DRAFT

Great New Homes
3032 I-70 Business Loop
Grand Junction, CO 81504

Attention: Mr. Pat Mullinex

Subject: Excavation Observation
658 Faircloud Way
Lot 10, Faircloud Subdivision, Filing No. 2, Block 3
Grand Junction, Colorado
Job No. 800

2001 + JANUARY 9, 17

As requested, a Geotechnical Engineering Group, Inc. representative visited the site and observed the open foundation excavation on Decemeber 10, 13, 19, 2001 Soils found in the excavation appeared to be consistent with those identified by the "Geotechnical Investigation For Faircloud Subdivision, Situated In The W $\frac{1}{2}$, SW $\frac{1}{4}$, NW $\frac{1}{4}$ Section 4, T1S, R1E, Ute Meridian, Mesa County, Colorado" dated September 19, 1997 by Western Colorado Testing, Inc. (their Job No. 207597). We observed the completed excavation and a proof roll, made by a CAT 416B ~~roller~~ that revealed no significant yielding on the area observed. We believe the foundation soils are suitable to support a shallow foundation system with a maximum bearing pressure of 1,000 psf as described in the referenced report. We understand spread footing foundations are proposed for the residence and foundation plans have been reviewed by Mesa County Building Department. In our opinion, spread footing foundations designed and constructed to meet or exceed Mesa County Minimum House Foundation Standards and the referenced report will be suitable for the residence. This opinion is based on observation of the completed excavation and proof roll of the proposed foundation subgrade.

We appreciate the opportunity to provide geotechnical services. When we can be of further service, please call.

Sincerely,
GEOTECHNICAL ENGINEERING GROUP, INC.
