PROJECT REPORT FOR: LUXURY WHEELS 1440 WINTERS AVE. GRAND JUNCTION, CO

Luxury Wheels is a company located in Grand Junction that is in the business of plating automotive wheels. They currently occupy a plating facility on Winters Ave. that they will continue to operate.

The purpose of the new building is to house new corporate offices and to warehouse additional inventory. The new facility will have two dock high overhead doors for semi-trailer access.

The new structure will be a tilt up type concrete with a colored and textured exterior finish. The roof section will be steel bar joists and metal decking. The purposed structure will be located on lot 5 in block 8 of filing 3. The building is approximately 10,400 sq. Ft. Included in that number is nearly 2200 sq. Ft of office space.

, including this cover sheet.

#### Bud..

Regarding your questions:

- 1) Exterior colors will be greys and blacks in a marble type texture. This building is a concrete tilt up very similar to the new shop at Mays Const.
- 2) The drainage report from the engineer will be ready Friday. I will see that you get a copy.
- 3) Max number of employees is 10
- 4) We will change the front door location to the North side and move the building to the South 5 feet.
- 5) Parking is paved throughout, there is no employee parking on the south side of the building.
- 6) We will reduce the drive width to 26 feet into the loading area.
- 7) Berms similar to those at the refrigeration facility will be installed along the east property line. Because there will be no parking along the south we will not berm that area.
- 8) We will use a concrete monument sign on the corner 8 feet in length and four feet high. I will submit plans when ready.

I hope that this addresses your concerns. Please feel free to call if I can be of any further assistance.

Sincerely,

Tom

#### LOCATION and DESCRIPTION

The proposed development, Luxury Wheels is located in the southwest quarter of Section 3, TlS, RlW of the Ute Meridian in Grand Junction, Colorado. The property is further described as a part of Lot 5, Block 8, of the Foresight Industrial Park, Filing No. 3 subdivision.

Lot 5, Block 8 has 1.89 acres and is currently undeveloped, consisting of soils assumed to be SCS hydrologic group C. Development will consist of the northerly 0.99 acres of Lot 5.

#### DRAINAGE DESIGN CRITERIA

Storm water management in Grand Junction is governed by the "Stormwater Management Manual (SWMM). The storm water management plan described herein confirms to that Criteria.

The minor storm frequency analyzed is the 2 year storm. The major storm frequency will be the 100-year storm and, where required, primary structures will be sized to handle this flow.

The following Rational formula was used to compute the storm runoff values:

O= CIA

Q= Peak runoff rate in cubic feet per second

C= Runoff coefficient

I= Storm intensity in inches per hour

A= Drainage tributary area in acres

In compliance with the current Grand Junction standards, minimum concentration times 5 minutes, developed will be adhered to. Where desirable, composite or weighted "C" values were derived from the data contained within this report.

#### HISTORIC RUNOFF

The existing site consists of a relatively flat vacant lot with minimum vegetation. The historic drainage flow pattern is from north to south. A composite "C" factor of 0.28 in the 2

year and 0.34 in the 100 year was used to calculate runoff. Times of concentration of 15 minutes for the 2 year and 13.8 minutes for the 100 year were used. The 2 year historic runoff is 0.4 cfs and the 100 year historic runoff is 1.2 cfs.

#### DEVELOPED RUNOFF

The site will be developed with a single building approximately 130' long by 80' wide positioned in the northwest corner of the site. Visitor parking is provided on the east side of the building with an asphalt paved parking lot. Employee parking will be provided for on the south side of the building with a gravel surface parking lot. The remainder of the site will consist of green landscaped areas.

The entire developed site will consist of a single drainage basin. A small portion of the developed site will drain in a northerly direction from the proposed building to the existing curb and gutter in Blichman Avenue. Gutter flow in Blichman Avenue drains in an easterly direction along the north end of the site turning the corner at the intersection with Hollingsworth Street and continuing as gutter flow in Hollingsworth Street in a southerly direction. The vast majority of developed flow from this site will be conveyed by a proposed swale through the graveled parking area to an asphalt curbed driveway on the south end to the existing curb and gutter of Hollingsworth Street. Developed flows along the east side of the site will conveyed to the existing curb and gutter of Hollingsworth Street by a concrete pan positioned in the centerline of the paved parking area.

Composite "C" values for the development were derived for the 2-year and the 100-year storms and are 0.64 and 0.69, respectively. Times of concentration used for the 2-year and 100-year storms are 6.3 minutes and 5.7 minutes, respectively. The developed runoff at Design Point No. 1 is 1.1 cfs for the 2-year storm and 3.2 cfs for the 100-year storm.

Gutter flow in Hollingsworth Street is intercepted by storm sewer inlets south of the proposed development.

#### DETENTION

The historic runoff is 1.2 cfs in the 100 year storm. The developed runoff is 3.2 cfs. The increase in runoff from the site with this development is 2.0 cfs. Based on the minimual increase in run-off created by development of the site; it is recommended that no detention be required for this site.

#### CONCLUSION

The criteria for the "Stormwater Management Manual" was used in preparing this report. The flows are picked up in swales and concrete pans and conveyed through the site to Hollingsworth Street. The increase in runoff with new development of this site will be only 2.0 cfs for the 100-year storm. Since the increase in runoff is minimal, it is proposed that no detention be provided. In conclusion; the existing drainage patterns have been retained with the development of this report, with little impact on downstream properties.

#### ENGINEERS CERTIFICATION

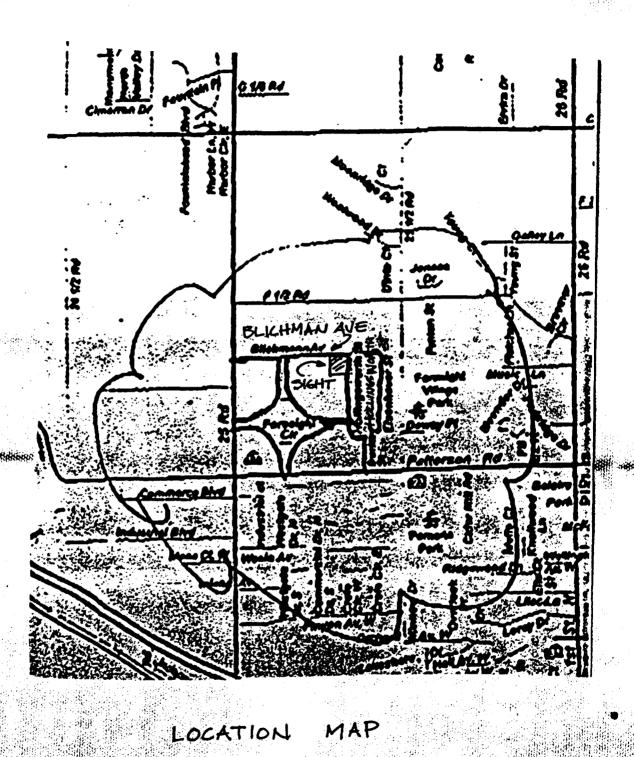

This report and plan for the Phase III drainage design of Luxury Wheels was prepared under my direct supervision in accordance with the provisions of the City of Grand Junction Stormwater Management Manual for the owners thereof. I understand that the City of Grand Junction does not and will not assume liability for drainage facilities designed by others.

Robert P. Gerlofs Registered Professional Engineer Colored No. 9402

NOTES: 1.

RATIONAL METHOD RUNOFF COEFFICIENTS (Modified from Table 4, UC-Davis, which appears to be a modification of work done by Rawls)

TABLE "B-1"

Section 2

**★**93. ×4 ×

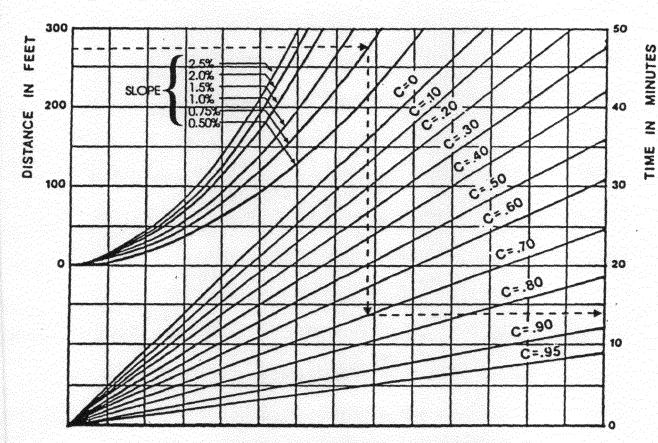

Values above and below pertain to the 2-year and 100-year storms, respectively.

The range of values provided allows for engineering judgement of site conditions such as basic shape, homogeneity of surface type, surface depression storage, and storm duration. In general, during shorter duration storms (Te ) 30 minutes), use a ""C value in the low range. Conversely, for longer duration storms (Te ) 30 minutes), use a ""C value in the higher range.

For residential development at less than 1/8 acre per unit or greater than 1 acre per unit, and also for commercial and industrial areas, use values under MISC SURFACES to estimate "C" value ranges for use.

July 13, 1996

Mr. Tom Burke President Burke Construction Co. Inc. 336 Main St., Suite 201 Grand Junction, CO 81501

Dear Tom:

The Foresight Park Architectural Control Committee has reviewed the following plans and documents for the proposed Luxury Wheels building:

- Site Plan prepared by Robert A. Politano Architect
- Floor Plan prepared by Robert A. Politano Architect
- Elevation Plan prepared by Robert A. Politano Architect
- Drainage report
- Memo dated July 10, 1996 from Burke construction which further explains the plans.

The building, as proposed in the above documents, is in accordance with the Park's covenants. Thus, the committee has approved this building for construction.

If you have any questions, please contact me.

Sincerely

**Bud Haupt** 

President

Foresight Park Owners & Tenants Association

RECEIVED GRAND JUNCTION PLANNING DEPARTMENT JUL 15 1996

Site Plan Review #SPR-96-165- Luxury Wheels Foresight Industrial Park Staff: Bill Nebeker (5)
July 23, 1996

#### **Review Comments:**

NOTE: Staff review has found that the submitted site plan does not conform to several standards contained in the Foresight Park CC&Rs, yet the plan has been approved by the Foresight Park Architectural Control Committee. A letter received from the ACCO did not mention that variances were granted from the CC&Rs. Since this is a Planned Industrial zone and the CC&Rs act as the standards for that planned zone, staff will require adherence to them regardless of the ACCO's approval. A letter will be sent to the ACCO to determine if their approval of the plan was an oversight, in light of the deficiencies found by staff, or if a different standard is being imposed.

Generally, site plan does not provide sufficient information to show that it meets city code. Please refer to Submittal Standards for Improvements and Development (SSID), page IX-29 -Site Plan, page IX-20 - Landscape Plan and X-07 - General Project Report...

- 1. The following discrepancies were found between the site plan and the Foresight Park CC&Rs. Please correct accordingly:
  - a. CC&Rs require 35' front yard setbacks; site plan shows a 30' setback along Blichman Ave.
  - b. Did the ACCO grant a variance to allow more than 20% of a front yard to be devoted to customer parking spaces? the site plan shows that more than 50% of the front yard setback along Hollingsworth Ave contains paved areas.
  - c. CC&Rs and city code require all off-street parking, access and loading areas to be paved; site plan shows employee parking as graveled
  - d. CC&Rs require a maximum width of 26' per access point from the street to the building; site plan shows second driveway being 30' wide
- 2. How was the 32 required parking spaces calculated? All required parking must be paved.
- 3. Provide a typical dimension for parking. Provide widths for driveways.
- 4. One disabled parking space is required for each 25 spaces provided.

- 5. Does the loading dock include an elevated platform? Clarify use of stairs to east of loading dock. Show location of overhead doors and all entrance/exits to building.
- 6. What is the width of the sign?
- 7. Where is the 6' concrete walk noted on the site plan below the sign?
- 8. How far does the sod south of the asphalt loading area extend into the undeveloped area? the site plan is unclear.
- 9. Site plan shall include required note that an underground, pressurized irrigation system will be required for all landscaped areas.
- 10. Placement of shrubs appears to be a little skimpy. The CC&Rs require adequate screening of parking areas which is difficult with sod and trees only. There also appears to be an awful lot of gravel.
- 11. Change street name to Blichman Avenue.
- 12. Please submit a copy of all plans that were reviewed by the ACCO (site plan, if different from the plan submitted to our department; floor plan; elevation plan; drainage report, if different from that submitted; and memo dated July 10, 1996 from Burke construction which further explains the plans).

July 24, 1996

Bud Haupt Foresight Park Owners & Tenants Association PO Box 1509 Grand Junction, CO 81502

Dear Bud:

Tom Burke of Burke Construction, Inc. recently submitted plans for an office and warehouse facility at the southwest corner of Blichman and Hollingsworth in Foresight Park. According to a letter received by our department from you to him dated July 13, 1996, the Foresight Park Association had approved the plans. In review of the plans I found several discrepancies between the site plan and the Foresight Park protective covenants.

Attached is a copy of the site plan for the facility, my review comments and the CC&R's on file with the City that we use to review developments in Foresight Park. Could you please tell me if your approval of Luxury Wheels was an oversight in light of the standards in these covenants, or are you using different standards? I would appreciate a reply. I can be reached at 244-1447.

Sincerely,

Bill Nebeker Senior Planner

7/31/96

244-1447

**NOTE:** Staff review has found that the submitted site plan does not conform to several standards contained in the Foresight Park CC&Rs, yet the plan has been approved by the Foresight Park Architectural Control Committee. A letter received from the ACCO did not mention that variances were granted from the CC&Rs. Since this is a Planned Industrial zone and the CC&Rs act as the standards for that planned zone, staff will require adherence to them regardless of the ACCO's approval. A letter will be sent to the ACCO to determine if their approval of the plan was an oversight, in light of the deficiencies found by staff, or if a different standard is being imposed.

Generally, site plan does not provide sufficient information to show that it meets city code. Please refer to Submittal Standards for Improvements and Development (SSID), page IX-29 -Site Plan, page IX-20 - Landscape Plan and X-07 - General Project Report.

- 1. The following discrepancies were found between the site plan and the Foresight Park CC&Rs. Please correct accordingly:
  - a. CC&Rs require 35' front yard setbacks; site plan shows a 30' setback along Blichmann Ave.
  - b. Did the ACCO grant a variance to allow more than 20% of a front yard to be devoted to customer parking spaces? the site plan shows that more than 50% of the front yard setback along Hollingsworth Ave contains paved areas.
  - c. CC&Rs and city code require all off-street parking, access and loading areas to be paved; site plan shows employee parking as graveled
  - d. CC&Rs require a maximum width of 26' per access point from the street to the building; site plan shows second driveway being 30' wide
- 2. How was the 32 required parking spaces calculated? All required parking must be paved.
- 3. Provide a typical dimension for parking. Provide widths for driveways.
- 4. One disabled parking space is required for each 25 spaces provided.

#### SPR-96-165 / REVIEW COMMENTS / page 2 of 3

- 5. Does the loading dock include an elevated platform? Clarify use of stairs to east of loading dock. Show location of overhead doors and all entrance/exits to building.
- 6. What is the width of the sign?
- 7. Where is the 6' concrete walk noted on the site plan below the sign?
- 8. How far does the sod south of the asphalt loading area extend into the undeveloped area? the site plan is unclear.
- 9. Site plan shall include required note that an underground, pressurized irrigation system will be required for all landscaped areas.
- 10. Placement of shrubs appears to be a little skimpy. The CC&Rs require adequate screening of parking areas which is difficult with sod and trees only. There also appears to be an awful lot of gravel.
- 11. Change street name to Blichmann Avenue.
- 12. Please submit a copy of all plans that were reviewed by the ACCO (site plan, if different from the plan submitted to our department; floor plan; elevation plan; drainage report, if different from that submitted; and memo dated July 10, 1996 from Burke construction which further explains the plans).

#### CITY DEVELOPMENT ENGINEER

7/31/96

Jody Kliska

244-1591

- 1. The site plan needs to show the entire parcel.
- 2. It appears the required parking is 35 spaces, not 32 spaces.
- 3. All required parking and maneuvering areas are required to be paved.
- 4. The drainage report will need to be revised based on the additional paved area. The City Code provides an option to pay a drainage fee in lieu of on-site detention. Based on the calculations presented in the drainage report, the fee will be more than \$5500. A more exact fee will be calculated with the revised report, unless on-site detention is selected. If detention is selected, the report must show all calculations and sizing of the detention facility and outlet works.
- 5. Transportation Capacity Payment is \$4160.00.
- 6. Two driveways side by side will not be allowed. A permit for a curb cut must be obtained from the City Engineer's office prior to construction.

## **CITY UTILITY ENGINEER**

7/31/96

**Trent Prall** 

244-1590

- 1. Please contact Gary Mathews at Ute Water (242-7491) for water related concerns regarding this submittal.
- 2. Please contact Jodi Romero of the City Customer Service Division at 244-1520 for information regarding sewer plant investment fees.
- 3. Petitioner has failed to submit a site plan addressing all items identified in the Submittal Standards for Improvements and Developments page IX-29. Please resubmit only after assuring each item has been included on the site plan.

#### CITY POLICE DEPARTMENT

7/19/96

Dave Stassen

244-3587

Ideally, I would like to see building lights on the north and west sides of this building.

### SPR-96-165 / REVIEW COMMENTS / page 3 of 3

#### CITY FIRE DEPARTMENT

7/31/96

**Duncan Brown** 

244-1414

Office and warehouse are acceptable to the Fire Department. The Grand Junction Fire Department understands this is an office and warehouse facility and not a process facility.

#### MESA COUNTY BUILDING DEPARTMENT

7/19/96

Bob Lee

244-1656

We need 2 sets of sealed plans for plan review. Allow 10-14 days for review. West wall of building required fire-rating.

#### GRAND JUNCTION DRAINAGE DISTRICT

7/24/96

Re: Luxury Wheels Warehouse; 2531 Blichman Avenue; file #SPR-1996-165

Dear Tim:

The project file for Luxury Wheels has not been completed. The building has been in operation for over six months without a certificate of occupancy (C of O) from the Mesa County Building Department. The C of O cannot be signed by our department because the site was not built in accordance with the approved site plan dated August 5, 1996. Among some of the changes to the as-built site are fewer trees planted and less parking stalls constructed. Also the monument sign in front of the building was constructed without a sign permit.

To obtain a certificate of occupancy an as-built site plan must be submitted for review by our department to ascertain if the site conforms with city regulations. Also a sign permit must be obtained for the monument sign. Please make these corrections as soon as possible.

If you have any questions please call me at 244-1447.

Sincerely,

Bill Nebeker Senior Planner

Dear Bill,

Per your request I am addressing the outstanding issues regarding our building at 2531 Blichmann Avenue in Foresight Park.

- 1) Sign Permit I have contacted Bud's Signs.
- 2) Revise Landscape Design I will have Rob Rowlins revise the landscape design per your request.
- 3) Explain Parking Revision Our maximum # of employees is 10.

For your records the owner of the building is Prime Properties located at the same address, I am your contact. The occupant is Detata Wheels.

Sincerely,

Keith Andrews

Grand Junction, CO 81501 81505

Dear Keith:

Rob Rowlands from PA\DS Architects submitted the revised as-built site plan for your facility in the Foresight Business Park. The new plan is approved and I've enclosed a copy of it with our approval stamp for your records. I've also submitted a copy of the Certificate of Occupancy and sent the original to the Building Department. A sign permit will still be required for the monument sign in front of the property.

Thank you for helping me close out this project. If you have any questions please call me at 244-1447.

Sincerely,

Bill Nebeker Senior Planner
