchasing office or use their purchasing card for purchase/payment as authorized or agreed upon between the provider and the individual entity. The Owner accepts no liability for payment of orders placed by other participating jurisdictions that choose to piggy-back on our solicitation. Orders placed by participating jurisdictions under the terms of this solicitation will indicate their specific delivery and invoicing instructions.

2.43. Definitions:

- 2.43.1. "Offeror" and/or "Proposer" refers to the person or persons legally authorized by the Consultant to make an offer and/or submit a response (fee) proposal in response to the Owner's RFP.
- 2.43.2. The term "Work" includes all labor, materials, equipment, and/or services necessary to produce the requirements of the Contract Documents.
- 2.43.3. "Contractor" is the person, organization, firm or consultant identified as such in the Agreement and is referred to throughout the Contract Documents. The term Contractor means the Contractor or his authorized representative. The Contractor shall carefully study and compare the General Contract Conditions of the Contract, Specification and Drawings, Scope of Work, Addenda and Modifications and shall at once report to the Owner any error, inconsistency or omission he may discover. Contractor shall not be liable to the Owner for any damage resulting from such errors, inconsistencies or omissions. The Contractor shall not commence work without clarifying Drawings, Specifications, or Interpretations.
- 2.43.4. "Sub-Contractor" is a person or organization who has a direct contract with the Contractor to perform any of the work at the site. The term sub-contractor is referred to throughout the contract documents and means a sub-contractor or his authorized representative.

2.44. Public Disclosure Record: If the Proposer has knowledge of their employee(s) or sub-proposers having an immediate family relationship with an Owner employee or elected official, the proposer must provide the Purchasing Representative with the name(s) of these individuals. These individuals are required to file an acceptable "Public Disclosure Record", a statement of financial interest, before conducting business with the Owner.

SECTION 3.0: INSURANCE REQUIREMENTS
--

3.1 Insurance Requirements: The selected Firm agrees to procure and maintain, at its own cost, policy(s) of insurance sufficient to insure against all liability, claims, demands, and other obligations assumed by the Firm pursuant to this Section. Such insurance shall be in addition to any other insurance requirements imposed by this Contract or by law. The Firm shall not be relieved of any liability, claims, demands, or other obligations assumed pursuant

to this Section by reason of its failure to procure or maintain insurance in sufficient amounts, durations, or types.

Firm shall procure and maintain and, if applicable, shall cause any Subcontractor of the Firm to procure and maintain insurance coverage listed below. Such coverage shall be procured and maintained with forms and insurers acceptable to The Owner. All coverage shall be continuously maintained to cover all liability, claims, demands, and other obligations assumed by the Firm pursuant to this Section. In the case of any claims-made policy, the necessary retroactive dates and extended reporting periods shall be procured to maintain such continuous coverage. Minimum coverage limits shall be as indicated below unless specified otherwise in the Special Conditions:

(a) Worker Compensation insurance to cover obligations imposed by applicable laws for any employee engaged in the performance of work under this Contract, and Employers' Liability insurance with minimum limits of:

ONE MILLION DOLLARS (\$1,000,000) each accident,
ONE MILLION DOLLARS (\$1,000,000) disease - policy limit, and
ONE MILLION DOLLARS (\$1,000,000) disease - each employee

(b) General Liability insurance with minimum combined single limits of:

ONE MILLION DOLLARS (\$1,000,000) each occurrence and
ONE MILLION DOLLARS (\$1,000,000) per job aggregate.

The policy shall be applicable to all premises, products and completed operations. The policy shall include coverage for bodily injury, broad form property damage (including completed operations), personal injury (including coverage for contractual and employee acts), blanket contractual, products, and completed operations. The policy shall include coverage for explosion, collapse, and underground (XCU) hazards. The policy shall contain a severability of interests provision.

(c) Comprehensive Automobile Liability insurance with minimum combined single limits for bodily injury and property damage of not less than:

ONE MILLION DOLLARS (\$1,000,000) each occurrence and
ONE MILLION DOLLARS (\$1,000,000) aggregate

(d) Professional Liability & Errors and Omissions Insurance policy with a minimum of:

ONE MILLION DOLLARS (\$1,000,000) per claim

This policy shall provide coverage to protect the contractor against liability incurred as a result of the professional services performed as a result of responding to this Solicitation.

With respect to each of Consultant's owned, hired, or non-owned vehicles assigned to be used in performance of the Work. The policy shall contain a severability of interests provision.

- 3.2 Additional Insured Endorsement:** The policies required by paragraphs (b), and (c) above shall be endorsed to include the Owner and the Owner's officers and employees as additional insureds. Every policy required above shall be primary insurance, and any insurance carried by the Owner, its officers, or its employees, or carried by or provided through any insurance pool of the Owner, shall be excess and not contributory insurance to that provided by Contractor. The Contractor shall be solely responsible for any deductible losses under any policy required above.

SECTION 4.0: SPECIFICATIONS/SCOPE OF SERVICES

4.1. General/Background:

The City of Grand Junction is in Mesa County, Colorado on the western slope of the Rocky Mountains, midway between Denver, Colorado and Salt Lake City, Utah. Grand Junction is a full-service City operating under a Council-City Manager structure. It is the County Seat and is the largest city on the western slope of Colorado with a population of approximately 60,000 within City Limits and approximately 145,000 county-wide.

The City has 9,700 of taps serving approximately 28,000 customers. The water department is responsible for maintaining 353 miles of distribution pipe, two water treatment plants, 19 reservoirs and associated raw water transmission pipes. Many of these facilities are in remote locations. The main water treatment plant (WTP), located in Orchard Mesa, was commissioned in 1969.

The Water Treatment Plant (WTP) is a direct filtration plant rated to 16 MGD. Currently the WTP unit processes are controlled by a Redlion Touchscreen Graphic Operator Interface (GCI). The GCI and associated PLC were installed during upgrade of the filters in 2017. The upgrade also included the blowers for air scour during backwash cycles. Raw water is brought into the plant where ACH and a cationic polymer are added, the water runs through an in-line flash mixer and then to an outdoor "contact basin" (floc basin). Water is then brought directly back into the plant for filtration. Up to 4 filters are utilized, depending on flow rates. The filters are dual media filters with IMS caps installed during the 2017 upgrade. Filtered water then gets dosed with sodium hypochlorite, which is produced in a separate building on site, then moves through a clearwell and finally into two 4-million gallon storage tanks before entering the distribution system.

The Kannah Creek Water Plant (KCWTP) is rated to 0.2 MGD and serves approximately 150 taps for a small rural community southeast of Grand Junction. The KCWTP has a 10-year-old stand-alone SCADA system used for controlling unit processes. KCWTP is also a direct filtration plant. Coagulants are injected and the raw water is directed through a large diameter pipe which serves as a floc basin by providing adequate detention time. Coagulated water flows through a filter consisting of anthracite, sand, and garnet sand. Filtered water flows into a 40,000 gallon clearwell and is pumped into storage tanks about $\frac{3}{4}$ of a mile away.

The City of Grand Junction is seeking proposals from qualified vendors to assist with development and implementation of a comprehensive, fully featured System Control and Data Acquisition system for the water treatment plant, collection and distribution systems. It is the intent of the water department to implement SCADA improvements to the system in phases over the next several years.

Full implementation of the SCADA improvements for the water treatment plant, distribution and supply systems will be completed in multiple phases.

This solicitation relates to the first phase of this project and requires the selected vendor to provide the following deliverables:

- Design Technical Memorandum including but not limited to identifying the scope and probable cost for each phase to be implemented with each annual budget cycle, the number of phases needed for full implementation, security, training, remote capabilities
- Identify, procure and implement hardware, software, licencing, etc. such that the Water Treatment Plan is operable from the new SCADA system, including as much of the existing process equipment (i.e. filters, blowers, chorine production, etc) as can be included withing the 2018 Plant Improvement Bugdet.
- Training for Plant operators and other pertinent personnel on SCADA system operation.
- Maintenance and support following Final Acceptance of each project phase.

4.2. Special Conditions/Provisions:

4.2.1. Project Objectives:

4.2.1.1. Identify options for SCADA system types of hardware, software and implementation strategies. Develop an overall plan for implementing SCADA at the WTP that creates a roadmap for expanding the system as the City can make upgrades and tie in additional components as budget allows. It is intended that the Water Supply, Treatment and Distribution Systems will be tied into the SCADA system centralized at the WTP at Orchard Mesa. Server storage and backup will be located at the main IT facility at City of Grand Junction City Hall. Full integration will be a multi-phase endeavor over several years. Phase 1 includes design, procurement and implementation of the backbone of the SCADA system and integrate existing equipment at the WTP that is capable of being directly connected to this system and communication to the servers at City Hall by December 31, 2018. Phase 1 also includes a design report and preliminary (30%) design identifying number and scope of future phases to complete full buildout and implementation of the SCADA system over the next several years.

Design report must identify existing and possible future physical locations for SCADA equipment, servers, workstations, routers, and switches. Discuss equipment placement as it relates to reliability, operational efficiency, operational functionality, physical security, environmental effects, expandability, network connection options, back-up electrical power sources, server failover and recovery options.

4.2.1.2. Study existing process control strategies and adequacy of existing monitoring and control functions. Consider ways to improve or optimize the level of monitoring and control. Consider existing features that should be retained and shortcomings that should be addressed.

4.2.1.3. Develop an understanding of the existing telemetric backbone methodology including physical locations and issues. Discuss remote access options including alarm features, as well "read only" access, and full control levels of access. Describe

the pros and cons of each as well as the required equipment and software necessary for implementation.

4.2.1.4. Identify potential operational, maintenance, IT, training, business, and strategic needs.

4.2.1.5. The Water Treatment Plant is considered critical infrastructure for the City of Grand Junction. As such security is of paramount importance. During plant modifications and implementation of the SCADA system, plant shutdown time must be kept to a minimum.

4.2.1.6. Attachment A is an inventory of functions the Water Department manages that it believes could be implemented into a SCADA system. The inventory includes local and remote equipment and processes. It also tries to identify future needs. This list is not exhaustive, but is meant to be a starting point for responders to understand the system and make more complete recommendations.

Attachment B is a selection of one-line diagrams and as-builts to assist in understanding the current system at the WTP.

4.2.2. Site Access

Proposers must pay particular attention to site access requirements. City of Grand Junction Water Treatment Plants, supply facilities and distribution systems are considered part of the City's critical infrastructure. As such, access is limited to authorized personnel. Access to each site must be scheduled and coordinated with the City. Obtaining appropriate site access permission is the responsibility of the Proposer.

4.2.3. Locations

The Proposer should address where the SCADA Monitoring/Control System, and associated hardware should be located. Options include installing new equipment at the WTP, or utilizing the City's network servers at City Hall. In either case, backup data should be stored, at a minimum, at the servers at City Hall.

4.2.4. Materials and Services

Information provided as a response to this RFP should discuss the design, software licensing, programming, installation, testing, startup and commissioning of a complete SCADA system for up to 10 users.

The Proposer should address the City's desire to have the system implemented in phases. Recommendations for said phasing are encouraged in response.

The proposed SCADA system should be based on a packaged software product. The Responder will provide information on software licensing, security, and programming required to implement such a system.

4.2.5. The Proposer should outline a training program including, but not limited to the following personnel:

- Operators, including the use of HMI, trending, alarms/notifications, data logging, communication, and analysis/reporting features.
- SCADA System Administrators and SCADA technicians, including configuring interface and troubleshooting

- IT System Administrators responsible for ongoing operation of computer hardware and software components.

4.2.6. Maintenance and Support

Responders should outline options for maintenance and support of SCADA system, service agreement options, warranty information if available, etc.

4.2.7. Consider current security practices with respect to National Institute of Standards and Technology (NIST) and Department of Homeland Security (DHS) guidelines. Explain your security practices on the following topics and any additional topics:

4.2.7.1. Password/Authentication Management and Complexity Requirements

Weak passwords introduce vulnerabilities to the control systems network. In addition, sometimes passwords are hard-coded into software to facilitate control system internal communications allowing anyone with access to the code/configuration files knowledge of the password(s).

The Vendor shall provide a configurable account password management system that allows for selection of password length, frequency of change, setting of required password complexity, number of login attempts, inactive session logout, screen lock by application, and denial of repeated or recycled use of the same password.

The Vendor shall not store passwords electronically or in Vendor-supplied hardcopy documentation in clear text unless the media is physically protected.

The Vendor shall control configuration interface access to the account management system

4.2.7.2. Removal of Unnecessary Services and Programs

Unused services in a host operating system that are left enabled are possible entry points for exploits on the network and are generally not monitored because these services are not used. Only the services used for control systems operation and maintenance shall be enabled to limit possible entry points.

The Vendor shall provide a list of services required for any computer system running the control system applications or required to interface with the control system applications. The list shall include all ports and services required for normal operation as well as any other ports and services required for emergency operation. The list shall also include an explanation or cross reference to justify why each service is necessary for operation.

The Vendor shall verify and provide documentation that all services are patched to status.

The Vendor shall provide, within a pre-negotiated period, appropriate software and service updates and/or workarounds to mitigate all vulnerabilities associated with the product and to maintain the established level of system security.

4.2.7.3. Disabling, Removal or Modifying of Default/Backdoor, Well-Known or Guest Accounts

Default accounts and passwords are available on many control systems and are often publicly available in published materials allowing unauthorized system access.

The Vendor shall recommend which accounts need to be active and those that can be disabled, removed, or modified.

The Vendor shall disable, remove, or modify all the accounts pursuant to the approved recommendation. Once changed, accounts will not be published except that new account information and passwords will be provided by the Vendor via protected media.

4.2.7.4. Account Auditing and Logging

Logging and auditing of both active and disabled accounts are useful for anomaly and unauthorized access detection. However, cyber attackers commonly modify audit logs to cover activities.

The Vendor shall provide a system whereby account activity is logged and is auditable both from a management (policy) and operational (account use activity) perspective.

The Vendor shall time stamp, encrypt, and control access to audit trails and log files.

The Vendor shall ensure audit logging does not adversely impact the system performance requirements.

4.2.7.5. File System Auditing and Logging

The Vendor shall configure hosts with least-privilege file and account access and provide documentation of the configuration.

The Vendor shall configure the necessary system services to execute at the least user privilege level possible for that service and provide documentation of the configuration.

The Vendor shall document that changing or disabling access to such files and functions has been completed.

4.2.7.6. Separation of Employment Notifications to Customer

Integrators and companies that support control systems are very dynamic and competitive, resulting in frequent turnover of key support personnel potentially exposing sensitive information.

Prior to contract award, the Vendor shall provide a separation agreement to delineate how Vendor employees who have sensitive knowledge of the City's control systems and who leave their positions or have responsibilities changed will be prohibited from disclosing that knowledge, where disclosure could lead to a reduction in security.

The Vendor shall notify the City within a pre-negotiated period when key personnel leave or change positions, should it possibly impact control system security.

The Vendor shall provide detailed documentation on how the control system security can be maintained and supported in the event the Vendor leaves the business (e.g., security-related procedures and products placed in escrow).

The Vendor shall return to the City any sensitive data in the Vendor's possession when the Vendor is no longer able to maintain control of the City's products.

4.2.7.7. Firmware and Software Vaulting practices

Software flaws are a primary avenue for gaining system access. Many control system security vulnerabilities are the direct result of writing software with inadequate attention to defense against deliberate and persistent malicious attack. These vulnerabilities are particularly threatening because the control system can be compromised by bypassing normal access control checks, such as firewalls. In such attacks, control system traffic will appear normal as far as the network is concerned. A common method of attack to infect

many customers it replaces Firmware and software code available for download by customer base.

Vaulting is a method in which software which is known to be uncorrupted is stored in an off-line location or as a read-only version to be used/restored when active code has been compromised.

Vendor shall provide documentation how they protect firmware and software in case of corruption or infection of available version. Documentation shall include methods for testing public available versions and verification against known vaulted versions.

4.2.7.8. End Device Security:

IED – Intelligent Electronic Devices can be used as access points to other systems that perform command and control functions. The devices are used to provide system control at the lowest level of a process and are vulnerable to communication interception and modification. Hardware and software (e.g., portable configuration computers) are needed to program IED's. IED's and configuration computers need to be secured by physical and cyber means.

RTU – Remote Terminal Units can be used as access points to other systems that perform command and control functions. The devices are used to provide system control at the lowest level of a process and are vulnerable to communication interception and modification. Hardware and software (e.g., portable configuration computers) are needed to program RTU's. RTU's and configuration computers need to be secured by physical and cyber means.

PLC – Programmable Logic Controllers can be used as access points to other systems that perform command and control functions. PLCs communicate over open networks that are vulnerable to communication interception and modification. Hardware and software (e.g., portable configuration computers) are needed to program PLCs. PLCs and configuration computers need to be secured by physical and cyber means.

Misc. Sensor, Actuators, Meters and other devices can be used as access points to other systems (e.g., PLCs and IED's) that perform command and control functions. These devices communicate over networks that are vulnerable to communication interception and modification. Hardware and software (e.g., portable configuration computers) are needed to program smart devices. Smart devices and configuration computers need to be secured by physical and cyber means.

The Vendor shall provide physical and cyber security features including, but not limited to, authentication, encryption, access control, event and communication logging, monitoring, and alarming to protect the device and configuration computer from unauthorized modification or use.

The Vendor shall clearly identify the physical and cyber security features and provide the methodologies for maintaining the features, including the methods to change settings from the Vendor-configured or manufacturer default conditions.

The Vendor shall verify that the addition of security features does not adversely affect connectivity, latency, bandwidth, response time, and throughput, when connected to existing equipment.

The Vendor shall remove or disable all software components that are not required for the operation and maintenance of the device. The Vendor shall provide documentation on what is removed and/or disabled.

The Vendor shall provide, within a pre-negotiated period, appropriate software and service updates and/or workarounds to mitigate all vulnerabilities associated with the product and to maintain the established level of system security.

4.2.7.9. Firewall and Intrusion Detection System/Intrusion Prevention System (IDS/IPS) Rules

Firewalls are used to stop unauthorized connections, or to allow limited communications between two networks or from a network to a networked device. Firewalls fall into four broad categories: packet filters, circuit level gateways, application level gateways, and stateful multilayer inspection firewalls. Firewalls can be implemented in software, hardware, or a combination of both. While IDS/IPS is used to identify unauthorized or abnormal network traffic.

The Vendor shall provide firewall/IDS rule sets between network zones.

The Vendor shall provide firewall/IDS rule sets and/or other equivalent documentation. The basis of the rule set shall be “deny all,” with exceptions explicitly identified by the Vendor. This information is deemed business sensitive and shall be protected as such.

Following contract award, the Vendor shall provide detailed information on all communications (including protocols) required through a firewall/IDS, whether inbound or outbound, and identify each network device initiating a communication in accordance with the corresponding rule sets.

4.2.7.10. Patching (Operating System, Application and required Third-Party Software)

Patches and software updates, including those for anti-virus scanners, are required to reduce attack surface. Most successful cyber attacks occur in non-patched systems or applications.

The Vendor shall have a patch management and update process to include support of operating system patch support, vendor application patching, all required third party software, and the support for city’s antivirus/antimalware (Endpoint Protection) product.

Prior to contract award, the Vendor shall provide details on their patch management and update process. Responsibility for installation and update of patches shall be identified.

Following contract award, the Vendor shall provide notification of known vulnerabilities affecting Vendor-supplied or required OS, application, and third-party software within a pre-negotiated period after public disclosure. Vendor will assist mitigating issues with City’s support EndPoint Protection Product.

Following contract award, the Vendor shall provide notification of patches affecting security within a pre-negotiated period as identified in the patch management process. The Vendor shall apply, test, and validate the appropriate updates and/or workarounds on a baseline reference system before distribution. Mitigation of these vulnerabilities shall occur within a pre-negotiated period.

4.2.7.11. Malware Detection and Protection

Malicious code, worms, viruses, and Trojans can propagate through a control system and potentially impact or curtail operations.

The Vendor shall disclose the existence and reasons for any known or identified backdoor codes that Malware could be used to compromise a system.

Vendor will assist mitigating issues with City’s support Endpoint Protection Product.

The Vendor shall disclose any attacks against the vendor's system that involved a malware incident that could potential compromise the City's Systems. Vendor will provide documentation of the remediation of the incident.

4.2.7.12. Wireless Technologies

Wireless technologies refer to any technology, such as radio, microwave, or infrared waves, which allows analog and digital communication without the use of wires. Wireless Technologies may include well known methods such as: Bluetooth, 802.11 (WiFi), ZigBee, Zwave, WirelessHart, Cellular, WiMAX, Radio/Microwave, and Satellite.

Following contract award, the Vendor shall provide specific protocols and other detailed information required for the wireless device to communicate with the control network, including other wireless equipment that can communicate with the Vendor-supplied device.

The Vendor shall provide documentation on the range of the wireless device and power requirements.

The wireless system shall provide encryption of radio signals. The Vendor shall clearly identify these security devices and methods to change them from the Vendor-configured or manufacture default conditions.

4.2.8. Maintenance and Support

The Vendor should outline options for maintenance and support of SCADA system, service agreement options, warranty information if available. At a minimum the selected Vendor will provide maintenance service for a minimum of 3 years and a warranty for 1 year all materials and workmanship from the date of Final Acceptance of the SCADA system.

4.2.9. Pricing

The Proposer pricing shall be all inclusive for all recommended hardware options, software packages, service agreements, training, startup, labor, travel, etc. to fulfill the project requirements successfully.

Proposer are required to provide accurate and complete pricing for use in the evaluation, including any licensing and pricing options.

4.2.10. Other Services

Proposers may include any other services that are considered necessary to complete this project, or which would, in the judgement of the Proposer, improve the capability or increase the value of the proposed system.

4.3. **Specifications/Scope of Services:** The project is to be completed with the following tasks:

- 1) Project Management and Coordination
- 2) SCADA System Design
- 3) SCADA System Software, Equipment Procurement, Configuration, and Installation
- 4) Training, Instructions and Documentation
- 5) System Maintenance and services

Task 1: Project Management and Coordination

Project Initiation: Selected proposer shall develop a project schedule for creating design plans and report specifically to complete Phase 1 to meet integration deadline of December 31, 2018. The schedule should also outline future phases as they correlate with the plans described in Task 2 below. The Schedule shall show individual tasks described in the scope of work for the project and identify key milestone dates. The Proposer Project Manager (PM) shall maintain and update the project schedule as work proceeds. The PM will be assigned to this project for the duration of the work.

Work Task Coordination: The Consultant PM shall assign and coordinate all work tasks being accomplished, including those to be performed by sub-consultants, to ensure project work is completed on schedule.

Project Team Coordination: The City PM and the Consultant PM shall maintain ongoing communication about the project on a frequent and regular basis. Each PM shall provide the other with

- Written synopsis of their respective contracts (both telephone or in person) with others
- Copies of pertinent written communications, including electronic (email) correspondence
- Early identification of potential problems

Progress Meetings: The City and Consultant shall meet, either in person or by telephone conference calls, at regularly scheduled Project Working Group Meetings held at approximate two-week intervals throughout the project. Meetings shall include consultant PM, City PM, and Water Resources Manager. The Project Working Group Meetings shall be used to coordinate the work effort and resolve any outstanding issues or problems. The meetings shall focus on the following topics:

- Activities completed since last meeting
- Problems encountered or anticipated
- Late activities/activities slipping behind schedule
- Solutions for unresolved or newly identified problems
- Schedule of upcoming activities
- Information on items required, or comments from Federal agencies.

The Consultant PM shall prepare a written summary report of the general discussions held including all action items assigned. This scope assumes six (6) Project Working Group Meetings via conference call.

Reporting Requirements: The Consultant PM shall provide the following on a routine basis:

Monthly status reports (percent of design components complete) and monthly billings.

Task 2: SCADA System Design

Proposers should expect to develop a fully documented design for all SCADA components, including the WTP and remote sites (KCWTP, remote monitoring locations, pumps, valves, intakes, etc.) prior to the actual performance of any installation, configuration, or

development work in each phase. Plans of improvements shall include physical modifications to WTP, hardware installation, one-line diagrams, component details, etc.

Design documentation shall include a technical memorandum outlining all phases of the SCADA system implementation. The memorandum shall provide basis for design, design plans, schematics and details that will be used for installation, details of hardware components, software. The memorandum shall include recommendations for improving processes, data recording, analysis, reporting, alarms/alerts, security (both physical and cyber security) and troubleshooting and recovery. Memorandum will outline recommended phasing of additional component integration that may be used for future expansion of the SCADA system. The memorandum shall outline initial installation/integration schedule, the proposed training program and system maintenance and service programs.

Cost estimation is a critical part of the design phase of this project. The design must include costs of all hardware, software licensing, installation and operations costs of for the first three (3) years of operation. This is a key factor when considering budget and determining phasing of SCADA system integration.

Three (3) design submittals are required. 30% design and 90% design submittals shall have comments and responses. The third submittal will be final design prior to installation of the SCADA system.

Task 3: SCADA System Software, Equipment Procurement, Configuration, and Installation

Software Implementation: The SCADA system shall be based on a packaged software product. The successful proposer will provide all required software licensing and programming required to implement the SCADA system according to the approved design. A total of 10 users are expected to require access to the SCADA system.

The successful proposer will be required to integrate or migrate existing configurations or create new configurations for all required screens, scripts, functions, reports, trends, logic blocks, communications and other system elements to ensure complete and equivalent capability in the new system as compared to the City's existing operations.

System Startup and Acceptance Testing: Proposals shall include the start-up, integration and testing elements of the SCADA system, including acceptance testing. The existing operation system must be maintained to run in parallel until the new system has been accepted. Acceptance Testing shall be proposed for each phase of work.

Task 4: Training, Instructions and Documentation

The City of Grand Junction believes that thorough, effective training will be critical to attaining its objectives. Training should be proposed for:

- Operators, including use of HMI, Trending, Alarms, alarm notifications, data logging, communications, analysis and reporting features.
- SCADA System Administrators and SCADA Technicians, including configuration interface and troubleshooting the SCADA system.

- IT System Administrators, responsible for ongoing operation of the computer hardware and software components.

The City of Grand Junction also requires both system and user documentation (hardcopy and electronic formats that can be updated by the City). The technical system documentation will describe the system architecture, system logic, and operating requirements in sufficient detail for City staff to understand and take over technical support of the system. The user documentation will include an easy-to-use “cheat sheet” for reference by users.

Task 5: System Maintenance and services

Proposers shall include maintenance services for all components of the SCADA system including hardware, software and communications (except for computer, networking and communication elements provided by the City) for a period of 3 years following Final Acceptance of the system. It is expected that the vendor will provide warranty on materials delivered for a period of 1 year from the date of Final Acceptance.

Other Services:

Proposals may include any other services that are considered necessary to complete this project in a turnkey fashion, or which would, in the judgement of the Proposer, improve the capability or increase the value of the delivered system.

- 4.4. Site Visit/Briefing:** A **mandatory** site visit is required by all contractors intending to submit a response to this RFP. Any contractor that does not attend the **mandatory** site visit shall not be eligible to submit a response to this RFP. **The site visit shall be held at the City of Grand Junction Water Treatment Plant located at 244 26 ¼ Road, Grand Junction, CO on June 6, 2018 at 10:30am.**

4.5. RFP Tentative Time Schedule:

- | | |
|--|----------------------|
| • Request for Proposal available | May 29, 2018 |
| • Mandatory Site Visit | June 6, 2018 |
| • Inquiry deadline, no questions after this date | June 19, 2018 |
| • Addendum Posted | June 23, 2018 |
| • Submittal deadline for proposals | June 28, 2018 |
| • Owner evaluation of proposals | June 29-July 6, 2018 |
| • Final selection (unless City Council approval is required) | July 11, 2018 |
| • Contract execution | July 13, 2018 |
| • Work begins no later than | July 18, 2018 |

4.6. Questions Regarding Scope of Services:

Duane Hoff Jr., Senior Buyer
duaneh@gjcity.org

SECTION 5.0: PREPARATION AND SUBMITTAL OF PROPOSALS

Submission: *Each proposal shall be submitted in electronic format only, and only through the **Rocky Mountain E-Purchasing** website (<https://www.rockymountainbidsystem.com/default.asp>). This site offers both “free” and “paying” registration options that allow for full access of the Owner’s documents and for electronic submission of proposals. (Note: “free” registration may take up to 24 hours to process. Please Plan accordingly.)* Please view our “**Electronic Vendor Registration Guide**” at <http://www.gjcity.org/BidOpenings.aspx> for details. (Purchasing Representative does not have access or control of the vendor side of RMEPS. If website or other problems arise during response submission, vendor **MUST** contact RMEPS to resolve issue prior to the response deadline **800-835-4603**). For proper comparison and evaluation, the City requests that proposals be formatted as directed in Section 5.0 “Preparation and Submittal of Proposals.” Offerors are required to indicate their interest in this Project, show their specific experience and address their capability to perform the Scope of Services in the Time Schedule as set forth herein. For proper comparison and evaluation, the Owner requires that proposals be formatted **A to F**:

- A. Cover Letter:** Cover letter shall be provided which explains the Firm’s interest in the project. The letter shall contain the name/address/phone number/email of the person who will serve as the firm's principal contact person with Owner’s Contract Administrator and shall identify individual(s) who will be authorized to make presentations on behalf of the firm. The statement shall bear the signature of the person having proper authority to make formal commitments on behalf of the firm. By submitting a response to this solicitation the Contractor agrees to all requirements herein.
- B. Qualifications/Experience/Credentials:** Proposers shall provide their qualifications for consideration as a contract provider to the City of Grand Junction/Mesa County and include prior experience in similar projects.
- C. Strategy and Implementation Plan:** Describe your (the firm’s) interpretation of the Owner’s objectives with regard to this RFP. Describe the proposed strategy and/or plan for achieving the objectives of this RFP. The Firm may utilize a written narrative or any other printed technique to demonstrate their ability to satisfy the Scope of Services. The narrative should describe a logical progression of tasks and efforts starting with the initial steps or tasks to be accomplished and continuing until all proposed tasks are fully described and the RFP objectives are accomplished. Include a **time schedule** for completion of your firm’s implementation plan and an estimate of time commitments from Owner staff.
- D. References:** A minimum of three (3) **references** with name, address, telephone number, and email address that can attest to your experience in projects of similar scope and size.
- E. Fee Proposal:** In addition to providing all-inclusive pricing for this project using the Solicitation Response form Found in Section 7, also provide a complete breakdown list of pricing.
- F. Additional Data (optional):** Provide any additional information that will aid in evaluation of your qualifications with respect to this project.

SECTION 6.0: EVALUATION CRITERIA AND FACTORS

- 6.1 Evaluation:** An evaluation team shall review all responses and select the proposal or proposals that best demonstrate the capability in all aspects to perform the scope of services and possess the integrity and reliability that will ensure good faith performance.
- 6.2 Intent:** Only respondents who meet the qualification criteria will be considered. Therefore, it is imperative that the submitted proposal clearly indicate the firm's ability to provide the services described herein.

Submittal evaluations will be done in accordance with the criteria and procedure defined herein. The Owner reserves the right to reject any and all portions of proposals and take into consideration past performance. The following parameters will be used to evaluate the submittals (in no particular order of priority):

- Responsiveness of submittal to the RFP
- Understanding of the project and the objectives
- Experience/Required Skills
- Necessary resources
- Strategy & Implementation Plan
- References
- Fees

Owner also reserves the right to take into consideration past performance of previous awards/contracts with the Owner of any vendor, contractor, supplier, or service provider in determining final award(s).

The Owner will undertake negotiations with the top rated firm and will not negotiate with lower rated firms unless negotiations with higher rated firms have been unsuccessful and terminated.

- 6.3 Oral Interviews:** The Owner may invite the most qualified rated proposers to participate in oral interviews.
- 6.4 Award:** Firms shall be ranked or disqualified based on the criteria listed in Section 6.2. The Owner reserves the right to consider all of the information submitted and/or oral presentations, if required, in selecting the project Contractor.

SECTION 7.0: SOLICITATION RESPONSE FORM

RFP-4525-8-DH WATER TREATMENT PLANT, COLLECTION AND DISTRIBUTION SUPERVISORY CONTROL AND DATA ACQUISITION AUTOMATION SYSTEM (SCADA)

Offeror must submit entire Form completed, dated and signed.

- 1) Total all inclusive pricing to provide all labor, parts, supplies, equipment, installation, etc. necessary for the Water Treatment Plant, Collection and Distribution Supervisory Control and Data Acquisition Automation System (SCADA) per specifications:

TOTAL COST \$ _____

WRITTEN: _____ dollars.

The Owner reserves the right to accept any portion of the work to be performed at its discretion

The undersigned has thoroughly examined the entire Request for Proposals and therefore submits the proposal and schedule of fees and services attached hereto.

This offer is firm and irrevocable for sixty (60) days after the time and date set for receipt of proposals.

The undersigned Offeror agrees to provide services and products in accordance with the terms and conditions contained in this Request for Proposal and as described in the Offeror's proposal attached hereto; as accepted by the Owner.

Prices in the proposal have not knowingly been disclosed with another provider and will not be prior to award.

- Prices in this proposal have been arrived at independently, without consultation, communication or agreement for the purpose of restricting competition.
- No attempt has been made nor will be to induce any other person or firm to submit a proposal for the purpose of restricting competition.
- The individual signing this proposal certifies they are a legal agent of the offeror, authorized to represent the offeror and is legally responsible for the offer with regard to supporting documentation and prices provided.
- Direct purchases by the City of Grand Junction are tax exempt from Colorado Sales or Use Tax. Tax exempt No. 98-903544. The undersigned certifies that no Federal, State, County or Municipal tax will be added to the above quoted prices.
- City of Grand Junction payment terms shall be Net 30 days.
- Prompt payment discount of _____ percent of the net dollar will be offered to the Owner if the invoice is paid within _____ days after the receipt of the invoice.

RECEIPT OF ADDENDA: the undersigned Contractor acknowledges receipt of Addenda to the Solicitation, Specifications, and other Contract Documents. State number of Addenda received: _____.

It is the responsibility of the Proposer to ensure all Addenda have been received and acknowledged.

Reservoir #3 & 4 Bypass Valve Control
Raw Water Intake Structure telemetry
Watershed Reservoir Telemetry & Valve control
Monitoring of PRV stations on Flowline
Asset Management System

Data Processing / Storage

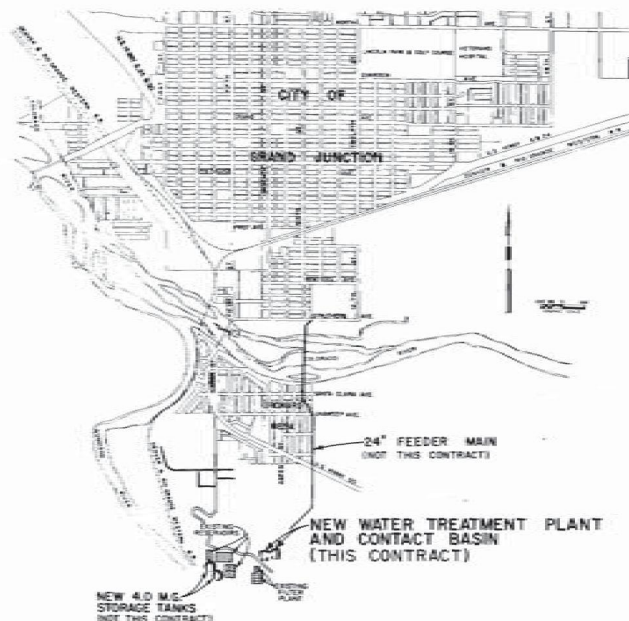

Capture 4-hour turbidity/chlorine readings for compliance
Flow totalizers
high/low events (turb, chlorine, flow, etc.)
Calculate real-time CT
Headloss calculation
Accept Operator inputs for daily labs & chemical usage
Track chemical inventory
Track Filter run times
Track filter loading rate
calculate backwash gpm/sf

- NOTES**
1. VALVES TO BE EQUAL TO "CABOT" TV SERIES UNION TYPE BALL VALVE.
 2. ALL FITTINGS UNDER FILTER TO BE THREADED SCHEDULE 80. USE NO SOLVENT WELDED CONNECTIONS.
 3. VALVE "A" IS INTENDED TO BE USED TO THROTTLE FLOW OF WATER FROM THE UNDERDRAIN OF THE FILTER INTO THE CLEARWELL. THIS VALVE MUST BE CLOSED DURING BACKWASHING.
 4. VALVE "B" IS TO BE CLOSED ONLY IN EXCESSIVE PUMPING OF WATER TOGETHER WITH AIR OCCURS.
 5. PIPING WITHIN FILTER UNDERDRAIN IS TO BE SUPPORTED BY ADJUSTABLE PIPE SCALED CHAIRS AS MANUFACTURED BY BURKE CONCRETE ACCESSORIES, INC. CHAIRS ARE TO BE GALVANIZED.

GENERAL NOTES

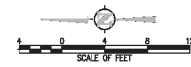

LOWER LEVEL AND PIPE GALLERY PLAN

3/16" = 1'-0"

PHASE I DEMO NOTES:

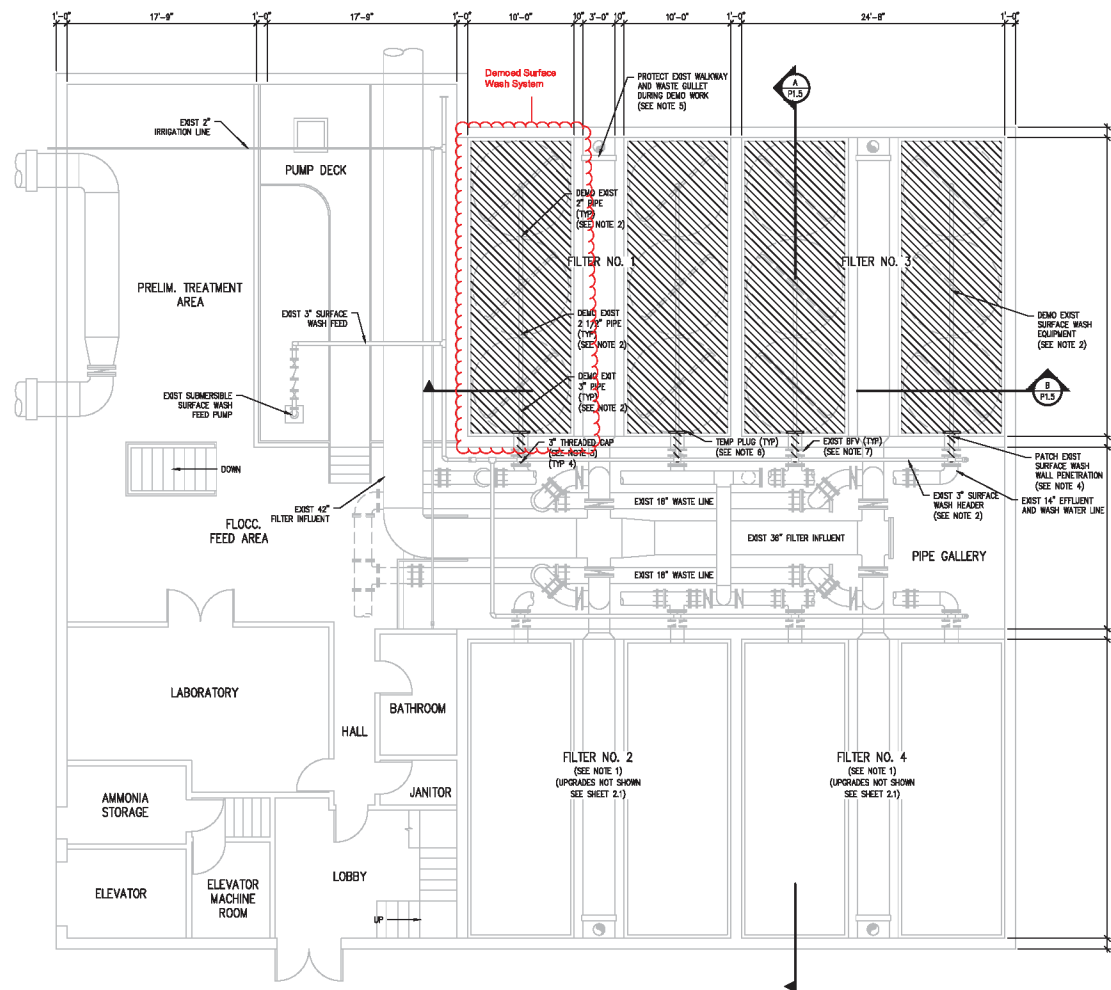

1. FILTERS 1 AND 3 MUST REMAIN IN OPERATION WHILE FILTERS 2 AND 4 ARE BEING DEMOED. ONCE FILTERS 2 AND 4 ARE FULLY FUNCTIONAL AND OPERATIONAL, CONTRACTOR CAN BEGIN DEMO WORK ON FILTERS 1 AND 3, AFTER OWNER'S APPROVAL.
2. DEMO ALL SURFACE WASH EQUIPMENT, PIPING, SUPPORTS, BEAMS, SPRAY NOZZLES, ETC. FROM INSIDE FILTERS UP TO SURFACE WASH HEADER AS SHOWN (TYP).
3. INSTALL THREADED CAP IN SURFACE WASH HEADER WHERE FILTER SURFACE WASH PIPING WAS DEMOED.
4. PATCH PIPE PENETRATION BY ROUGHENING CONCRETE SURFACE TO 1/4" AMPLITUDE, INSTALLING EXPANDING TYPE WATERSTOP (WATERSTOP RX OR EQUAL), AND PATCH WITH NON-SHRINK GROUT TO MATCH EXISTING WALL SURFACES.
5. PROTECT EXIST WALKWAY, WASTE GULLET, AND TROUSERS DURING DEMO PHASE.
6. PROTECT VALVES, SEAL EFFLUENT PIPE LEAVING THE FILTERS WITH WATER-TIGHT SEAL (I.E. TEMP PLUG).
7. CITY TO ISOLATE EFFLUENT VALVE PRIOR TO DEMO.

PHASE II DEMO NOTES:

1. FILTERS 2 AND 4 MUST BE IN OPERATION WHILE FILTERS 1 AND 3 ARE BEING DEMOED.
2. DEMO ALL SURFACE WASH EQUIPMENT, PIPING, SUPPORTS, BEAMS, SPRAY NOZZLES, ETC. FROM INSIDE FILTERS UP TO SURFACE WASH HEADER AS SHOWN (TYP).
3. INSTALL THREADED CAP IN SURFACE WASH HEADER WHERE FILTER SURFACE WASH PIPING WAS DEMOED.
4. PATCH PIPE PENETRATION BY ROUGHENING CONCRETE SURFACE TO 1/4" AMPLITUDE, INSTALLING EXPANDING TYPE WATERSTOP (WATERSTOP RIL OR EQUAL), AND PATCH WITH NON-SHRINK GROUT TO MATCH EXISTING WALL SURFACES.
5. PROTECT EXIST WALKWAY, WASTE GALLEY AND TROUGHS DURING DEMO PHASE.
6. PROTECT WALKWAY, SEAL EFFLUENT PIPE LEAVING THE FILTERS WITH WATERSTOP SEAL (I.E. TEMP PLUG).
7. CITY TO ISOLATE EFFLUENT VALVE PRIOR TO DEMO.

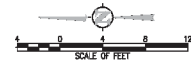

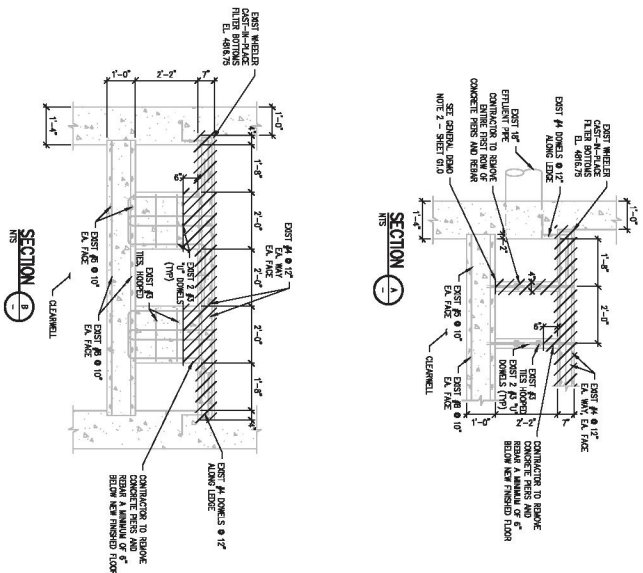

FILTER BOTTOM/CLEARWELL PLAN
5/18 - 1'-4"

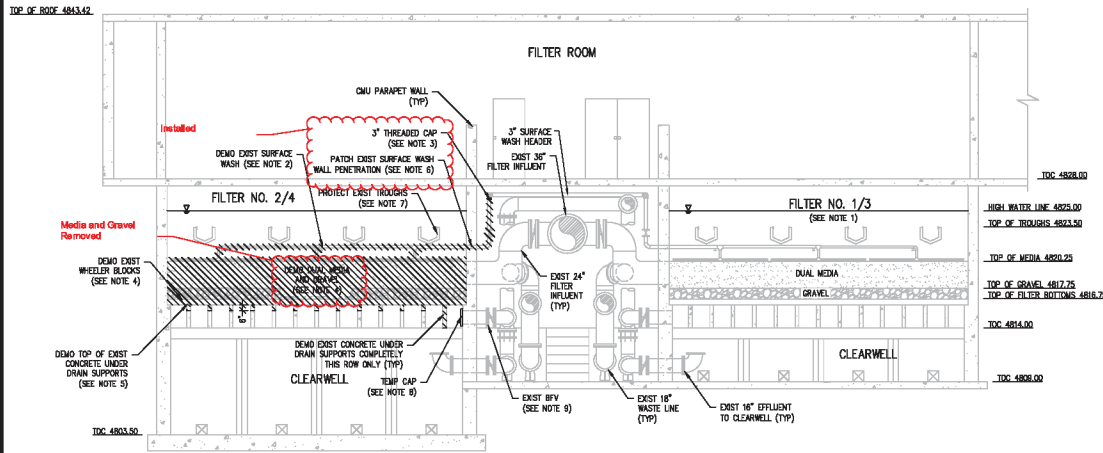

- PHASE I DEMO NOTES:**
1. FILTERS 1 AND 3 MUST REMAIN IN OPERATION WHILE FILTERS 2 AND 4 ARE BEING DEMOLISHED. ONCE FILTERS 2 AND 4 ARE FULLY FUNCTIONAL AND OPERATIONAL, CONTRACTOR CAN BEGIN DEMO WORK ON FILTERS 1 AND 3. AFTER OWNERS APPROVAL.
 2. DEMO OF FILTERS INCLUDES REMOVAL OF ALL SURFACE WASH EQUIPMENT WITHIN FILTERS, SAND, ANTHRACITE, GRAVEL, WHEELER UNDERGRANS AND CONCRETE AS NEEDED TO PREPARE THE FILTER FOR THE ADDITION OF AIR SCOUR AND NEW LEOPOLD UNDERGRANS.
 3. DEMO EXIST CONCRETE SUPPORT BLOCKS A MINIMUM OF 6\"/>
 4. PROTECT EXIST WALKWAY, WASTE GULLEY AND TROUGHS DURING DEMO PHASE.
 5. PROTECT VALVES, SEAL EFFLUENT PIPE LEAVING THE FILTERS WITH WATER-TIGHT SEAL (I.E. TEMP PLUG).
 6. CITY TO ISOLATE EFFLUENT VALVE PRIOR TO DEMO.

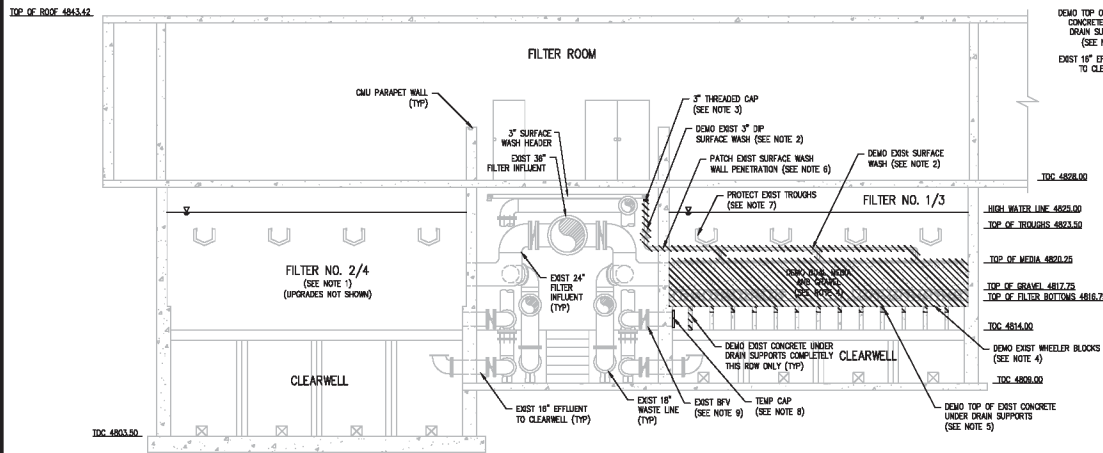

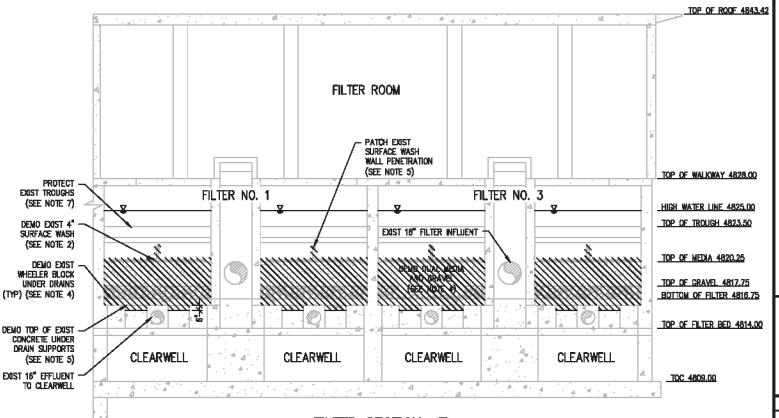

1. PHASE II DEMO NOTES:
1. FLETCHES 2 AND 4 MUST BE IN OPERATION WHILE FLETCHES 3 AND 5 ARE BEING DEMOLISHED.
2. DEMO OF FLETCHES INCLUDES REMOVAL OF ALL SURFACE DEMO EQUIPMENT WITHIN FLETCHES, SMO, AIR TREATMENT, AND WINDMILL. DEMO OF FLETCHES 2 AND 4 MUST BE COMPLETED WITHIN 10 DAYS OF THE DEMO OF FLETCHES 3 AND 5.
3. DEMO EXIST CONCRETE SUPPORT SLABS A MINIMUM OF 6" BELOW FINISHED FLOOR.
4. PROTECT EXIST WALKWAYS, WASTE SLATES AND TROUSERS DRAINAGE DEMO PHASE.
5. PROJECT VAPORS, SEAL EFFLUENT PPE LEAVING THE FLETCHES WITH WATERPROOF SEAL (IE: NEW) DEMO.
6. CUT TO ISOLATE EFFLUENT VALVE PRIOR TO DEMO.

SECTION - PHASE I DEMO
3/18 - 1-5

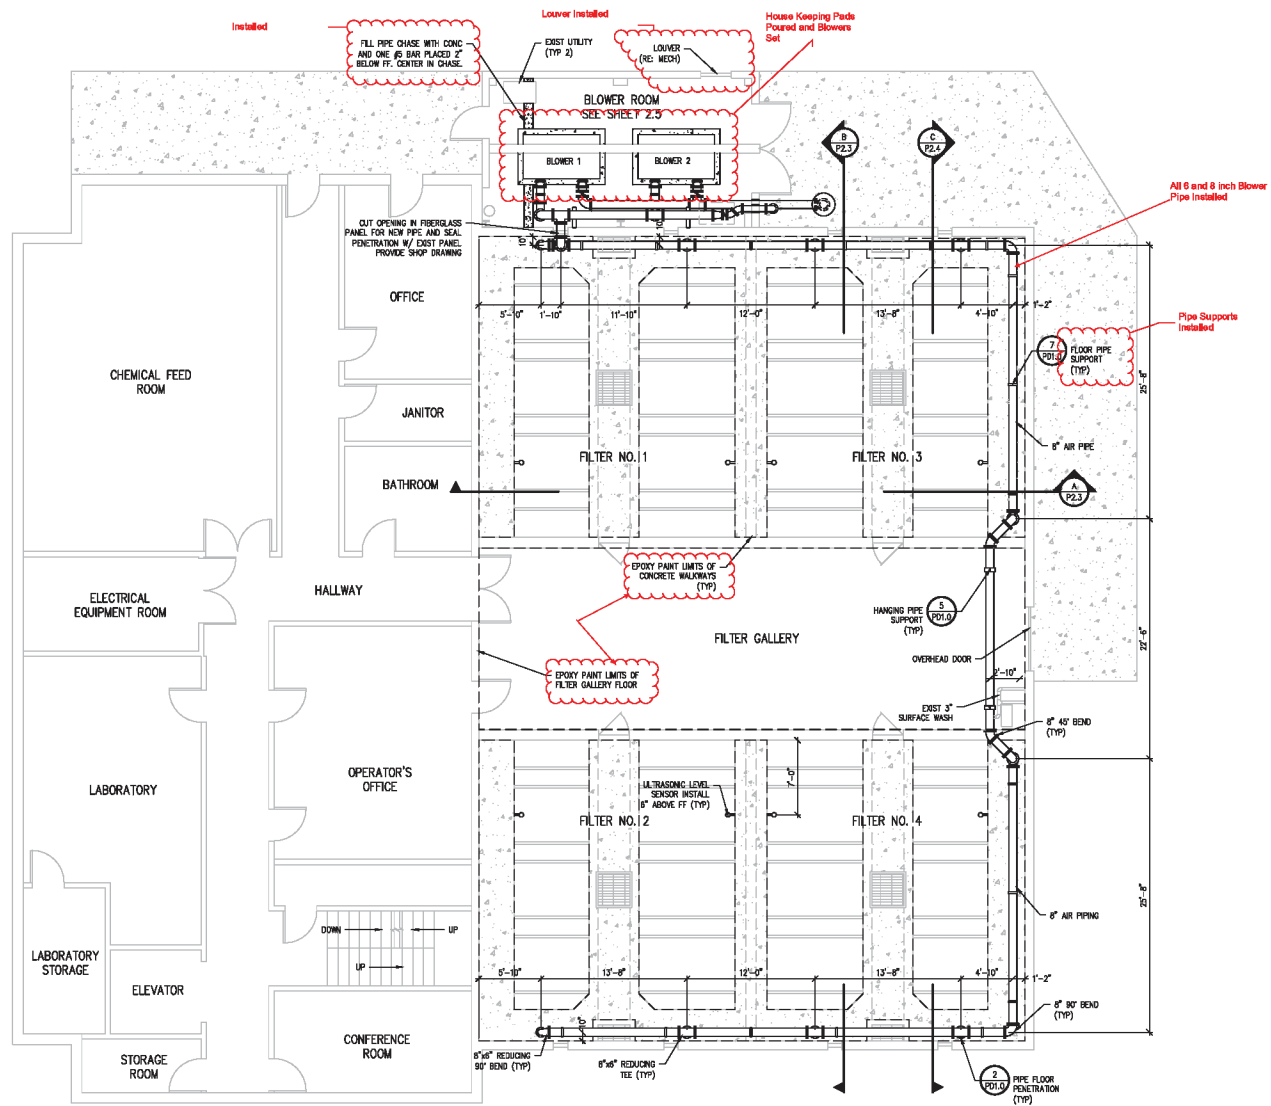

SECTION - PHASE II DEMO
3/18 - 1-5

FILTER SECTION
3/18 - 1-5

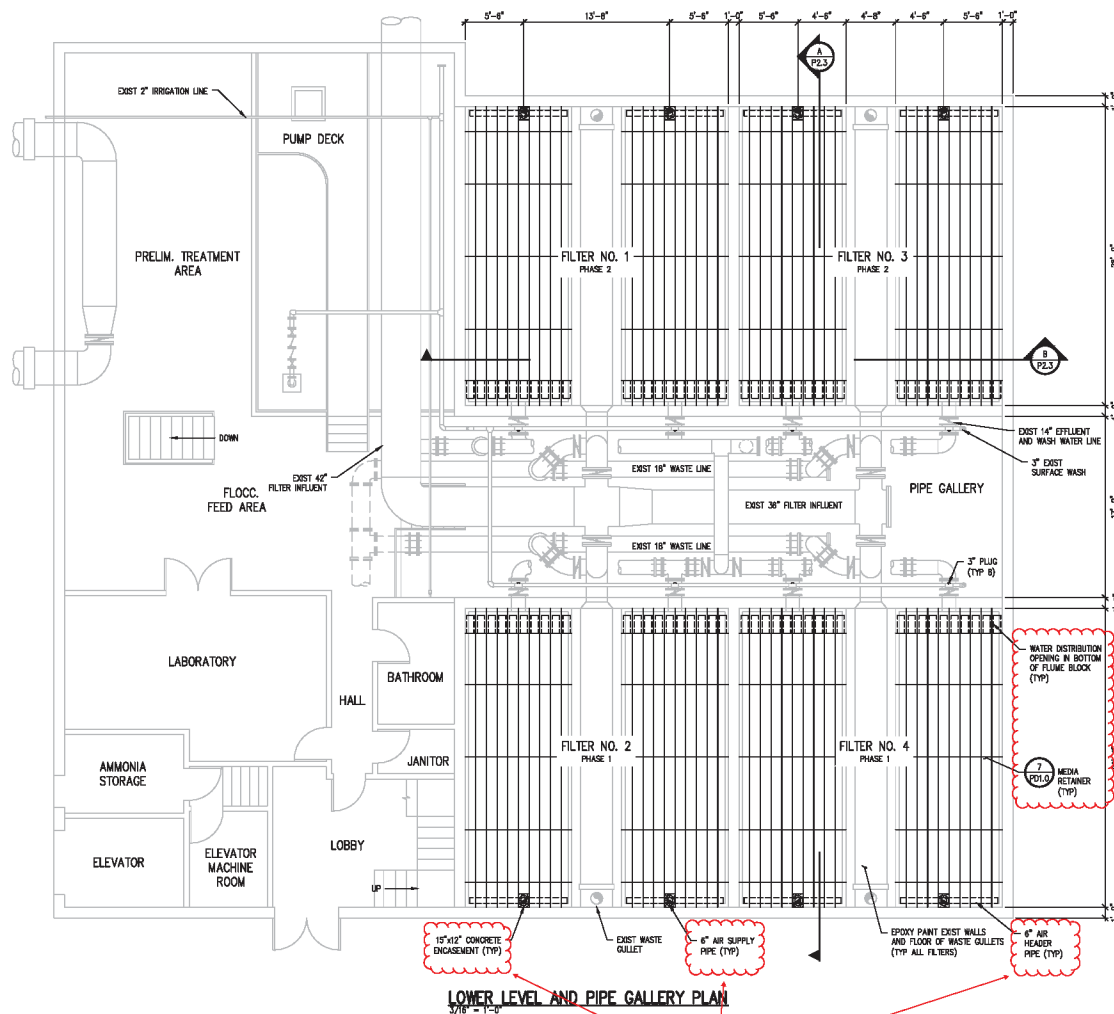

DEMO NOTES:

1. FILTERS 1 AND 3 MUST REMAIN IN OPERATION WHILE FILTERS 2 AND 4 ARE BEING DEMOLISHED. ONCE FILTERS 2 AND 4 ARE FULLY FUNCTIONAL AND OPERATIONAL, CONTRACTOR CAN BEGIN DEMO WORK ON FILTERS 1 AND 3. AFTER OWNERS APPROVAL.
2. DEMO ALL SURFACE WASH EQUIPMENT, PIPING, SUPPORTS, BEAMS, SPRAY NOZZLES, ETC. FROM INSIDE FILTERS AND UP DEMO ALL SURFACE WASH EQUIPMENT, PIPING, SUPPORTS, BEAMS, SPRAY NOZZLES, ETC. FROM INSIDE FILTERS 2 AND 4 UP TO SURFACE WASH HEADER AS SHOWN (TYP).
3. INSTALL 3" THREADED CAP IN SURFACE WASH WHERE FILTER SURFACE WASH PIPING WAS DEMOLISHED (I.E. TEMP PLUG).
4. DEMO OF FILTERS INCLUDES REMOVAL OF SAND, ANTHRACITE, GRAVEL, WHEELER UNDERDRAINS AND CONCRETE AS NEEDED TO PREPARE THE FILTER FOR THE ADDITION OF AIR SCOUR AND NEW LEOPOLD UNDERDRAINS.
5. DEMO EXIST CONCRETE SUPPORT BLOCKS A MINIMUM OF 8" BELOW FINISHED FLOOR.
6. PATCH PIPE PENETRATION BY ROUGHENING CONCRETE SURFACE TO 1/4" AMPLITUDE, INSTALLING EXPANDING TYPE WATERSTOP - WATERSTOP ROX OR EQUAL, AND PATCH WITH NON-SHRINK GROUT TO MATCH EXISTING WALL SURFACES.
7. PROTECT EXIST WALKWAY, WASTE GALLEY AND TROUGHS DURING DEMO PHASE.
8. PROTECT VALVES, SEAL EFFLUENT PIPE LEAVING THE FILTERS WITH WATERSTOP SEAL (I.E. TEMP PLUG).
9. CITY TO ISOLATE EFFLUENT VALVE PRIOR TO DEMO.

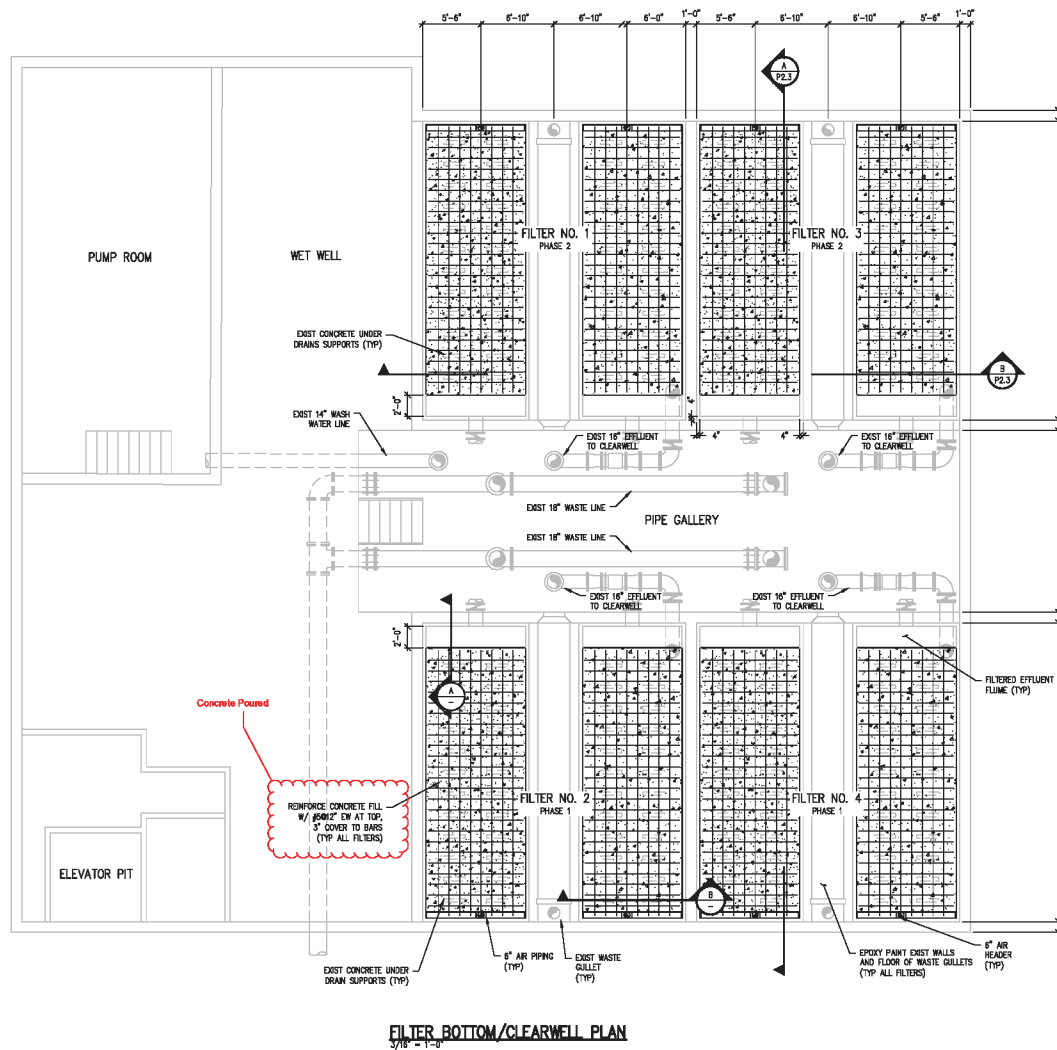

OPERATING FLOOR PLAN

ANCHOR ROD NOTE:
DRILL (2) HOLES 5" (127mm) DEEP IN FLOOR, FILL HOLES WITH A SUITABLE EPOXY SYSTEM, SET ANCHOR 1" ROD TOP OF ANCHOR ROD TO BE 1" FROM HIGHEST POINT OF THE FILTER FLOOR.

EPOXY SYSTEM:
MULTI-PUT RESIST "W" TYPICAN OR, (HOLE DIAMETER AS SPECIFIED BY EPOXY MANUFACTURER.)

NOTES:

1. LEOPOLD FILTER BLOCK TO BE STRUCTURAL HOPE.
2. BRIDGING TO BE INSTALLED BETWEEN FLUME BLOCK TO RETAIN GROUT OVER FLUME.
3. EQUIPMENT SHALL BE INSTALLED IN ACCORDANCE WITH THE LEOPOLD INSTALLATION INSTRUCTIONS AND TOLERANCES SHOWN ON THE DRAWINGS AND O&M MANUAL. READ ALL INSTRUCTIONS PRIOR TO RECEIVING, STORING, INSTALLING AND OPERATING FILTER EQUIPMENT.
4. ALL MOUNTING BRACKETS TO BE STAINLESS STEEL, TYPE 304 AND ALL HARDWARE TO BE STAINLESS STEEL, TYPE 18-8 EXCEPT AS NOTED.
5. THE FILTER FLOORS MUST HAVE A ROUGH SURFACE EQUIVALENT TO A MINIMUM 1/8 INCH GROOVE BROOM FINISH PRIOR TO PLACING THE BASE GROUT.
6. THE FILTER MUST NOT INCLUDE EXPANSION JOINTS WITHIN THE FILTER BOX.
7. DIMENSIONS AND OTHER INFORMATION PRESENTED ON THE LEOPOLD PROJECT DRAWINGS REPRESENT LEOPOLD'S BEST INTERPRETATION OF THE PROJECT PLANS AND SPECIFICATIONS AS PREPARED BY OTHERS. AS SUCH, DURING THE APPROVAL PROCESS, THE PURCHASER SHALL THOROUGHLY REVIEW AND VERIFY ALL DIMENSIONS WITH RESPECT TO ACTUAL FIELD CONDITIONS. LEOPOLD DRAWINGS ARE SUPPLIED IN THE PROJECT MANUAL.
8. ANCHOR RODS AND ANCHOR ROD EPOXY MUST BE INSTALLED IN ACCORDANCE WITH THE INSTALLATION INSTRUCTIONS AND TOLERANCES SHOWN ON ALL DRAWINGS, THE O&M MANUAL, AND THE EPOXY MANUFACTURER'S INSTRUCTIONS. ENSURE PROPER ANCHOR ROD LOCATION, HOLE SIZES, HEIGHTS, EMBEDMENT DEPTHS, AND EPOXY PENETRATION.

EXHAUST FAN SCHEDULE												
ITEM	MANUFACTURER/ MODEL	LOCATION/ SERVICE	CFM	ESP	FAN RPM	MAX FAN SIZES	ELEC. DATA			MAX OPERATING WEIGHT (LBS)	OVERALL DIMENSIONS	NOTES
							SIZE	VOLT	PH			
EF 1	COOK/ 225C5B	ROOF/ EXHAUST	3,500	.25	598	8.0	1/2 HP	120	1	200	44"DIA X 36" TALL	① ② ③
NOTES:												
①	ROOF MOUNTED FAN WITH 14" TALL ROOF CURB, ROTARY BELT TENSIONER, GRAVITY BACKDRAFT DAMPER, GALVANIZED BROSSCREEN AND NEMA 1 PRE-WIRED DISCONNECT.											
②	PROVIDE MOTOR STARTER AND REVERSE ACTING THERMOSTAT SET TO TURN FAN ON WHEN SPACE TEMPERATURE EXCEEDS 85 DEG. F.											
③	INTERLOCK EXHAUST FAN TO OPEN ALL L-1 OUTSIDE AIR INTAKE LOWER WHEN FAN OPERATES.											

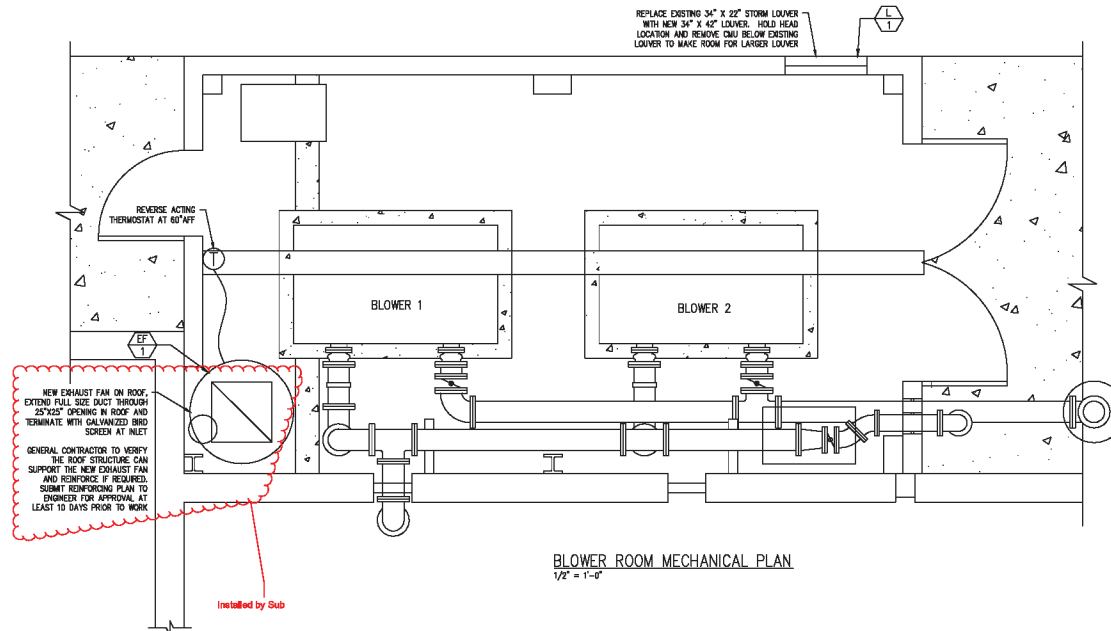

NOTES:

1. ROOF MOUNTED FAN WITH 14" TALL ROOF CURB, ROTARY BELT TENSIONER, GRAVITY BACKDRAFT DAMPER, GALVANIZED BROSCREEN AND NEMA 1 FIVE-WIRE DISCONNECT.
2. PROVIDE MOTOR STARTER AND REVERSE ACTING THERMOSTAT SET TO TURN FAN ON WHEN SPACE TEMPERATURE EXCEEDS 85 DEG. F.
3. INTERLOCK EXHAUST FAN TO OPEN ALL L-1 OUTSIDE AIR INTAKE LOUVER WHEN FAN OPERATES.

LOUVER SCHEDULE								
ITEM	MANUFACTURER/ MODEL	LOCATION/ SERVICE	CFM	MAX. PD (IN)	% FREE AREA	WIDTH (IN)	HEIGHT (IN)	NOTES
L 1	RUSKON/ LC8375D	WALL/ INTAKE	-	-	-	34	42	1 2
NOTES:								
1	FURNISH WITH 18 GAUGE MINIMUM GALVANIZED STEEL DRAINABLE BLADES, AND BREGSCREEN							
2	PROVIDE BAROMETRIC BACKDRAFT DAMPER ON ROOM SIDE OF LOUVER.							

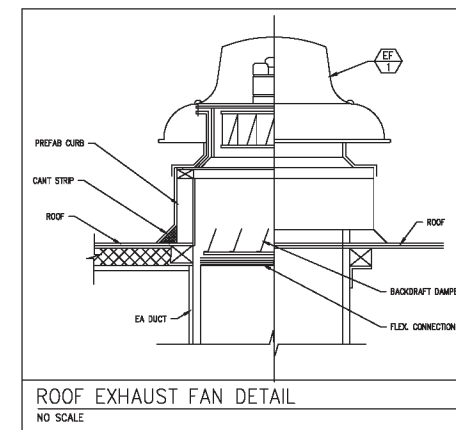

NOTES:

1. FURNISH WITH 16 GAUGE MINIMUM GALVANIZED STEEL DRAINABLE BLADES, AND BROSCREEN
2. PROVIDE BAROMETRIC BACKDRAFT DAMPER ON ROOM SIDE OF LOUVER.

GENERAL NOTES										
<ol style="list-style-type: none"> ALL WORK SHALL BE INSTALLED IN ACCORDANCE WITH ALL APPLICABLE STATE CODES, LOCAL CODES, AND OWNER'S STANDARDS INDICATED BY THE CONSTRUCTION DOCUMENTS. MECHANICAL DRAWINGS ARE DIAGNOSTIC AND DO NOT NECESSARILY INDICATE EVERY REQUIRED OFFSET, FITTING, ETC. DRAWINGS ARE NOT TO BE SCALED FOR DIMENSIONS. TAKE ALL DIMENSIONS FROM CERTIFIED EQUIPMENT DRAWINGS AND FROM THE STRUCTURE ITSELF BEFORE FABRICATING ANY WORK. VERIFY ALL SPACE REQUIREMENTS COORDINATING WITH OTHER TRADES, AND INSTALL THE SYSTEMS IN THE SPACE PROVIDED WITHOUT EXTRA CHARGES TO THE OWNER. CONTRACTOR SHALL COORDINATE WORK INDICATED WITH OTHER TRADES. VERIFY FIT OF MECHANICAL SYSTEMS PRIOR TO FABRICATION. COORDINATE ALL WALL AND ROOF OPENING REQUIREMENTS BEFORE CONSTRUCTION. PROVIDE ALL EQUIPMENT SCHEDULED OR INDICATED ON THE DRAWINGS BUT NOT INCLUDED WITHIN THE SPECIFICATIONS INCLUDING ANY REQUIRED BUT NOT LISTED MISC ITEMS NEEDED TO PROVIDE COMPLETELY OPERATIONAL SYSTEMS AS INDICATED WHETHER SPECIFICALLY CALLED FOR OR NOT. INSTALLATION SHALL CONFORM TO MANUFACTURER'S RECOMMENDATIONS AND APPLICABLE CODES. PROVIDE SUBMITTALS FOR ALL PROPOSED EQUIPMENT AND MATERIALS TO BE UTILIZED. PROVIDE OPERATION AND MAINTENANCE MANUAL FOR ALL SYSTEMS AND EQUIPMENT AT END OF PROJECT. ELECTRICAL CHARACTERISTICS OF MECHANICAL EQUIPMENT SHALL BE VERIFIED WITH ELECTRICAL DRAWINGS AND ELECTRICAL CONTRACTOR PRIOR TO EQUIPMENT ORDER RELEASE. ADDITIONAL ELECTRICAL WORK RESULTING FROM EQUIPMENT SUBSTITUTION IS THE RESPONSIBILITY OF THE CONTRACTOR. AT THE COMPLETION OF WORK, PROVIDE TESTING AND BALANCING SERVICES FOR MECHANICAL SYSTEM. SUBMIT WRITTEN REPORT TO ENGINEER LISTING SYSTEM AIRFLOWS, ELECTRIC DATA, TEMPERATURES, AND PRESSURE DROPS. AIR BALANCE REPORT REQUIRED PRIOR TO SCHEDULING FINAL MECHANICAL INSPECTION. AT THE COMPLETION OF THE WORK AND PRIOR TO FINAL ACCEPTANCE, ALL PARTS OF THE WORK INSTALLED UNDER THIS SPECIFICATION SHALL BE THOROUGHLY CLEANED. ALL EQUIPMENT, MATERIALS, AND INSTALLATION IS TO BE WARRANTED FOR ONE YEAR TO BE FREE FROM DEFECT. PROVIDE WRITTEN WARRANTY TO OWNER. THE OWNER AND ENGINEER ARE NOT RESPONSIBLE FOR THE CONTRACTOR'S SAFETY PRECAUTIONS OR TO MEANS, METHODS, TECHNIQUES, CONSTRUCTION SEQUENCES, OR PROCEDURES REQUIRED TO PERFORM HIS WORK. THIS CONTRACTOR SHALL FIELD VERIFY LOCATIONS AND SIZES OF ALL EXISTING EQUIPMENT, DUCTWORK, PIPING, ELECTRICAL CONDUIT, STRUCTURAL MEMBERS, ETC., PRIOR TO STARTING OF CONSTRUCTION. COORDINATE CONFLICTS WITH THE GENERAL CONTRACTOR. THIS CONTRACTOR SHALL COORDINATE ALL REQUIRED EXISTING BUILDING SERVICE SYSTEM OUTAGES WITH BUILDING OWNER. PATCH AND REPAIR TO MATCH EXISTING, ANY WALL/CEILING/ROOF TO BE ACCESSED TO ROUTE PIPING, DUCTWORK, LOUVERS AND EXHAUST FAN. 										

MECHANICAL SPECIFICATIONS										
<p>EXHAUST AIR DUCTWORK SHALL BE CONSTRUCTED OF GALVANIZED STEEL PER SMACNA DUCT CONSTRUCTION STANDARDS. EXHAUST AIR DUCTWORK SHALL BE CONSTRUCTED FOR 1" W.C. STATIC PRESSURE.</p> <p>DUCT HANGERS SHALL BE CONSTRUCTED OF ALUMINUM OR GALVANIZED STEEL TO MATCH DUCT MATERIAL. DUCTS SHALL BE SUPPORTED AND CONNECTED TO THE STRUCTURE PER IMC AND SMACNA DUCT CONSTRUCTION STANDARDS.</p> <p>MECHANICAL EQUIPMENT SHALL BE SECURED AND INSTALLED PER MANUFACTURER'S RECOMMENDATIONS AND APPLICABLE SECTIONS OF THE JURISDICTIONAL BUILDING AND MECHANICAL CODES.</p> <p>ROOF CURB ASSEMBLIES SHALL CONSIST OF HEAVY GAUGE GALVANIZED STEEL CONSTRUCTION, WITH INTEGRAL BASE PLATE, 3/4" DENSITY INSULATION AND 2 X 2 NAILS.</p> <p>AN INDEPENDENT TEST AND BALANCE FIRM WHICH IS ASAC OR NEBB CERTIFIED SHALL BE RETAINED FOR CHECK/TEST-START-UP AND TESTING AND BALANCING OF AIR AND WATER SYSTEMS. THE TEST REPORT SHALL BE IN A FORMAT APPROVED BY ASAC FOR SYSTEMS OF THIS TYPE AND COMPLEXITY. QUALIFICATIONS OF INDEPENDENT TEST AND BALANCE FIRM SHALL BE SUBMITTED FOR REVIEW.</p>

AREA DESIGNATIONS

AREA TYPE 1	CORROSIVE CHEMICAL, FUEL AND STORAGE ROOMS. CONDUIT SYSTEM SHALL BE EXPOSED PVC RIGID NON-METALLIC CONDUIT WITH PVC FITTINGS, BOXES, AND ACCESSORIES.
AREA TYPE 2	INDOOR WET LOCATIONS SUCH AS VAULTS, HOSEDOWN AREAS, BASEMENTS, ETC. MINIMUM NEMA TYPE 4 ENCLOSURE FOR EQUIPMENT AND GASKETED FITTINGS IN A CONDUIT SYSTEM.
AREA TYPE 3	CLASS 1, DIVISION 1 AREA AS DEFINED BY NEC. ALL EQUIPMENT AND CONDUIT SYSTEMS SHALL BE RATED FOR USE IN THIS AREA.
AREA TYPE 4	CLASS 1, DIVISION 2, GROUP C AND D METHANE, GASOLINE AS DEFINED BY NEC. EQUIPMENT AND CONDUIT SYSTEMS SHALL BE RATED FOR USE IN THIS AREA.
AREA TYPE 5	INDOOR, DRY, DIRTY AREA. REQUIRES MINIMUM NEMA TYPE 12 GASKETED ENCLOSURES FOR ALL EQUIPMENT AND GASKETED FITTINGS IN CONDUIT SYSTEMS.
AREA TYPE 6	OUTDOOR AND INDOOR WET LOCATIONS SUBJECT TO CORROSION. CONDUIT SYSTEM SHOULD BE PVC COATED RIGID GALVANIZED STEEL WITH PVC COATED FITTINGS, BOXES, AND STAINLESS STEEL HARDWARE.

GENERAL REQUIREMENTS

- THE CONTRACTOR SHALL BE RESPONSIBLE FOR ROUTING ALL CONDUITS NOT SHOWN ON THE PLANS. THIS SHALL INCLUDE ALL CONDUITS SHOWN ON THE ONE-LINES AND HOME-RUNS SHOWN ON THE PLAN DRAWINGS. CONDUITS SHALL BE ROUTED AS DEFINED IN THE SPECIFICATIONS.
- SPARE WIRES SHALL BE TAPED AND COILED.
- IF EQUIPMENT SUPPLIED BY MANUFACTURER HAS A LARGER LOAD THAN VALUE SHOWN, THE CABLE CONDUIT AND ELECTRICAL EQUIPMENT SHALL BE ENLARGED, AS REQUIRED, TO ACCOMMODATE THE HIGHER VALUE.
- THE CONTRACTOR SHALL BE RESPONSIBLE FOR FURNISHING PROPERLY SIZED STARTER OVERLOADS FOR EQUIPMENT FURNISHED.
- LIGHTING AND RECEPTACLE CIRCUITS DESIGNATED ON THE FLOOR PLANS ARE NOT SHOWN ON THE ONE-LINES. CONDUCTORS FOR LIGHTING, RECEPTACLES, AND MISCELLANEOUS 120VAC CIRCUITS SHALL BE MINIMUM NO. 12 AWG. CONDUIT FOR LIGHTING, RECEPTACLES, AND MISCELLANEOUS 120VAC CIRCUITS SHALL BE MINIMUM 3/2".
- IN AREAS WHERE THERE ARE OVERHEAD BRIDGE CRANES, HOISTS, ETC., NO CONDUITS SHALL BE RUN OVERHEAD THAT WILL INTERFERE WITH THE OPERATION OF THE EQUIPMENT.

GENERAL NOTES

- SOLID LINES ——— INDICATE NEW WORK OR EQUIPMENT.
- DOTTED LINES INDICATE EXISTING WORK OR EQUIPMENT.
- DASHED LINES - - - - - INDICATE FUTURE WORK OR EQUIPMENT.
- THIS IS A GENERAL LEGEND SHEET. SOME SYMBOLS AND ABBREVIATIONS MAY NOT BE UTILIZED ON THIS SPECIFIC PROJECT.
- INFORMATION RELATED TO CIRCUIT IDENTIFICATION, WIRE & CONDUIT SIZES, AND ROUTING, IS ON THE FOLLOWING DRAWING TYPES.
 - ONE-LINE DIAGRAMS SHOW CIRCUIT IDENTIFICATION, WIRE QUANTITY AND SIZES, AND CONDUIT SIZE WITHIN STRUCTURES. ONE-LINE DIAGRAMS ALSO INDICATE ORIGIN AND DESTINATION OF CIRCUITS, AND IDENTIFY CIRCUITS ROUTED UNDERGROUND.
 - FOR CIRCUITS WITHOUT UNDERGROUND PORTIONS, BUILDING FLOOR PLANS SHOW LOCATION OF EQUIPMENT FOR DETERMINING CIRCUIT LENGTH WITHIN THE STRUCTURE. FOR CIRCUITS WITH UNDERGROUND PORTIONS, ANTICIPATED PENETRATION OF UNDERGROUND CONDUITS ARE SHOWN ON STRUCTURE PLANS FOR DETERMINING THE LENGTH OF IN-STRUCTURE PORTIONS OF CIRCUITS. BUILDING FLOOR PLANS MAY ALSO SHOW HOME RUNS FOR LIGHTING, RECEPTACLE AND OTHER MISCELLANEOUS EQUIPMENT CIRCUITS.
 - SITE PLANS INDICATE THE GENERAL ROUTING OF UNDERGROUND CONDUITS AND DUCT BANKS. CIRCUITS ROUTED IN UNDERGROUND CONDUITS OR DUCT BANKS ARE INDICATED IN DUCT BANK SECTIONS REFERENCED ON THE SITE PLAN.
 - DUCT BANK SECTIONS AND SCHEDULES IDENTIFY CONDUIT SIZE, CONDUIT MATERIAL, ARRANGEMENT OF THE UNDERGROUND CONDUITS, AND CIRCUITS ROUTED IN EACH UNDERGROUND CONDUIT.
- CLOUSED MARKINGS INDICATE WORK IN EXISTING AREAS THAT IS NEW OR NEW WORK ON AN EXISTING PIECE OF EQUIPMENT.

PROCESS PLAN
3/16" = 1'-0"

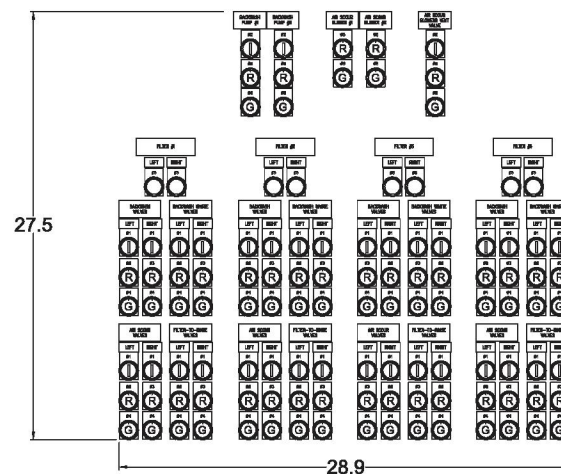

- NOTES:
1. CONDUITS FOR THE VALVE ACTUATORS AND THE ULTRASONIC TRANSDUCERS SHALL ROUTE TO THE WALL IN AS SHORT A WAY AS POSSIBLE TO MINIMIZE TRIP HAZARDS ON THE WALKWAY. WHEN THE CONDUIT IS ROUTED ALONG THE SIDE OF THE WALKWAY, IT SHALL BE LOCATED OFF THE WALKWAY.
 2. A NEW THERMOSTAT SHALL BE PROVIDED AND INSTALLED TO CONTROL THE EXISTING FAN IN THE BLOWER ROOM. THE NEW THERMOSTAT SHALL BE WIRED IN PARALLEL TO THE EXISTING MANUAL SWITCH FOR THE FAN ON THE OUTSIDE OF THE DOOR. THE CONTROLS SHALL BE WIRED INTO THE NEW FAN STARTER, WHICH SHALL BE PROVIDED BY THE HVAC CONTRACTOR, SO THAT EITHER THE SWITCH OR THE THERMOSTAT CAN TURN THE FAN ON WHEN CALLED FOR.

- NOTES:**
1. ALL THE EXISTING EQUIPMENT IN THIS MCC BUCKET SHALL BE REMOVED AND TURNED OVER TO THE OWNER. THE BUCKET SHALL BE RETROFITTED IN THE FIELD WITH A 3P-150A BREAKER TO MATCH THE BUCKET BELOW IT. THE BREAKER SHALL BE LOGGED TO THE FIELD AND RUN THE SAME AS THE BREAKER BELOW IT.
 2. NEW 1P-150A BREAKERS SHALL BE ADDED IN LIGHTING PANEL 8 IN THE EXISTING MCC FOR POWERING THE NEW AIR SCOUR VALVE ACTUATORS.
 3. BREAKER FROM LP-8 SHALL POWER BOTH AIR SCOUR ACTUATORS FOR EACH FILTER.
 4. ALL WIRING ASSOCIATED WITH THE AIR SCOUR ACTUATORS SHALL LAND ON NEW TERMINAL BLOCKS ON THE BACK SIDE OF THE EXISTING CONTROL PANEL.
 5. THE EXISTING CONTROL PANEL, CONTROL PANEL FOR THE BACKWASH PUMPS, BACKWASH VALVES, BACKWASH WASTE VALVES, AND FILTER-TO-WASTE VALVES SHALL BE RETIRED TO BE CONTROLLED BY THE NEW PLC.

SERVICE DIMENSIONS

SECTIONS ARE TO BE REARRANGED AS SHOWN IN THE ELEVATION DRAWING.

NOT TO SCALE

PROVIDE 4" CONCRETE CURB UNDER PANEL NO.

NOT TO SCALE

PROVIDE 4" CONCRETE CURB UNDER PANEL MB.
THE TWO PRODUCTION METERS ARE TO BE INSTALLED ON THE FRONT OF THE FOURTH SECTION
AND THE TWO ARRAY DISCONNECTS ARE TO BE MOUNTED ONTO THE SIDE OF THE FOURTH
SECTION. PROVIDE ALL LABELING REQUIRED BY THE UTILITY COMPANY FOR THE PV METERS AND
THE DISCONNECTS. THE BREAKERS INSTALLED FOR THE PV ARRAYS ARE TO BE BACKFEED RATED
BREAKERS WITH LOCKOUT ABILITY.

HTR	HEATER
HV	HAND VALVE
HX	HEAT EXCHANGER
IBR	INTRINSICALLY SAFE BARRIER
JB	JUNCTION BOX
LCP	LOCAL CONTROL PANEL
LE	LEVEL ELEMENT
LIT	LEVEL INDICATOR TRANSMITTER
LMB	LIMIT SWITCH
LO	LOW
LS	LEVEL SWITCH
LSL	LEVEL SWITCH LOW
LT	LEVEL TRANSMITTER
MCP	MASTER CONTROL PANEL
MP	METERING PUMP
MV	MOTORIZED VALVE
NaCl	SODIUM CHLORIDE
NaOCl	SODIUM HYPOCHLORITE
N.C.	NORMALLY CLOSED
NPW	NON-POTABLE WATER
ON-SITE	ON-SITE HYPOCHLORITE GENERATION
P	PUMP
PD	PULSATION DAMPER
PI	PRESSURE INDICATOR
PII	PRESSURE INDICATING TRANSMITTER
PLC	PROGRAMMABLE LOGIC CONTROLLER
PFD	POUNDS PER DAY
PRV	PRESSURE REGULATING VALVE
PRV	PRESSURE RELIEF VALVE
PS	PRESSURE SWITCH
PSB	POWER SUPPLY BOX
PBL	PRESSURE SWITCH LOW
PT	PRESSURE TRANSMITTER
PVC	POLYVINYL CHLORIDE
R	RECTIFIER
RSU	REMOTE START UNIT
SH	SODIUM HYPOCHLORITE
SHCLR	SODIUM HYPOCHLORITE
SV	SOLENOID VALVE
STAND	STAND PIPE
SPW	SUPPLIED PORTABLE WATER
SW	SOFTENED WATER
TK	TANK
TC	TEMPERATURE CONTROL
TE	TEMPERATURE ELEMENT
TI	TEMPERATURE INDICATOR
TS	TEMPERATURE SWITCH
TSH	TEMPERATURE SWITCH HIGH
TSL	TEMPERATURE SWITCH LOW
VFD	VARIABLE FREQUENCY DRIVE
WC	WATER CHILLER
WH	WATER HEATER
YST	Y-STRAINER

GENERAL NOTES

1. THIS DRAWING IS FOR EQUIPMENT PROCESS FLOW INFORMATION PURPOSES ONLY. ALL EQUIPMENT, COMPONENTS, INSTRUMENTS, DEVICES, PIPING, FITTINGS, VALVES & CONDUIT SHOWN ON THIS DRAWING ARE NOT NECESSARILY SUPPLIED & INSTALLED BY CLORTEC. REFER TO CONTRACT DOCUMENTS, CLORTEC SCOPE OF SUPPLIES FOR CLORTEC RESPONSIBILITY IN THIS PROJECT.
2. ALL PIPING FITTINGS & VALVES ARE SCH. 80. ALL TUBING ARE BLACK POLYETHYLENE.
3. ELECTRICAL, POWER, WATER SUPPLY, POINT OF INJECTION AND SCADA ARE PROVIDED BY OTHERS.
4. ALL UNDER GROUND WORK, CONCRETE WORK, WALL AND ROOF PENETRATIONS ARE DONE BY OTHERS.
5. ALL ELECTRICAL CONDUITS, WIRING, JUNCTION AND PULL BOXES WILL BE PROVIDED BY OTHERS.
6. ALL PAINTING AND COATING TO BE PROVIDED BY OTHERS.
7. ALL BACKBOARDS AND SUPPORTS TO BE PROVIDED BY OTHERS.
8. CUSTOMER TO PROVIDE WATER SUPPLY PRESSURE & TEMPERATURE.
9. ALL ELECTRICAL DISCONNECT SWITCHES ARE PROVIDED BY OTHERS.
10. FOR 1500 AMP RECTIFIER UNITS: RECTIFIER POWER DISTRIBUTION BLOCK WILL ACCEPT A SINGLE CONDUCTOR PER POLE, 400 MCM TO #6 AWG. ACTUAL WIRE SIZE WILL BE DETERMINED BY THE ELECTRICAL CONTRACTOR TO MEET NEC CODE.
- FOR 300 AMP RECTIFIER UNITS: RECTIFIER POWER DISTRIBUTION BLOCK WILL ACCEPT A SINGLE CONDUCTOR PER POLE, 2/0 TO #14 AWG. ACTUAL WIRE SIZE WILL BE DETERMINED BY THE ELECTRICAL CONTRACTOR TO MEET NEC CODE.

PRELIMINARY DESIGN
NOT FOR CONSTRUCTION
INFORMATION ONLY

- NOTES:
1. WATER INLET PRESSURE REQUIREMENT MIGHT HAVE TO BE ADJUSTED DEPENDING ON THE LOCATION/ELEVATION OF THE BRINE SATURATOR TANKS RELATIVE TO THE LOCATION/ELEVATION OF THE GENERATOR RACK ASSEMBLIES.
 2. WATER QUALITY IS REQUIRED TO CONFIRM WATER SUPPLYER SIZING AND TO DETERMINE ELECTRODE MAINTENANCE FREQUENCY AND TO DETERMINE WATER QUALITY EFFECTS ON THE ELECTRODES.
 3. DISINTEGRATION CONTROLS NEED TO BE INSTALLED AT THE SAME ELEVATION AS THE GENERATOR RACK ASSEMBLIES.
 4. DRAWINGS FOR THE RACKS ARE PROVIDED BY STWP.
 5. SUBCONTRACTOR TO INSTALL WATER FILTER ON INCOMING WATER SUPPLY LINE FROM THE GENERATOR RACK ASSEMBLIES.
 6. INSTALL HYDROGEN DETECTOR AT EYE LEVEL.
 7. INSTALL REMOTE HYDROGEN SENSOR AT THE HIGHEST LEVEL IN THE BUILDING.
 8. ENGINEER AND CONTRACTOR TO PROVIDE INCOMING WATER QUALITY ANALYSIS.

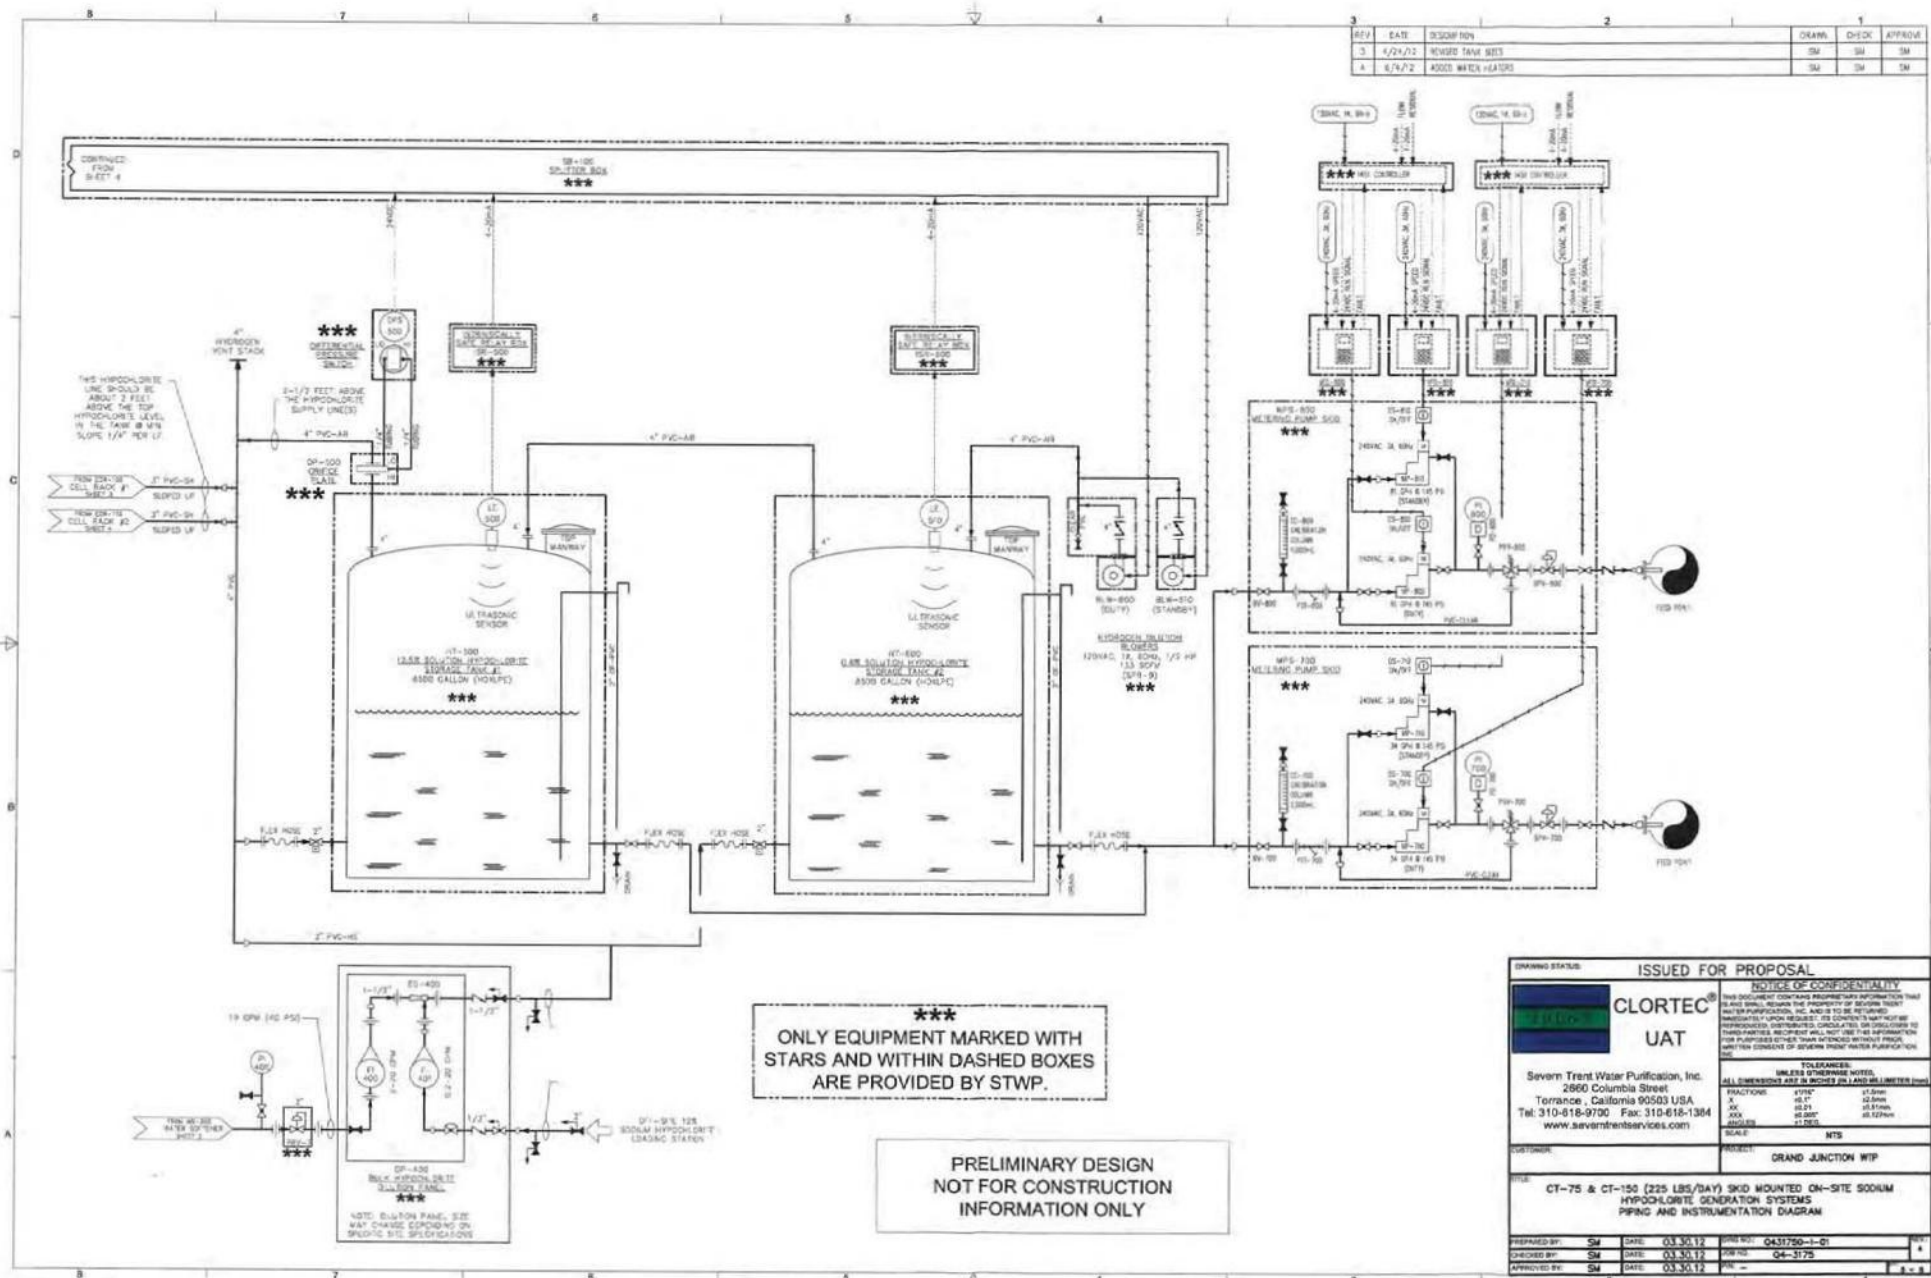

ISSUED FOR PROPOSAL	
CLORTEC UAT	
Severn Trent Water Purification, Inc. 2560 Columbia Street Torrance, California 90503 USA Tel: 310-618-9700 Fax: 310-618-1364 www.severntrentservices.com

PROJECT CONTROL MAP

- GENERAL NOTES
1. SEE LISTS USED IN DESIGN
 - A. BRIST (SHEETS).....2007
 - B. AND.....
 - C. EXPOSURE.....
 - D. BUILDING CATEGORY.....
 - E. IMPORTANCE FACTOR (I_p).....1.0
 - F. SEISMIC DESIGN CATEGORY.....B
 - G. SEISMIC DESIGN SPECTRA.....1.0
 2. SEISMIC
 - A. SEISMIC USE GROUP.....
 - B. IMPORTANCE FACTOR (I_p).....1.0
 3. CONCRETE
 - A. ALL CONCRETE SHALL DEVELOPE 4,000 PSI COMPRESSIVE STRENGTH IN 28 DAYS
 - B. ALL REINFORCEMENT SHALL CONFORM TO ASTM A618 GRADE 60
 - C. NO SPICES OF REINFORCEMENT SHALL BE MADE EXCEPT AS SPECIFIED OR AUTHORIZED BY THE ENGINEER OF RECORD
 - D. LAP SPICES SHALL BE A MINIMUM OF 36 BAR DIAMETERS. START 45° BARS CONTIGUOUS JOINTS CORNERS
 - E. EXCESS SPICES A MINIMUM OF 4:1 FOR TOP AND BOTTOM CONTIGUOUS BARS IN FOUNDATIONS UNLESS OTHERWISE NOTED
 4. STEEL
 - A. ALL BOLTS AND WELDING SHALL BE A500-PSM NO. 2 OR BETTER WITH F_y = 50,000 PSI AND E = 1,100,000 PSI
 - B. ALL STUDS SHALL BE A500-PSM NO. 2 OR BETTER WITH F_y = 50,000 PSI AND E = 1,100,000 PSI
 5. FOUNDATIONS
 - A. FOUNDATION DESIGN IS BASED UPON RECOMMENDATIONS BY GEOTECHNICAL ENGINEERING FIRM NO. 17717777
 - B. ASSUMPTIONS IN THIS REPORT SHOULD BE FOLLOWED
 - C. ALLOWABLE SOIL BEARING CAPACITY.....
 - D. RESULTS OF SOIL BEARING CAPACITY.....
 - E. SOILS ENGINEER OF RECORD SHALL EXAMINE EXCAVATION TO VERIFY CONDITIONS PRIOR TO CONSTRUCTION
 6. VERIFY ALL DIMENSIONS PRIOR TO CONSTRUCTION

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

**ADDITIONAL INSURED – OWNERS, LESSEES OR
CONTRACTORS – SCHEDULED PERSON OR
ORGANIZATION**

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s):	Location(s) Of Covered Operations
Any person or organization for whom you are performing operations, but only if you have agreed, in a written contract, to add such person or organization as an additional insured on your policy for that location or part thereof, provided such written contract is fully executed prior to an "occurrence" in which coverage is sought under this policy.	Any and All Locations.
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.	

A. Section II – Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by:

1. Your acts or omissions; or
2. The acts or omissions of those acting on your behalf;

in the performance of your ongoing operations for the additional insured(s) at the location(s) designated above.

B. With respect to the insurance afforded to these additional insureds, the following additional exclusions apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

1. All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or
2. That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.
