

Grand Junction Fire Department New Development Fire Flow Form

Instructions to process the application: Step 1) Applicant should first fill out all items in Section A. Step 2) Deliver/mail this form to the appropriate water purveyor. The water supplier signs and provides the required information of Section B. Step 3) Deliver/mail the completed and fully signed form to the City or County Planning Department.

SECTION A

To be completed by the Applicant

	Date:				
	Project Nar	ne:			
	Project stre				
	Assessor's	Tax Parcel Number:			
	Property O	wner name:			
	City or Cou	inty project file #:			
	Name of W	ater Purveyor:			
	Applicant N	Name/Phone Number:	_		
	Applicant E	-mail:	_		
 If the project includes one or two-family dwelling(s): a. The maximum fire area (see notes below) for each one or two family dwelling will besquare feet. b. All dwelling units will, will not include an approved automatic sprinkler system. Comments: If the project includes a building other than one and two-family dwelling(s): 					
۷.	a. List the fire area and type of construction (See International Building Code [IBC]) for all buildings used to determine the minimum fire flow requirements:				
	b. List each building that v	List each building that will be provided with an approved fire sprinkler system:			
3.		st the minimum fire flow required for this project (based on Appendix B and C in the International Fire Code [IFC]):			
Co	Comments:				

Notes:

Fire Area: The aggregate floor area enclosed and bounded by fire walls, fire barriers, exterior walls or horizontal assemblies of a building. Areas of the building not provided with surrounding walls shall be included in the fire area if such areas are included within the horizontal projection of the roof or floor next above.

Fire Flow Rule: The City's Fire Code³ sets minimum fire flows for all structures. In general, at <u>least</u> 1,000 gpm at 20 p.s.i. is required for residential one or two family dwellings up to 3,600 square feet (sf) of fire area. For dwellings greater than 3,600 sf of fire area or all commercial structures, the minimum fire flow is determined by Table B105.1(2) (See Fire Flow Guidance Packet⁴). Inadequate fire flows are normally due to water supply pipes that are too small or too little water pressure, or a combination of both.

Applicant/Project Engineer: Refer to City of Grand Junction most recently adopted IFC, Appendix B and C, [IFC 2018] to determine the minimum fire flow required for this project, based on the Water Purveyor's information (*i.e.*, location, looping and size of water lines; water pressure at the site, etc.) and the type, density and location of all structures. Base your professional judgment on the City approved utility plans and Water Provider information shown on this Form. Each time the utility plans/other information relating to treated water changes, resubmit this form just as you did the first time.

SECTION B

To be completed by the Water Supplier

Attach fire flow test data for the hydrants Failure to attach the fire flow test data and/or diagram may delay your project review.

1. Circle the name of the water supplier: Ute Clifton Grand Jun	nction		
List the approximate location, type and size of supply lines for this project, or attach a map with the same information			
3. Attach the fire flow test data @ 20 p.s.i. for the fire hydrants nearest to determine available fire flow. Test data is to be completed within the prevaydrants used to determine the available fire flow:	1 1 0		
Or: 1. attach a map or diagram with the same information, or 2. attach a	map/diagram with flow modeling information.]		
4. If new lines are needed (or if existing lines must be looped) to supply needed to state the available minimum gpm @ 20 p.s.i. residual pressure, or obtain:	•		
Print Name and Title of Water Supplier Employee completing this Form:	Date		
Contact phone/E-mail of Water Supplier:			
**************	********		

Note: Based on the facts and circumstances, the Fire Chief may require the applicant/developer to engage an engineer⁵ to verify/certify that the proposed water system improvements, as reflected in the approved utility plans submitted in support of the application/development, will provide the minimum fire flows to all structures in this project. If required, a State of Colorado Licensed Professional Engineer shall submit a complete stamped-seal report to the Grand Junction Fire Department. All necessary support documentation shall be included.

¹ There are three municipal water suppliers: Ute Water 970-242-7491, Clifton Water 970-434-7328, and City of Grand Junction Water 970-244-1572

² Address: City- 250 North 5th St., Grand Junction, CO 81501; County-P.O. Box 20000, Grand Junction, CO 81502
