

under construction. Arboretum trail is almost complete, should be complete by end of year.

Tennis court met with lena elliott yesterday, additional changes which will provide for an additional 80 parking spots in the park. Diagrams to come next month

Crews working on west shelter, relocating fire hydrant and water line, lots happenig in the park right now.

Will bring schematic for new entrance next month as well.

Discussion ensued regarding irrigation repairs at honey comb and \_\_\_\_\_, issues with original designs and must be to work properly.

Las colonias rob distributed utilities map and location map, and provided a brief history on the park. One master plan has been completed in 2008, (see attached large map) Unable to develop as is, numerous new efforts and ideas have been brought forth since 2008. Have been instructed by council to review the plan, small committee has been put together to review, includes riverfront commission, botanical gardens, city, etc.

Restrictions due to soil conditions in terms of depth of structures, etc. Due to restrictions, rec center is no longer feasible in that location.

Tamarisk coalition working down here for years, wide open and have made huge progress, revegetation project in the process that includes irrigation.

Council gave approval for disk golf group to make improvements and build gcourse on watson island.

funding, soil testing, water professional services, etc

250,000 in 2013 to kick start the project and be used for match dollars for grant funds,

additional 250,000 in 2014

exciting project, a tremendous asset to our community.

Utilities map, traci, grant through wells fargo for environmental solutions for community 25-100,000 grant, have identified three locations in colorado who are candidates.

competitive grant if one on one funding match

great solution to use for irrigation and vegetation issues, will help botanical gardens irrigate as well no costs yet, in early phases department of energy and us fish and wildlife are involved and will be doing some testing

likelihood of grant is very high and would be a very positive solution

met with tamarisk coalition and they have a grant to revegetate the area, working along side to shift areas around a bit to coincide with master plan

Rob, real exciting amenities is a water slue, water way on map, idea is to create something similar to san antonio River walk where water stays at the level year round. Could maintain a water level for a tourist and walking Attraction

discussed the impact of the slue if there is another flood, slue fills up and assists the area by acting like an overflow detention pond

discussed soil conditions and the uranium layer that must be covered, can build and plant, but additional processes and requirements will be involved

## **Item 5: For the Good of the Community**

### **Item6: Adjourn**

Meeting adjourned at     p.m.

Respectfully submitted,

Tressa Fisher
